

Ablution, Waste Water & Waste Disposal:

- ▮ Ablution facilities will consist of chemical toilets hired by a contractor and serviced regularly.
- ▮ Any effluents containing oil, grease or other industrial substances will be collected in a suitable receptacle and removed from the site, either for resale or for appropriate disposal at a recognised facility.
- ▮ Spills would be cleaned up immediately to the satisfaction of the Regional Manager by removing the spillage together with the polluted soil and by disposing of them at a recognised facility.
- ▮ Non-biodegradable refuse such as glass bottles, plastic bags, metal scrap, etc., will be stored in a container at a collecting point and collected on a regular basis and disposed of at a recognised landfill site.
- ▮ Biodegradable refuse generated will be handled as indicated above.
- ▮ No waste will be burned on site.

Final rehabilitation:

- ▮ Rehabilitation of the surface area shall entail landscaping, levelling, top dressing, land preparation, seeding (if required), and weed / alien clearing.
- ▮ All infrastructures, equipment, and other items used during the mining period will be removed from the site (section 44 of the MPRDA).
- ▮ Waste material of any description, including receptacles, scrap, rubble and tyres, will be removed entirely from the mining area and disposed of at a recognized landfill facility. It will not be permitted to be buried or burned on the site.
- ▮ Weed / Alien clearing will be done in a sporadic manner during the life of the mining activities. Species regarded as Category 1 weeds according to CARA (Conservation of Agricultural Recourses Act, 1983 – Act 43; Regulations 15 & 16 (as amended in March 2001) need to be eradicated from the site on final closure.
- ▮ Final rehabilitation shall be completed within a period specified by the Regional Manager.

Afrimat will make use of temporary infrastructure during the mining operations. Workers will be transported to and from the site daily.
