Dear Sir/Madam

RE: 17 HOPSON AVENUE

As your suggestion at our last meeting for the above property, we have made the necessary changes as follows:

1. The existing two storey building structure will remain exactly the same. Regarding the roof, the pitch will stay the same but the tiles will be replaced with an iron roof.
2. The window sizes and shapes will remain as is but replaced therefore the existing architectural significance will not change and will compliment the existing streetscape.
3. The new 4 storey build will remain as our previous application also having an iron roof at a lower pitch to reduce the height of the building.

Our building now complies with the existing streetscape which have houses with a mixture of tile and iron roofs. We have now complied with all your requests and look forward to an approval.

Yours Faithfully

G.P. Braum
