

**Pre-Wayleave Agreement
Assistance Form**

240-98716986
Rev 0

Project Number:

Supply to: RISINSA B9
Municipality: GREATER SIYANI

Proposed T-Off
Point:

Agreement in principle for a new Rural or Urban Power Line Extension

To be completed by the new customer after consultation with the affected neighbours.

A Wayleave Agreement is needed for permission to construct a power line over all properties affected by the power line's building restriction of 9 meters from the centre line of the power line.

In order to complete the project to supply electricity as applied for; your assistance is required in obtaining agreement in principle from the owners of the affected properties, i.e. Private owner/Headman/Municipality or Communal Properties.

As much as possible contact detail is needed to enable Eskom to contact the affected property owners for the signing of the final documentation.

A separate similar form is required for each affected property owner. If any affected property owner does not agree with the suggested line route and the alternative route is longer, Eskom needs to prepare a new quotation. Please contact your Customer Service Advisor in this regard.

Please submit this completed form and then you will receive your quote from Eskom.

Please Note that this is not an official Wayleave Agreement and does not replace the official Wayleave Agreement.
