RE: REQUEST FOR THE DESTRUCTION OF HERITAGE STRUCTURE FOR MINING ACTIVITIES

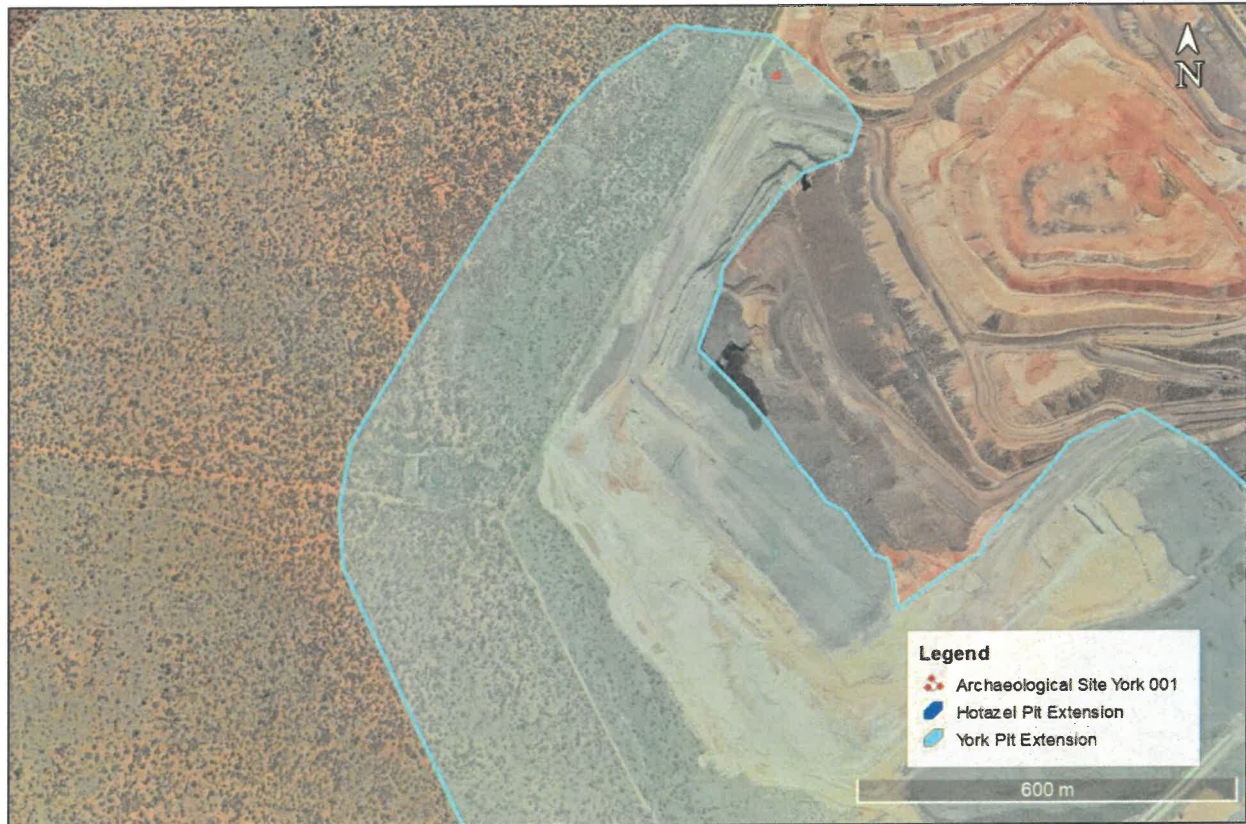

KMR is currently in the final stages of obtaining a permit to mine its boundary ore pillar. Once obtained, this will result in the expansion of the current York pit and the extension of the life of the mine from 2025 to 2032. The heritage structure in question is located within the northern side of the planned pit expansion [Latitude: 27° 14.302'S and Longitude 22° 55.598'E], as shown in the figure below. Consequently, KMR would like to demolish it to avoid sterilizing the ore resources located under the concerned site.
