## REPAIR AND RESTORATION OF ROOF AT MUSGRAVE METHODIST CHURCH 235 MUSGRAVE ROAD

Roof replacement details :

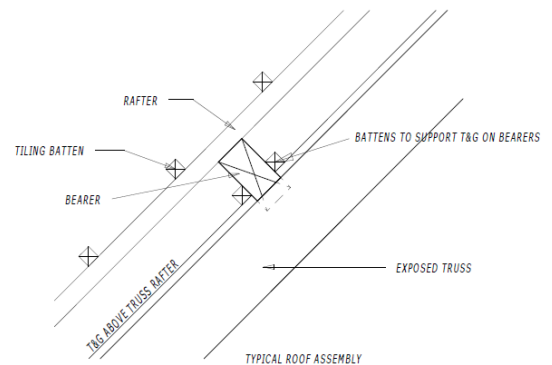

As per the engineers specification, the new timber members are recommended as :

RAFTERS 76x76mm

BEARERS 76x220mm

Arranged as sketched here :

The existing decorative trusses will be inspected for damage while the tiles are being removed, All exposed timber will be protected with plastic and tarpaulins during construction. Methods for the protection of the interior fittings will be discussed and agreed with the appointed contractor.

The contract is to run during the winter months to avoid weather disruptions. All valuable equipment and historical items will be removed and stored during construction.

Gutters :

Existing gutters are industrial ogee aluminium gutters that look like they are about 15-20 years old. They will be removed and reinstalled, all joints will be checked and sealed after reinstallation. If any are damaged during construction, they will be replaced with matching Ogee gutters.

Refer to current photograph and  
Spec sheet attached :
