Subject: Temporary export permit application from SAAO (Brass Telescope)

Dear Permit Committee Members

Following a request by one Permit Committee member that the Templeton College must submit further information with regards to the facilities in which the Telescope will be exhibited, particularly with regards to the fire prevention and security measures. The SAAO and Templeton College have now provided us with that information as requested. Kindly note that the close up images of the damaged areas in the Telescope are also attached as they were also requested. Please do not hesitate to come back to me should you need any clarity in this regard.

Kindly comment whether now we should issue a temporary export permit or not by 14 May 2012, thereafter we will proceed as seems best, in terms of the responses we receive.

Kind regards

No objections Azola. Seems extremely thorough.

Should a locksmith not be consulted to unlock the lock and supply a new key before temporary export?

Yours sincerely

John Rogers

Dear Permit Committee Members

You are kindly asked to comment on the attached Permit Application by 02 May 2012. Thereafter we will proceed as seems best, in terms of the responses we receive.

Please note that I have also attached a copy of the Loan Agreement and a Condition Report.

Subject: RE: Temporary Export Permit Application from SAAO (BrassTelescope)

Thank very much June, we will certainly issue the permit today.

>>> "June Hosford" <jhosford@mweb.co.za> 2012/05/24 08:54 PM >>>

Dear Azola:

Thank you, I'm now quite satisfied that all conditions have been met, on both sides, i.e. the Templeton College and the SAAO. Please go ahead and do what needs to be done to issue the permit.

Regards,
June

Subject: Temporary Export Permit Application from SAAO (BrassTelescope)

Dear June

Below is the information which you have requested from the Templeton College in London:

Thank you for your detailed response which I have forwarded to our insurers for comment.

The Observatory building is fitted with an automated fire detection system throughout which complies with current UK legislative standards, including automated detection and break glass call points; this provision is further enhanced by the installation of fire extinguishers and a chemical suppression system in the adjacent production kitchen.

All installations are maintained by commercial contractors in line with current UK legislative standards.

The system is monitored on a 24/7 basis at the Porters Lodge (College Reception) at all times other than when the College is closed at Christmas and Easter.

The College is currently exploring options for monitoring the fire safety system at times when the College is closed and thus not staffed; these include the staffing of the College Lodge (reception) by College staff or contracted security staff on a 24/7 basis or outsourcing the alarm monitoring during these periods using an IT linkage to University Security Services on a 24/7/365 basis. Whilst this is not in place at the moment, we guarantee that there will be either a manned or IT based solution to this concern in place by December 1 st 2012.

The College is effectively a gated community contained within stone walls or by the physical presence of the building forming the perimeter to the property. Access is strictly monitored outside of regular office hours and the curtilage can be isolated (and the College effectively locked-down) if required. In such an event, only authorised College members in possession of a College fob can gain access from outside the site.

Access to the Observatory is strictly monitored; all visitors to the Observatory must be accompanied by a trained member of College staff or

Fellow of the College and numbers are limited to 12 at any one time. The College intends to display the telescope at specific events when a member of staff will be present in the Observatory; when not on display, the telescope will be stored in its transportation box and kept in a locked area elsewhere within the College where the same fire safety arrangements are in place as in the Observatory.

Kindly let us know if we can now be able to issue this temporary export permit not later than 28 May 2012 as this application has been pending for some time.

Kind regards

Azola Mkosana
