Meeting Minutes

Project Title: Obuka Tribal House
Location: Ntambanana Water Supply Scheme
Date: 09 March 2022

Attendees:

See the meeting register.

Agenda

1. Introductions
2. Presentation of information by Simphiwe Khumalo of EnviroPro
3. Comments & Discussion

Introduction to Project & Purpose of Meeting

Cllr Msimango greeted the tribal council and explained he has come to introduce Simphiwe from EnviroPro has come to introduce a water pipeline project, he then hand over to Simphiwe to introduce himself so he can explain further regarding the project. Simphiwe greeted everyone, introduced himself, and thanked the tribal council and the ward councilor for taking the time to meet to discuss the project. Simphiwe explained that the purpose of the meeting was to introduce the proposal to the tribal council and ward councilor to allow them to notify community members through the official recognized channels. The meeting also served to allow the consultants to meet the tribal council and ward councilors as a community representative and answer any comments or concerns he might have.

These meeting minutes will be distributed to registered interested and affected parties and authorities as part of the Basic Assessment Report.

The City of uMhlathuze proposes to construct the Ntambanana Water Supply Scheme (WSS) located in the City of uMhlathuze Local Municipality, King Cetshwayo District Municipality. Environmental Authorisation through a Basic Assessment Process is required for the infilling of more than 10m³ of material within a watercourse and placing more than 100m² of infrastructure within 32m of a watercourse. A Water Use Authorisation is also required in terms of Section 21 (c) & (i) of the NWA for any activity that will alter the beds, banks, and flow of a watercourse including activities that are located within 500m of a wetland.

Comments & Discussion

1. Cllr Msimango added that he hopes that the project will be a success even though there is an existing pipeline and a reservoir that was built years back and it is still not functional because there was a missing part or generator that can help with the water pressure which has not been install yet and he asked if Simphiwe does know about it and if the new project will tie with it.

INkosi said that is the problem with the current government is that when people change position or their term end the one person does not track and make sure that thee continue and complete the project that was started by the previous leader but they want to start afresh. He stated that Simphiwe might not be able to answer the question as he does not stay from the area and from the local municipality.

This was noted by everyone.

2. There was no further questions, all the meeting documents were signed
The meeting was closed.

Date: 01 March 2022

Attendees:

See the meeting register.

Agenda

1. Introductions
2. Presentation of information by Simphiwe Khumalo of EnviroPro
3. Comments & Discussion

Introduction to Project & Purpose of Meeting

Cllr Ntshaba greeted the tribal council and apologized for being late and he further stated that as the council is aware of the project he will just hand over to Simphiwe to introduce himself and also allow Nigel to explain his involvement in the project. Simphiwe introduced himself and Nigel, thanked the tribal council and ward councilors for taking the time to meet to discuss the project. Simphiwe explained that the purpose of the meeting was to introduce the proposal to the tribal council and ward councilor to allow him to notify community members through the official recognized channels. The meeting also served to allow the consultants to meet the tribal council and ward councilors as a community representative and answer any comments or concerns he might have.

These meeting minutes will be distributed to registered interested and affected parties and authorities as part of the Basic Assessment Report.

The City of uMhlathuze proposes to construct the Ntambanana Water Supply Scheme (WSS) located in the City of uMhlathuze Local Municipality, King Cetshwayo District Municipality. Environmental Authorisation through a Basic Assessment Process is required for the infilling of more than 10m³ of material within a watercourse and placing more than 100m² of infrastructure within 32m of a watercourse. A Water Use Authorisation is also required in terms of Section 21 (c) & (i) of the NWA for any activity that will alter the beds, banks, and flow of a watercourse including activities that are located within 500m of a wetland.

Comments & Discussion

1. Simphiwe stated that the project has different studies which include geotechnical engineering and that will be Nigel's involvement in the projects. Simphiwe said he will hand over to Nigel the process for Geotech studies.
Nigel greeted everyone and stated that he is from Davies Lynn & Partners (Pty) Ltd a company that deals with geotechnical studies, he further explained that he will be going around the area to assess the soil so that he can advise on what type of material can be

used during the construction to avoid any future disturbance or damage to the water pipeline infrastructure.

Induna asked if EnviroPro and Davies Lynn & Partners (Pty) Ltd will need to hire anyone from the community.

Cllr Ntshaba said he has left the hiring part to Cllr Gcabashe

Cllr Gcabashe stated that Nigel has already stated that he will be in the area and asked for someone to company him and for the week he will be working in the area. He also stated that he has a few CVs at his place from people who have asked for jobs a few weeks back but he has not contacted them. He further stated that if the tribal council has a person in mind that person can be suggested to Nigel before the meeting ends as he will be starting the assessment on the next day.

Induna asked if EnviroPro will hire anyone and from what age are people Nigel is looking to hire. He further asked if the ward Cllrs have any procedure on how to hire people.

Nigel said as long as they can do work it does not matter as there might be a lot of digging.

Simphiwe said EnviroPro will not hire anyone as they are still planning phase of the site work and also there's no physical work that will be done by the EnviroPro team except taking pictures of specific areas which will require someone who has knowledge of what is required and what needs special attention according to the desktop studies except.

Cllr Gcabashe said there is no procedure for hiring people but the tribal council can give advice.

This was noted

2. Cllr asked if the proposed structure will be in the same position as the current structure. Rob said he assumes it will be positioned in a way to align with the road but that can be confirmed when the engineering drawings have been received.

The Cllr said will the structure be bigger than the current one as the current makes it difficult to cross over during the rainy season, he asked if the culverts box structures next to the road will be used for the proposed structure.

Rob said he can assume not but all will be confirmed at a later stage as EnviroPro is still collecting information and contacting all the affected and interested parties.

The Cllr said it will be great to have a bigger structure than the current structure.

3. Induna thanked the ward Cllr and Simphiwe and Nigel for the information and stated that he hopes that the project will be completed as water is one of the great needs for the area.
4. All the meeting documents were signed
The meeting was closed.
