**Request for loan of SAM-PK-K10159, basal rhynchosaur skull (currently identified as *Euparkeria* on SAM catalogue)**

**Dr. Richard Butler, Junior Research Group Leader, GeoBio-Center, Ludwig Maximilian University of Munich, Richard-Wagner-Str. 10, 80333 Munich, Germany.**

**[r.butler@lrz.uni-muenchen.de](mailto:r.butler@lrz.uni-muenchen.de)**

I request loan of SAM-PK-K10159 for comparative study as part of a review of basal archosauromorphs, including early rhynchosaurs, from the Early–Middle Triassic of South Africa. The specimen will be studied in detail to determine its taxonomic and phylogenetic affinities, and whether it represents a new species. Micro-CT scanning of the specimen will be carried out at the Museum für Naturkunde in Berlin in order to examine endocranial morphology and the dentition (which is currently not visible).

The specimen will be hand-carried to Germany by my PhD student Roland Sookias. In Germany, I will be the person responsible for the specimen (I am an employee of the Bavarian state and have long-term employment until at least 2016), and the specimen will be kept boxed and padded within a locked cabinet in my office within the Palaeontology Section of the University of Munich. The specimen will be hand-carried to Berlin for micro-CT scanning, and will be hand-carried back to Cape Town by me at the end of the loan.
