Dear Ragna

Extension of Palaeontological Collecting permit (Case ID 6624; Permit ID 1989)

Following our conversation at the end of last year, I hereby wish to apply for extension of my collecting permit (Case ID 6624; Permit ID 1989). The permit is made to myself and Mike Day for the collection of palaeontological resources from the Abrahamskraal and Middleton formations of the lower Beaufort Group in the Northern Cape and Free State provinces and is valid until 30 April 2018. All fossils collected will be curated at the Evolutionary Studies Institute, at the University of the Witwatersrand.

This extension is particularly to do exploration for fossils in the Sutherland, Victoria West area of the northern Cape, and also in the Abrahamskraal and Middleton formations of the entire Free State where David Groenewald is doing fieldwork for his PhD under the supervision of myself and Mike Day.

I have submitted a progress report for 2017, so my reporting to requirements to SAHRA should be up to date.

Yours sincerely

Bruce Rubidge
