D. UNLAWFUL WORK

1. Purpose of the work (Indicate the reason by marking the relevant box)

Damage/Demolition		Alteration/Addition	X	Repair/Redecoration	
Removal from site	X	Subdivision		Amendment of Site Plan	

2. Date when the work was first commenced _____

3. Current Status of the Work (mark appropriate box)

Completed		Stopped pending application outcome		Stopped prior to finalisation	
Underway/continuing	X	Decommissioned and the site rehabilitated		Decommissioned and the site abandoned	

4. Detail of the work (Provide full details on the nature and purpose of the work – use a separate sheet if necessary)

The Department of Water Affairs (DWA) secured approval and authorisation to raise the Dam wall of Hazelmere Dam and install more floodgates. This dam wall raising will allow the dam to hold more water which also result in inundation and flooding of a wider area than what is currently affected. The flooding calculations also determined the full supply levels and the 100-year flood line. The heritage sites such as the 1898 Oakford Priory Cemetery will be affected by the 100-year floodline. the DWA in consultation with the Dominican Association, custodians of the affected graveyard, proposed to preserve all graves in the cemetery in situ by converting the design of the headstones and installing concrete stabilizers to ensure that the graves will not wash away when the 100-yr flood inundate the area.

1. Motivation (Motivate the purpose of the work and why it was begun/completed unlawfully)

Oakford Priory Cemetery was approved for mitigation invention which involves securing the graves in situ prior to raising the dam wall and anticipated subsequent flooding of the project area. Mitigation construction began in line with the DEA ROD, however, there was an oversight in securing the relevant permit from Amafa eKwaZulu-Natali before work began on site. The mitigation work is meant to secure the site in situ and protect it from damage should the 100-yr flood rise to the graveyard. Therefore, all the damage or changes made to the cemetery is designed to preserve and site. The memorial monument in graveyard will be relocated to safe position on site.
