Attention: Mr. Simon Chalwa

HOSPITAL DEVELOPMENT ON ERF 8323, BURGERSFORT EXTENSION 47

Dear Mr Chalwa

I can confirm that my company did the EIA for the larger development project and the environmental authorization (EA) that was issued is still valid. As a matter of fact we have also been appointed by the developer to conduct the environmental compliance monitoring for the project (and is still doing so for the past 12 years).

We can also confirm that the development of a hospital does not require a specific environmental authorization as long as the EA is valid, the township has been proclaimed and services are available (as is the case). The only authorization that is required, (as you will be aware of) is a license to operate a hospital from the Department of Health.

This is short summary and I hope it answers your concerns. Let me know if anything else needs explanation. Attached is a copy of the EA for your record.

Kind regards

L.D. VAN DER WALT
