Hi Louise/Leon

We have discussed same with our architects, and we feel that we can and should support your application.

From what we can tell, there is no visual impact from the street. Looking down on PV's will not impact on our building as long as they are installed in a neat manner which is not disruptive to the context.

Warm regards

Casey

Subject: request for comment | Sexton's House, Lutheran Church, Strand Street, Erf 9245

Good day,

We are in the process of preparing a submission to SAHRA for the installation of rooftop photovoltaic panels on the Netherlands Consulate general, part of the Lutheran Church Complex.

SAHRA has requested comment from you, as the owners of Erf 174009, 50 Bree Street.

We would appreciate you perusing the attached documents and providing us with your comments at your earliest convenience.

Attached please find the following documentation:

1. heritage report;
2. City of Cape Town comment;
3. Drawing NCG-PV_section;
4. Drawing NDG-PV roof plan.
