

The access road will lead directly to Sikhululiwe Village, and will link with the internal road already provided for the village. All internal roads and platforms will be paved with standard concrete block pavers.

The illustrations below depict the initially proposed route of the access road, and the amended route following the Heritage Impact Assessment recommendations (refer to Appendix H for the Heritage Impact Assessment Report).

**Proposed (initial) layout of access road**

**Amended route of the access road following the Heritage Impact Assessment recommendations.**
