RHINO OIL AND GAS SOUTH AFRICA (PTY) LTD
PROPOSED EXPLORATION RIGHT FOR PETROLEUM ON VARIOUS FARMS IN THE MAGISTERIAL
DISTRICTS OF MATATIELE AND MT FLETCHER, EASTERN CAPE
MINUTES OF SCOPING MEETING WITH LOCAL COMMUNITY LEADERS/REPRESENTATIVES

DATE	29 September 2015
VENUE:	Nokhwezi Community Hall
PROJECT:	Proposed Exploration Right for Petroleum On Various Farms in the Magisterial Districts of Matatiele and Mt Fletcher, Eastern Cape
SLR COMPANY:	SLR Consulting (South Africa) (Pty) Ltd
PASA REF	12/3/295 ER
PROJECT NUMBER:	723.18034.00005
PURPOSE:	The purpose of the meeting was to: <ul style="list-style-type: none">• Understand the environmental process• Provide an overview of the project• Obtain input on the existing status of the environment• Obtain input on potential impacts• Raise and record environmental issues• Identify possible specialist investigations• Agree on the way forward and the logistics for report distribution
ATTENDANCE:	An attendance register is presented in Appendix 1.

1. OPEN AND INTRODUCTION

Matthew Hemming (MH) opened the meeting and introduced SLR Consulting (South Africa) (Pty) Ltd (SLR). MH then introduced Phillip Steyn (PS) representing Rhino Oil and Gas South Africa (Pty) Ltd as the applicant. MH thanked everyone for their attendance, asked that all complete the attendance register and confirmed that the meeting will be conducted in English. Given the small size of the meeting all participants were asked to introduce themselves.

MH indicated that this meeting was being held with the Traditional leaders and ward councillors as representatives of the community who own land/reside in the application area. He indicated that this meeting was a part of the first round of engagement that was being undertaken for the scoping and EIA process required for the ER application.

2. PRESENTATION

MH gave a slide presentation outlining the environmental process, the project scope, project alternatives, the current state of the environment, potential anticipated impacts, the way forward in this environmental process and the logistics for report distribution. PS gave a presentation outlining the structure of Rhino Oil and Gas South Africa and the activities that are proposed to be undertaken for

the exploration. The physical activities include core borehole drilling and seismic surveys. See the presentations attached in Appendix 2.

3. DISCUSSION

A number of issues were raised during the meeting. Many of these related to clarification of the presentations, how long takes to get approval, how long the exploration takes etc. The key issues have been recorded in Table 1 below. Where a response was provided the response has been included in the table. It was highlighted at the meeting that the EIA is in its early stages and as such not all answers to issues raised were available.

Table 1 : ISSUES RAISED DURING THE MEETING

	Issue raised	By whom	Response (given by SLR unless otherwise stated)
Procedural Issues	<p>Consultation with communities is important. There are mining companies with local interests whom have not consulted. What consultation has been undertaken and will be undertaken? Meetings with the community will be necessary. Who has been engaged with and was the mayor invited to this meeting?</p>	Ward Councillor, Scoping Meeting	<p>We cannot comment on other mining companies. The law sets out that process of applying for a right and the environmental authorisation. A process of notification and consultation for the Rhino application has begun. This scoping meeting is one of the stages in the process, of which there will be more steps. When identifying the land owners for the application area it was evident that much of the land is owned by government and used by the communities. We therefore began contacting the Traditional Authorities and Ward councillors . It was suggested to us that the initial meeting should be held just with these representatives of the communities. Hence today's meeting. A further round of engagement will be undertaken during the EIA process and we will consider suggestions on where and with whom to hold these. The mayor was invited to this meeting.</p>
Socio Economic	<p>Communities must benefit or they will revolt against the project as has happened in the North West . While the law may be based in Pretoria, the activity will be here, amongst the people. Mining wont happen if the people don't let it.</p>	Traditional Leader, Scoping Meeting	<p>The purpose of the current consultation is to understand the issues and impacts that the project could have on the environment. Communities are part of this environment and are therefore being consulted. It was explained that the MPRDA does provide that mining companies must take note of communities and ensure that the benefits of mining accrue locally. This is facilitated through a Social and Labour Plan. However, it must be noted that the Social and Labour Plan is only required for the production phase of a project, not during exploration. In the exploration phase of a project there is no income and thus no benefits can accrue.</p>
Biodiversity	<p>There is work being done to improve the ecology of this region? Although protected areas are excluded, what about future conservation areas. The Matatiele Local Municipality is working toward expanding protected areas through a biodiversity stewardship programme. This has been aligned with the Provincial Protected Area Expansion Strategy</p>	Ward Councillor, Scoping Meeting	<p>We are aware of existing protected areas in the area and these are specifically excluded. Part of the scoping process is develop an understanding of the biodiversity status and sensitivity of the area. MH used various maps to indicate different resources that had been accessed (EC Biodiversity Conservation Plan, NPAES). We are also aware that the some the planning area of the MDTCA is located here. We would be interested to obtain details on the areas that are likely to be declared as protected.</p>

4. THE WAY FORWARD

The way forward agreed to by attendees was outlined as follows by MH:

- Distribute draft scoping report (from mid October 2015)
- Regulatory authority and public review (30 days).
- Summaries to be made available in Xhosa and Sotho.
- PASA to decide on scoping (January 2016)
- Specialist EIA investigations (next 3-5 months)
- Distribute draft EIA and EMP report (~ April 2016)
- Distribute record of decisions (~ 3rd quarter 2016)

5. CLOSE

MH thanked attendees for their input and for making the time to attend the public scoping meeting. He advised that there will be further communication with the registered I&APs and that another round of public meetings was likely to be held early in 2016. The meeting was closed.

RHINO OIL AND GAS EXPLORATION
MINUTES OF PUBLIC SCOPING MEETING

DATE	09 November 2015
VENUE:	Nokhwezi Community Hall, Matatiele
PROJECT:	Rhino Oil and Gas, Eastern Cape
SLR COMPANY:	Africa
PROJECT NUMBER:	723.18034.00005
PURPOSE:	Information Sharing
ATTENDANCE:	An attendance register is presented in Appendix 2.

1. OPEN AND INTRODUCTION

Matthew Hemming from SLR Consulting, opened the meeting and welcomed the attendees. Matthew Hemming explained the purpose of the meeting, and introduced the project team members present: himself and Stella Moeketse (SLR Consulting), and Phillip Steyn (Rhino Oil and Gas Exploration).

2. APOLOGIES

No apologies were made.

3. ENVIRONMENTAL PROCESS

Matthew Hemming gave background to the environmental processes as per the presentation.

4. PROJECT OVERVIEW

Phillip Steyn gave the company background and project overview as per the presentation.

5. DISCUSSION

A number of issues were raised during the meeting. These have been recorded in the table attached as Appendix 1. Where a response was provided the response has been included in the table.

6. THE WAY FORWARD

The meeting following consist the way forward for the process:

- Distribute draft Scoping report (under public review from 19 October)
- Regulatory authority and public review (30 days)
- EIA investigations (next 3-5 months)
- Distribute draft EIA and EMP report (~ March/April 2016)
- EIA feedback Meetings (~ March/April 2016)
- Regulatory authority and public review of EIA (30 days) and
- Distribute record of decision.

7. CLOSE

Chief Lebenya raised his comments (see Appendix 1) and the attendees left the meeting immediately thereafter.

APPENDIX 1: RECORD OF ISSUES RAISED AND RESPONSES GIVEN

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
Procedural Related Issues The presentation was very technical for most of the attendants. As a result, chances are they did not understand the proposed project. Do you think the presentation served its purpose?	Nhlanhla Ntunzwana	The purpose of our meetings is to simply the proposed project as much as possible. The attendants are always given a chance to ask questions and seek clarification where required. There is also an opportunity for people who didn't understand the project to wait for the meeting to end so that we can have a more focussed discussion with them.
You should have brought a team consisting of people who can speak all the languages that are spoken in this area including Isi-Xhosa.	Nolubabalo Kwayimani	We have noted your comments, we will incorporate them in our public participation process strategy.
We do not appreciate the fact that your presentation did not mention or discuss fracking when we all know that fracking is going to be the outcome of your project.		The proposed project and related process are not about fracking but about exploration activities (an investigatory exercise). As a result, discussing fracking at this point is unnecessary because Rhino's technical team does not even know if there is oil and gas in this area or if there will be a need to frack. It must be noted that fracking is one of a number methods used to extract oil and gas and not the only method.
This process is flawed. This process should be stopped until a strategic environmental assessment (SEA) has been carried out.	Francoise du Toit	SLR and Rhino would like to see an SEA being undertaken however, it is an extensive process to be undertaken by one company. Many stakeholders will have to be on-board including organs of the government in order for a meaningful SEA to be carried out.
The meeting minutes and reports must indicate that there is a need for an SEA to be carried out.		Your comment has been captured as requested.
The proposed project area has approximately 100 000 illiterate people who live in the rural areas. How is SLR going to ensure that that they are included in the public participation process (PPP)?	Nicky McLeod	SLR will revise its PPP strategy and will share that information with you prior to execution so that your input can be used to augment our strategy where applicable.
Have the traditional leaders within the proposed project area been invited to this meeting?	S L Maqhubu	We met with the traditional leaders and ward councillors on 29 September 2015. The meeting was held at the same venue as this meeting. We also sent them an invitation to this meeting via emails and post.
Literacy in very low in South Africa, most people don't read including those who are literate. Why was the mode of communication with our people only restricted to placement of		We have noted your comments, we will incorporate them in our public participation process strategy.

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
adverts in newspapers? We have local radio stations (many people listen to them) which could have been used.		
This meeting (venue and time) was not properly communicated with our people. The time of this meeting alone (12h30) doesn't cater for our rural people who need to travel back home. This meeting should be about to end by 12h30 and not only starting.	Charmaine	We will do as requested.
We would like the whole team to spend time and go out to the farms- to familiarise themselves with the area and related issues so that they can be more informed about our area and also for you to understand the context in which our comments are based on.		We have noted your comments, we will incorporate them in our public participation process strategy.
Which newspapers did SLR use to advertise this project in our area? The Daily Dispatch? No, it's not a local paper. Our people hardly ever read it.		
SLR must address the language issue accordingly for all potential future meetings.	Tshepo Lesholu	
If the government owns the minerals underneath our land, how do we then say yes or no to the proposed project? How is meeting consultative?		The purpose of this meeting is to share information relating to the proposed project, to allow you to share relevant information where possible and to also hear and record your comments and concerns. The decision on whether or not to grant Rhino the exploration right lies with the regulator, Petroleum Agency South Africa (PASA). Neither SLR nor interested and affected parties (IAPs) have the powers to grant the right. All IAPs are allowed to raise their comments and concerns on the project and process and to appeal the decision made by PASA if and should they so wish.
I work for an NGO in the Matatielle area and I'm also from the rural areas by the Drakensburg Mountains that you want to drill. I am of the opinion that rural people are always and forever undermined. The previous apartheid government undermined us and the ANC government is also doing the same thing. SLR and Rhino are also doing exactly the same by not taking the project/ meeting to the rural people.	Mosilo Kwali	We have noted your comments, we will incorporate them in our public participation process strategy.
The rural people have history of the area and they can always share the information, granted a chance to do so.		
We want the facts about the proposed project to be clearly outlined upfront and this includes activities such as fracking.		
We want to be involved and be given the respect we deserve by		

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
being included in all the projects in our area.		
It sounds like Rhino has only put focus on underground issues and there's nothing on the above-ground environment. You must also have specialist studies to deal with environmental and socio-economic impacts of your project.	Lumko Mbuyi	All the specialists and relevant terms of reference have been outlined in the scoping report that is currently out of public review.
What specialist studies will be carried out as part of this process?		
How accessible is your scoping report to the local people?	School girl	Copies of the scoping reports are available at the public library and an electronic copy is available on request.
I find PASA's role to be a bit confusing because they are interested in exploration activities and they also issue rights.	Joyce Loza	Your comment has been noted.
What kind of a relationship do you have the regulator?	Joyce Loza	We have a standard and expected relationship with PASA, and thus, regulator and environmental assessment practitioner relationship and nothing more.
How come we have never been consulted earlier in the process?	Joyce Loza	Your comments have been noted. Hopefully the various government departments will do something about it going forward.
How come PASA and other government departments including us have never been granted a chance to discuss this project?	Joyce Loza	
Intergovernmental relations need to be improved.		
Why have they granted you authorisation without our knowledge?	Joyce Loza	PASA has not granted Rhino any form of authorisation relating to the exploration right application. We are still in the scoping phase of the full EIA process. We will follow the process as outlined by the laws.
Why did Rhino use Gauteng environmental consultants instead of our local consultants? Did they give SLR the contract so that they can give them what they want even if it means not undertaking public participation properly?	Phillip Rawlins	SLR is a professional company that sticks to facts and addresses them objectively. SLR also has experience in oil and gas.
Please place your adverts in our local papers and radios stations so that our people can know about your project.	Sissie Mateela	We have noted your comments, we will incorporate them in our public participation process strategy.
Please prepare properly for public meetings so that you can be able to answer basic questions.		
I am a traditional leader in this area and I was not consulted as per our well-known standard traditional leader's protocol. You were supposed to have met with me to introduce yourselves and the project and my gather my opinion about the project before meeting with my people.	Chief Lebenya	
You disobeyed our protocol so please pack your bags and home. Come back when you are ready to follow our procedures.		

5

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
Objections		
We object the proposed project. Why are you even continuing with the EA process?	Harrison Gordon	Your comments have been noted. They will be captured and be submitted as part of our report to the regulator to form part of decision making process.
What kind of "No" do you people want? We do not want your project in this area.	Francoise du Toit	
Why are you destroying our country? You are young South African men who should be protecting and correcting our past mistakes as your elders instead, you want to make it worse? You should be ashamed of yourselves. We do not want this project.	IAP	
There shall be no fracking in our area.	Sakkie Maamis	
We do not want your project in our area. We will not allow you destroy our area. You are not welcome.	Phillip Rawlins	
Technical Related Issues		
How deep will the core boreholes be?	Nickey McLeod	It depends on the deepness of the sediment. The hole will be drilled until where the sediment stops, so it can be anything from a few 100m to 3km. (Phillip Steyn)
What chemicals and fluids will used?		Standard drilling fluids and/ or chemicals will be used. (Phillip Steyn)
This area is well known for tremors, in fact, we experienced one yesterday.	Charmaine	Your comment has been noted and will be addressed in our EIA and EMPR.
If this is the case, how will your drilling activities impact us/ cumulatively impacts?		
Why exactly did Rhino chose this specific area for oil and gas exploration?	Gerrie Nel	It must be noted that the government has earmarked exploration activities as a priority in fast-tracking economic development in the country. Our project is in alignment with this policy. We bought the relevant information for the government via its office by the name PASA and from the provided information, we were able to identify areas which need to be explored. (Phillip Steyn)
We have seen and heard of the results of unmanaged environmental impacts in the old Gauteng mines (Wits area). Have you used their experiences to inform your project and strategy?	Lumko Mbuyi	xxxx
We are very disappointed to learn that a representative from Rhino does not know basic information about his project (chemicals to be used).	Sissie Mateela	We are trying our best to answer as many questions as possible. Some of the details are provided in the scoping report whilst the others are still under instigation by our technical team. (Phillip Steyn)
Why and how come you don't have real answers when you knew	School girl	

6

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
very well that you were going to have a meeting with us?		
We do not appreciate that fact that Rhino is giving us vague answers to technical questions. It does not look like you have enough relevant information to share with us.	Harrison Gordon	
How will you provide mitigation measures when you have never been to site?	Simphiwe Dlamini	All relevant specialists will go out to site prior to compilation of their reports. We will use their specialist reports to inform the main report. Our specialists will advise accordingly.
Some of the species that have been recorded to be in that area are probably extinct by now, how will you rehabilitate such species?		
What happens after they found the oil and gas and they are allowed to operate?	School girl	They will have to pay royalties to the state/ government. The government will decide on how its people benefit from the royalties.
Why don't you invest money in biogas projects, which will also benefit us?	Phillip Rawlins	Your comment has been noted. Please note that biogas is currently not our area/ industry of interest. (Phillip Steyn)
Water Related Issues		
Fracking will contaminate the whole area's underground water.	Francoise du Toit	The proposed project and related process are not about fracking but about exploration activities (an investigatory exercise). It must be noted that fracking is one of a number of methods used to extract oil and gas and not the only method.
Matatiele is 1000% reliant on groundwater supply. How much research has Rhino undertaken to understand water supply dynamics in the area?	Nickey McLeod	Rhino proposes to drill a maximum of 10 core boreholes within the project area as part of the exploration activities. Safe chemicals will be utilised throughout the exploration phase (core borehole drilling activities). (Phillip Steyn)
It must be noted that some of us are located adjacent to the proposed project area, to the east in the Cedarville flats. We get our groundwater from the Drakensburg mountains like the people in the Matatiele area. In as much as we located outside the proposed project area, our groundwater will be affected like that of the people who are based in the Matatiele area.	Pier Rawlins	A groundwater study will be carried out as part of this process. The terms of reference for this study are outlined in the scoping report.
We all know that our water is from the Drakensburg Mountains and not from Kokstad. We do not want our water to be contaminated.	Gerrie Nel	
I am technically informed when it comes to drilling activities. All I can tell you is that given the altitude you will be drilling and also fracking, you will not only contaminate our water but will also be dewatering our aquifer. You activities require millions of water that will be sourced from our aquifer.	Rikus Botha	
Given the terrain of the areas you want to drill, how exactly are you planning to get the drilling trucks up those steep slopes? Have you even been near those mountains? Your information gives me		

7

Issue raised	By whom	Response (given by Matthew Hemming unless stated otherwise)
an impression that you have no idea of what you are talking about.		
If fracking has been banned in 180 countries worldwide already due to its impact on water, why do you then want to frack in our area?	Lebohlang Phakisi	
Generally, our water-boreholes depth varies between 17m and 124m and they are already drying up. We do not want to know what will happen once you start your fracking activities.	Sakkie Maamis	
Fracking is going to affect our catchments and sensitive environments.	Joyce Loza	
Your project will contaminate our water and destroy our livelihood.	Phillip Rawlins	
Socio-economic Related Issues		
Is Phillip Steyn and Rhino willing to take this risk with the lives of the local people?	Francoise du Toit	xxx
Who pays SLR? Is there any chance of being biased?	Mariette	Rhino pays SLR for services rendered to them. This is irrespective of the outcome of the exploration application (approved or rejected). SLR is a professional company that sticks to facts and addresses them objectively.
What will be the future of Matatiele and/ or benefits once you are done with your project?	Thabelo Matela	Rhino will be doing investigations on whether or not there is oil and gas in the area. As a result, there are no major benefits foreseen for this project. Temporary jobs will be created.
What will be direct benefits to our local people?	Sissie Matela	Your comments have been noted. A socio-economic study will be carried out as part of this process. The terms of reference for this study are outlined in the scoping report.
I feel that rural people are really being taken for granted. We feel disrespected and undermined by the proponents of this project. Your project will kill us, not now but in the future.	Lebohlang Phakisi	
There are no little deeds within your project area. Most of the land belongs to the government through its municipalities and the Department of Land Affairs. I know for sure that those government officials will only be concerned about job creation and nothing else.	Sakkie Maamis	
Will you be able to give the farmers and villagers water and money where required?	School girl	There will be a replacement/ compensation policy, which means Rhino, will have to ensure that they supply those lost water or suffered because of their activities. The details will be outlined in our report, the EMPr.
How many jobs will be created for our local people?	Sissie Matela	Due to the nature of this project, it is estimated that only less than 20 local people will be temporary employed in this project.

8
