Applicant: Great Karoo Renewable Energy (Pty) Ltd.

Proposed Activity: Establishment of three (3) Solar Photovoltaic (PV) Energy Facilities, two (2) Wind Energy Facilities and grid connection infrastructure comprising a 132kV central collector substation and a 132kV power line to enable the connection of five (5) renewable energy facilities to the national grid for the evacuation of the generated electricity. The connection point to the national grid will be the existing Eskom Gamma Substation. Infrastructure associated with each project includes:

Solar Energy Facilities

- » Solar PV array comprising PV modules and mounting structures.
- » Inverters and transformers.

- » Cabling between the panels.

- » 33/132kV onsite facility substation.

- » Cabling from the onsite substation to the collector substation (either underground or overhead).

- » Electrical and auxiliary equipment required at the collector substation that serves that solar energy facility, including switchyard/bay, control building, fences, etc.

- » Battery Energy Storage System (BESS).

- » Site offices and maintenance buildings, including workshop areas for maintenance and storage.

- » Laydown areas.

- » Access roads and internal distribution roads.

Wind Energy Facilities

- » Wind turbines.
- » Concrete turbine foundations and turbine hardstands.

- » Inverters and transformers.

- » Temporary laydown areas which will accommodate storage and assembly areas.

- » Cabling between the turbines, to be laid underground where practical.

- » A temporary concrete batching plant.

- » 33/132kV onsite facility substation.

- » Underground cabling from the onsite substation to the collector substation.

- » Electrical and auxiliary equipment required at the collector substation that serves that wind energy facility, including switchyard/bay, control building, fences, etc.

- » Battery Energy Storage System (BESS).

- » Access roads and internal distribution roads.

Grid Connection Infrastructure

- » Central collector substation which consists of:
 - * 33/132kV collector substation.

 - * Associated equipment, infrastructure, and buildings.

 - * Temporary and permanent laydown areas.

- » Distribution Line:
 - * A double-circuit 132kV distribution line to connect the central collector 132kV substation to the existing Eskom Gamma Substation will be constructed.

- » Site offices and maintenance buildings, including workshop areas for maintenance and storage.

Project Location: Approximately 35km South-West of the town of Richmond along the N1 and approximately 80km South-East of Victoria West along the R63 in the Northern Cape Province, within the Ubuntu Local Municipality, and the Pixley Ka Seme District Municipality.
