RE: PUBLIC PARTICIPATION PLAN: MIDDEL POST NO. 60

The public participation process to be followed is inclusive of the following aspects:

1) All IAP's are identified according to the regulations and may include, but are not limited to:

- Adjacent land owners
- Land owners in close proximity to the proposed prospecting activities
- Organs of state
- Traditional leaders within the area
- Should any person, in terms of regulation 41(2)(e), be identified the following measures will be implemented:
 - Illiteracy - A meeting will be arranged where the project will be explained.
 - Disabled - A meeting venue will be arranged, in the case of such meeting request, which can accommodate such a person.

2) An IAP's registry will be used to keep record of the consultation process. A list of pre-identified IAP's are attached below. Once the project is advertised all other IAP's will be added to the list.

3) Identified IAP's will either be contacted via telephone, email, fax etc.

4) The following documents will be sent to the identified IAP's:

- Notice of Proposed Mining activities
- Background Information Document (BID), which includes a locality map and current site layout map.

5) A notice will be published in the local newspaper that includes the details of the proposed activities and site location. The notice will also stipulate that a public meeting will only be held upon request of the public and only if the request is made by three or more persons, will it be a contact meeting. If only one or two members of the public request a meeting the meeting will be held virtually via: Zoom, Teams etc. The notice will also indicate the date of availability of the Draft Basic Assessment (BAR) report and the platforms on which it will be made available.

6) All comments will be incorporated into the Draft BAR and submitted to the authority as a Final report.
