CULTURAL LANDSCAPES COMMENT ON REVISED LAYOUT FOR PROPOSED WIND GARDEN AND FRONTEER WEFs (18 March 2022)

The revised proposed layout of the turbines and access roads for the proposed Wind Garden and Fronteer WEFs near Makhanda, Eastern Cape submitted by Savannah Environmental (18 March 2022) has been considered.

1. The revised proposed layout does not adhere to the cultural landscapes buffers and recommendations as submitted in the Cultural Landscapes Assessment reports submitted June 2021. Please see attached map for CL buffers with optimised layout overlay.
2. The optimised layout does not change the findings of the original specialist report as provided.

Sincerely,

A handwritten signature in black ink, appearing to read "E. Bailey", is placed over a light grey rectangular background.
