Dear Mrs van Eck

I would like to inform you that I will be away from the office for the period 29 August to 7 September 2012, inclusive. I may be a bit later than this, but it is depending on the Doctor's instructions, since I am undergoing a cornea transplant on 29 August 2012.

I hereby delegate all responsibilities to you and authorize you to act on my behalf by signing all documents and approvals within the policy of the Council for Geoscience during the above period.

Please note that it is your responsibility to ensure that you only authorize expenditure and the provision of services to clients in accordance with the regulations of the Council for Geoscience and on the provision that funds for the expenditure are available.

**RE: Research loan of fossil specimen GHG 431**

To Whom It May Concern:

I request the research loan of specimen GHG 431 to the GeoBio-Center of the Ludwig Maximilian University of Munich. This specimen consists of a partial but well-preserved fossil skull of *Prolacerta*, a Triassic reptile closely related to archosaurs. The preservation of GHG 431 will allow previously unknown and scientifically important details of the braincase and neurocranial anatomy of *Prolacerta* to be studied. Accordingly, I ask for the loan of the specimen for detailed study and to conduct, and analyse the results of, a micro-CT scan (a non-invasive method that will help to assess the internal anatomy of the skull) in Germany. The information gathered from GHG 431 will help to understand the morphological variation during the early evolutionary radiation of the lineage leading to crocodiles and birds and will enhance the scientific value of the collection at the Geological Survey in Pretoria. The study of GHG 431 will form part of a project on the anatomy, systematics and evolutionary history of Archosauriformes funded by a grant from the *Deutsche Forschungsgemeinschaft* (German Research Foundation). PhD student Martin Ezcurra will carry out the study of the specimen under my supervision, and micro-CT scanning will be conducted in Berlin. The specimen will be transported from Pretoria to Munich and returned by hand. We request the loan of the specimen for a period of 12 months.

Yours sincerely,

Dr Richard J. Butler
