**Reason for the amendment is as follows:**

The property descriptions included in the EA did not correlate entirely with the property descriptions in the title deeds for the affected properties. The property description in the EA accordingly needed to be amended to ensure that the affected properties are correctly described and accurately reflected in the EA, as per the wording of the property descriptions in the Title Deeds.

The corrections of the property descriptions have no influence on the assessed and authorised properties. The amendment does not affect the development footprint of the authorised activity, as the correct properties were

assessed in the Basic Assessment Report (BAR), and the correct SG Codes for the properties were included in the Application Form, BAR and EA, although the properties were not described in the EA exactly as they are described in their respective Title Deeds. As the EA is a legal document, it was essential that the editorial errors pertaining to the property descriptions were corrected.

**Amendment 3: Extension of the validity period in Condition 7 of the EA:**

The validity period of the EA (which was due to lapse on 09 May 2021) is hereby extended by an additional five (5) years to **09 May 2026**. As such, Condition 7 of the EA dated 09 May 2016 is amended as follows:

**From:**

*"7. This activity must commence within a period of five (05) years from the date of issue of this authorisation. If commencement of the activity does not occur within that period, the authorisation lapses and a new application for environmental authorisation must be made in order for the activity to be undertaken."*

**To:**

*"7. This activity must commence within a period of ten (10) years from the date of issue of this authorisation (i.e. the authorisation lapses on 09 May 2026). If commencement of the activity does not occur within that period, the authorisation lapses and a new application for environmental authorisation must be made in order for the activity to be undertaken."*

The Department is aware that the environment changes constantly, as a result it might be significantly different from the one that existed at the time of the issuing of this EA, hence the validity of the EA cannot exceed a maximum period of 10 years. Failure to commence with construction activities within the maximum 10 year period, your EA will be deemed to have lapsed and a new application for Environmental Authorisation will have to be lodged.

**Reason for the amendment is as follows:**

The holder of the EA intends to bid the Kronos PV 1, 2 and 3 projects in one of the upcoming Renewable Energy Independent Power Producer Procurement (REIPPP) Programme bidding rounds. As such, an extension of the validity of the EA for the overhead powerline was required, to ensure that the PV projects have a valid grid connection. The timing of the next bidding rounds has not been confirmed by the Department of Mineral Resources and Energy.

The amendments do not change the scope of the EA, nor result in an increased level or change in the nature of potential environmental impacts associated with the authorised activity.

**General**

This EA amendment letter must be read in conjunction with the EA dated 09 May 2016.

In terms of the Promotion of Administrative Justice Act, 2000 (Act No 3 of 2000), you are entitled to the right to fair, lawful and reasonable administrative action; and to written reasons for administrative action that affects you negatively. Further your attention is drawn to the provisions of the Protection of Personal Information Act, 2013 (Act no. 4 of 2013) which stipulate that the Department should conduct itself in a responsible manner when collecting, processing, storing and sharing an individual or another entity's personal information by holding the Department accountable should the Department abuse or compromise your personal information in any way.

In terms of Regulation 4(2) of the Environmental Impact Assessment Regulations, 2014, as amended (the EIA Regulations), you are instructed to notify all registered interested and affected parties, in writing and within

14 (fourteen) days of the date of the decision, of the Department's decision, as well as the provisions regarding the submission of appeals that are contained in the Regulations.

Your attention is drawn to Chapter 2 of National Environmental Management Act, 1998 (Act No. 107 of 1998) National Appeal Regulations published under Government Notice R993 in Government Gazette No. 38303 dated 08 December 2014 (National Appeal Regulations, 2014), which prescribes the appeal procedure to be followed. Kindly include a copy of this document (National Appeal Regulations, 2014) with the letter of notification to interested and affected parties in this matter.

Should any person wish to lodge an appeal against this decision, he/she must submit the appeal to the appeal administrator, and a copy of the appeal to the applicant, any registered interested and affected party, and any organ of state with interest in the matter within 20 days from the date that the notification of the decision was sent to the registered interested and affected parties by the applicant; or the date that the notification of the decision was sent to the applicant by the Department, whichever is applicable.

**Appeals must be submitted in writing in the prescribed form to:**
