The CEO
SAHRA

McGregor Museum approval for temporary export of lithic material from Bestwood, near the town of Kathu, Northern Cape.

Prof Michael Chazan seeks to export temporarily a sample of lithic material from Bestwood, near Kathu. The sample is to be sent to Melissa Miller at the University of Tulsa, for a period of one year for tribology (use wear) analysis. This work is not being done in South Africa because of lack of appropriate microscopes. The analysis is not destructive and all material will be returned to the McGregor Museum once analysis is complete, not later than one year from date of permit being issued.

The McGregor Museum Archaeology Department gives its approval for the temporary export of this material.

Yours faithfully

Dr David Morris
Head of Archaeology, McGregor Museum &
School of Humanities, Sol Plaatje University
