RE: MOTIVATION FOR COMPLETED WORKS AT 77 NEW ENGLAND ROAD, PMB

On ERF 7136, PMB (FORM I)

Scope of completed works :

1. Existing wire mesh fence removed from Harwin Road boundary and replaced with new walls with wrought iron infill to match existing.
2. Existing precast concrete boundary walls on New England Road replaced with solid brick walls.

Motivation for completed works :

St. Johns School for Girls is a private boarding and day school for girls with security being one of the utmost important requirements, hence the replacing of the old wire mesh fence.

On New England road, the classrooms are built almost on the boundary line and taking into account the road traffic noise and pedestrians , a solid wall replaced the existing precast concrete wall.

We hope this meets your favourable approval.

Kind Regards

A. Umraw
