INTRODUCTION

The purpose of this Background Information Document (BID) is to provide information to interested and affected parties (I&APs) regarding the Proposed construction of Off Take 13B Potable Water Pipeline as part of the Lower Thukela Bulk Water Supply at Collisheen, iLembe District Municipality, KZN.

Triplo4 Sustainable Solutions (hereafter referred to as Triplo4) was appointed as Independent Environmental Assessment Practitioner by Black Balance Projects (on behalf of their client, iLembe District Municipality) for the proposed construction of the Off Take 13B of the potable water pipeline.

LOCATION OF PROPOSED PROJECT

The locality is approximately 56km to the North of Durban in the Collisheen Estate, Northern Kwa-Zulu Natal. The proposed project, Off Take 13B, falls within the KwaDukuza Local and iLembe District Municipality.

Co-ordinates of proposed development

Pipeline starting point – P1

Latitude /Longitude	Degrees	Minutes	Seconds
South	29	28	41.48
East	31	10	03.37

End point – P8

Latitude /Longitude	Degrees	Minutes	Seconds
South	29	29	51.90
East	31	10	48.49

PROJECT DETAIL

The proposed construction for Off Take 13B forms part of the Lower Thukela Bulk Water Supply Scheme which is a project of the iLembe District Municipality and co-funded by the Department of Water Affairs. The construction of Off Take 13B is part of the sections of the potable water pipeline that forms part of the broader Bulk Water Supply Scheme in the lower Thukela Region. The proposed pipeline is located immediately outside the road reserve and is approximately 2.7km in length with an outside diameter of approximately 500mm. The proposed Off Take 13B bulk water pipeline forms part of a network to make provision for Bulk Supply of Potable water to the Tongaat Industrial Township.

PROJECT MOTIVATION

There is a growing need and urgency to provide adequate potable water to many communities that do not have access to the life sustaining resource particularly in rural areas. The proposed construction of the Off Take 13B pipeline forms part of the Lower Thukela Bulk Water Supply Scheme that has been developed to address the challenges associated with poor supply of reticulated potable water in Northern KZN. Overall there is an ongoing need to address the current and future water supply backlogs of which requires continued investment in new infrastructure to areas that lack access to safe water.

Thus the construction of the Off Take 13B Pipeline for Bulk water supply meets the objectives of addressing the challenges of inadequate water service provision. The project also brings about socio-economic benefits as it promotes healthier and uplifted communities as the number of people that have access to clean water will increase and the risk associated with use of untreated water will be reduced significantly. The proposed construction of the Off Take 13B pipeline is in the interest of the greater public as improving water service provision to those who currently do not have access to safe potable water is indeed a priority that is on top of the development agenda for KZN.

SPECIALIST EVALUATION

An independent Wetland and Ecological Habitat Assessment was conducted by Mr Clayton Cook, and the following is a summary of the findings with an additional figure (figure 3) to indicate the sensitivity of the proposed site:

Ecological Habitat Assessment:

- The site has been historically annually ploughed/tilled and old fallow lands are dominated by secondary succession grasses pioneer weedy plant species or ruderals as well as patches of hygrophilous sedges within artificially excavated drainage trenches and furrows. The vegetation along the proposed pipeline servitude has been historically transformed and degraded due to surrounding anthropogenic activities including the removal of vegetation during ploughing of lands and planting of sugarcane as well as the construction of P-387.
- High levels of human disturbance as well as habitat transformation and degradation on the site and surrounding valley bottom wetlands and drainage lines were noted.

Wetland Assessment:

- The functions of wetland ecosystems have been severely compromised and have lost the natural connectivity due to current and historic agricultural practices. Thus the transformed hillslope seepage wetlands surrounding the pipeline alignment have extremely limited hydrological functioning as the water is directed into artificially created drainage lines. The majority of the hillslope seepage wetland surrounding the site is completely transformed and the natural hydrological patterns totally disrupted. Due to the nature of the transformation,

BID for the Proposed construction of Off Take 13B Potable Water Pipeline, iLembe District Municipality, KZN
 there is little or no chance that these areas will be able to be returned to a natural state, and would likely remain permanently modified.

ENVIRONMENTAL PROCESSES**

Relevant Environmental Legislation

The below mentioned environmental activities are potentially being triggered by the proposed development, requiring an Environmental Authorisation from KZN EDTEA:

Listing Notice 1 (GNR 544, 2010):

Activity No.	Listed activity as per the project description
Activity 9	The construction of facilities or infrastructure exceeding 1000m in length for the bulk transportation of water, sewage to storm water with an internal diameter of 0.36m or more. The proposed pipeline has an internal diameter of 0.5m
Activity 11	The construction of infrastructure or structures covering 50 square metres or more where such construction occurs within a watercourse or within 32 metres of a watercourse. The proposed pipeline occurs within 32 m of a watercourse
Activity 18	The infilling or depositing of any material of more than 5 cubic meters into, or the dredging, excavation, removal or moving of soil, sand, shells, shell grit, pebbles or rock of more than 5 cubic metres from a watercourse. It is anticipated that more than 5 cubic meters of soil, sand or rock will be excavated or moved during the construction of the pipeline.

A person who wishes to commence, undertake or conduct an activity listed in terms of the National Environmental Management Act, or NEMA EIA Listing Notice 1 activities must conduct a basic assessment process.

Legal requirements for the proposed construction of off take 13B Pipeline

The proposed pipeline triggers activity 9, 11 and activity 18 of Listing Notice 1 of the EIA Regulations and will conduct a Basic Assessment Report as per The National Environmental Management Act (NEMA). A Water Use License Application is required for the proposed construction of the Off Take 6 pipeline. A Water Use License (WUL) is a legal process governed by DWA requiring the authorisation of all water uses defined in section 21 of the National Water Act (Act No 36 of 1998) [NWA]. The above mentioned project requires Section 21 (c) and (i) water uses. The NWA defines a Section 21 (c) and (i) water uses as: Section 21 (c) – Impeding and diverting the flow of water in a watercourse, Section 21 (i) – Altering the bed, bank, course or characteristics of a watercourse.

BID for the Proposed construction of Off Take 13B Potable Water Pipeline, iLembe District Municipality, KZN
Basic Assessment Process

The basic assessment process being followed comprises of the following:

- Submission of an Application for Authorization to EDTEA;
- Public participation Process:
 - Submission of a Background Information Document (this document) to identified stakeholders;
 - An advertisement in the local newspaper (Stanger Weekly);
 - Placement of a site notification at the site notifying I&AP's of the proposed activity and inviting them to register; and;
 - Relevant I&AP's consultation to address issues and concerns raised;
- Compilation of Draft Basic Assessment Report for I&AP's review and comments, which will be available for review and comment at iLembe House R102 (Salt Rock Drive, Umhlali) for a period of 40 days from **07 January 2015 to 15 February 2015**
- Submission of a Basic Assessment Report and details of I&AP consultation to the EDTEA, for a decision;
- Communication to I&AP's regarding the Environmental Authorisation.

Public Participation Process

The public participation process and time frames are summarized as follows:

Announcing the opportunity to participate and register 09 December 2014

- Distribution of the Background Information Document to all identified stakeholders to announce the project and inviting stakeholders to register as an I&AP and participate in the public participation process;
- Posting of the site notice at the site;
- Advertisement in the "Stanger Weekly" which will be available on **26 November 2014**

Obtaining initial comment,

- Providing this BID and comment sheets to stakeholders; and
- Capturing all comments in a Comment and Response Report / Issues Trial.

Draft BA Report 07 January 2015 to 15 February 2015

- Availability of the draft BA report at iLembe House R102 (Salt Rock Drive, Umhlali), which will contain a full project description, alternatives considered, and relevant information.

Submitting the final BA report to Authorities, providing a comment period of 40 days (excluding public holidays); and Submitting the final BA report to EDTEA for consideration and communicating the decision to I&AP's.

Your contributions are important

You can get involved in the process:

1. By responding (by phone, fax or e-mail) to our invitation for your involvement in the process;
2. By completing the attached comment form and e-mailing, posting or faxing it to Triplo4 Sustainable Solutions;
3. In writing contacting or telephoning consultants if you have a query, comment or require further project information; and
4. By reviewing and commenting on the BA Report within the allowed 40-day review period.

In terms of the NEMA Regulations (GN 543) you are invited to formally register as an I&AP.

Please note that in terms of Regulation 56 (c), I&AP's need to disclose any direct business, financial, personal or other interest which they may have in the approval or refusal of the application.

Please register by **09 December 2014** by completing the enclosed registration and comment sheet and please declare the interest with regard to the project with your comments.
