PURPOSE OF THIS DOCUMENT

The purpose of this document is to provide all Interested and Affected Parties (I&APs) with information relevant to the application for environmental authorisation for the proposed construction of a modular Water Treatment Plant at the Klipspruit Colliery, owned by South32 Coal Holding SA (Pty) Ltd (CSA). This document aims to:

- Provide a summary description of the proposed Project;
- Provide an overview of the environmental regulatory processes which will be undertaken in accordance with the South African legislation; and
- Invite all I&APs to register as stakeholders, provide comment, raise issues or concerns, and provide suggestions for the enhanced benefit of the Project.

TO REGISTER AND/OR FOR MORE INFORMATION PLEASE USE THE FOLLOWING CONTACT INFORMATION:

Mrs. Nondumiso Bulunga

Email: sh@digbywells.com
Website: www.digbywells.com

BACKGROUND INFORMATION

Digby Wells Environmental (hereafter Digby Wells) has been appointed as the Independent Environmental Assessment Practitioner by CSA. CSA intends to construct a modular Water Treatment Plant (WTP) for treating mine-affected water at its Klipspruit Colliery (KPS) located near Ogies in the Mpumalanga Province.

The enviro-legal application process will include the application for Environmental Authorisation (EA) for Listed Activities triggered in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA) and associated regulations, namely the Environmental Impact Assessment (EIA) Regulations of 2014 (as amended in 2017). Concurrently an application for an Integrated Water Use Licence (IWUL) in terms of the National Water Act, 1998 (Act No. 36 of 1998) (NWA) will be undertaken as part of the enviro-legal process for the WTP.

PROJECT DESCRIPTION

CSA intend to install a modular WTP proposed to be located in the south-eastern corner within the Klipspruit Colliery operational area, to the west of the KPS Project Offices. The WTP will treat up to 10 Mega litres per day (ML/day) of excess affected mine water from its Balancing Dam (containing mine-affected water from the KPS operations). The WTP is proposed to be constructed in three phases of approximately 3.3 ML/day per phase, to make a total full capacity of 10 ML/day. Therefore, this application pertains to the full 10ML/day capacity. Water pumped from the Balancing Dam (abstraction point coordinates: 26° 3'15.15"S; 29° 1'43.35"E) and treated at the WTP will be released directly into the Saalklapspruit (discharge point coordinates: 26° 1'18.83"S; 29° 1'39.57"E) to the north of the KPS mine boundary where the Saalklapspruit flows beneath the N12 highway. Treated water will be pumped from the WTP to the Saalklapspruit discharge area via a

pipeline which will run along the eastern boundary of the mine, and will be approximately 4 km long. Treated water will comply with the Resource Water Quality Objectives which are set by the Department of Water and Sanitation (DWS), and tested before being released into the Saalklapspruit.

At KPS, the affected mine water that is being generated exceeds the re-use and storage capacity within the operations. The result of this is the risk of spillages or discharges to the natural environment. Effective management of this risk is essential to the effective performance at KPS ensuring access to coal resources and securing and maintaining the licence to operate and grow. The treatment and release of affected mine water has been deemed the most feasible option to maintain the colliery's water balance.

INFRASTRUCTURE

The key infrastructure for this application includes:

- WTP located in the south-eastern corner of the Klipspruit Colliery (total footprint area 1.06 ha);
- Temporary laydown area of 0.4 ha for tools and equipment during the construction phase;
- 1.5 km HDPE feed water pipeline and return water pipeline between the Balancing Dam and the WTP;
- 3.8 km HDPE clean water pipeline from the WTP to the discharge point into the Saalklapspruit;
- A water dissipation structure will be constructed at the discharge point into the

Saalklapspruit to ensure that discharge is done in a manner that will not significantly impact or increase the natural velocity of the stream;

- A new powerline from the existing Ring Main Unit One at the sewage plant and new transformer (22kV/525V) at the WTP site; and
- Change houses and ablution facilities (connected to the colliery's existing sewage line) at the WTP.

PROJECT LOCATION

KPS is located on various farm portions, the WTP and associated infrastructure subject to this application is specifically located on the following farms:

- Remaining Extent (RE) of Portion 4 of the Farm Oogiesfontein 4;
- Portion 63 of the Farm Oogiesfontein 4
- Portion 2 of the Farm Prinshof 2
- Portion 14 of the Farm Prinshof 2
- RE of Portion 14 of the Farm Klipfontein 3
- RE of Portion 12 of the Farm Klipfontein 3
- Phola Plant No. 830-IS on the Farm Klipfontein 3 IS

Below is a plan showing the local setting and infrastructure of the proposed Project

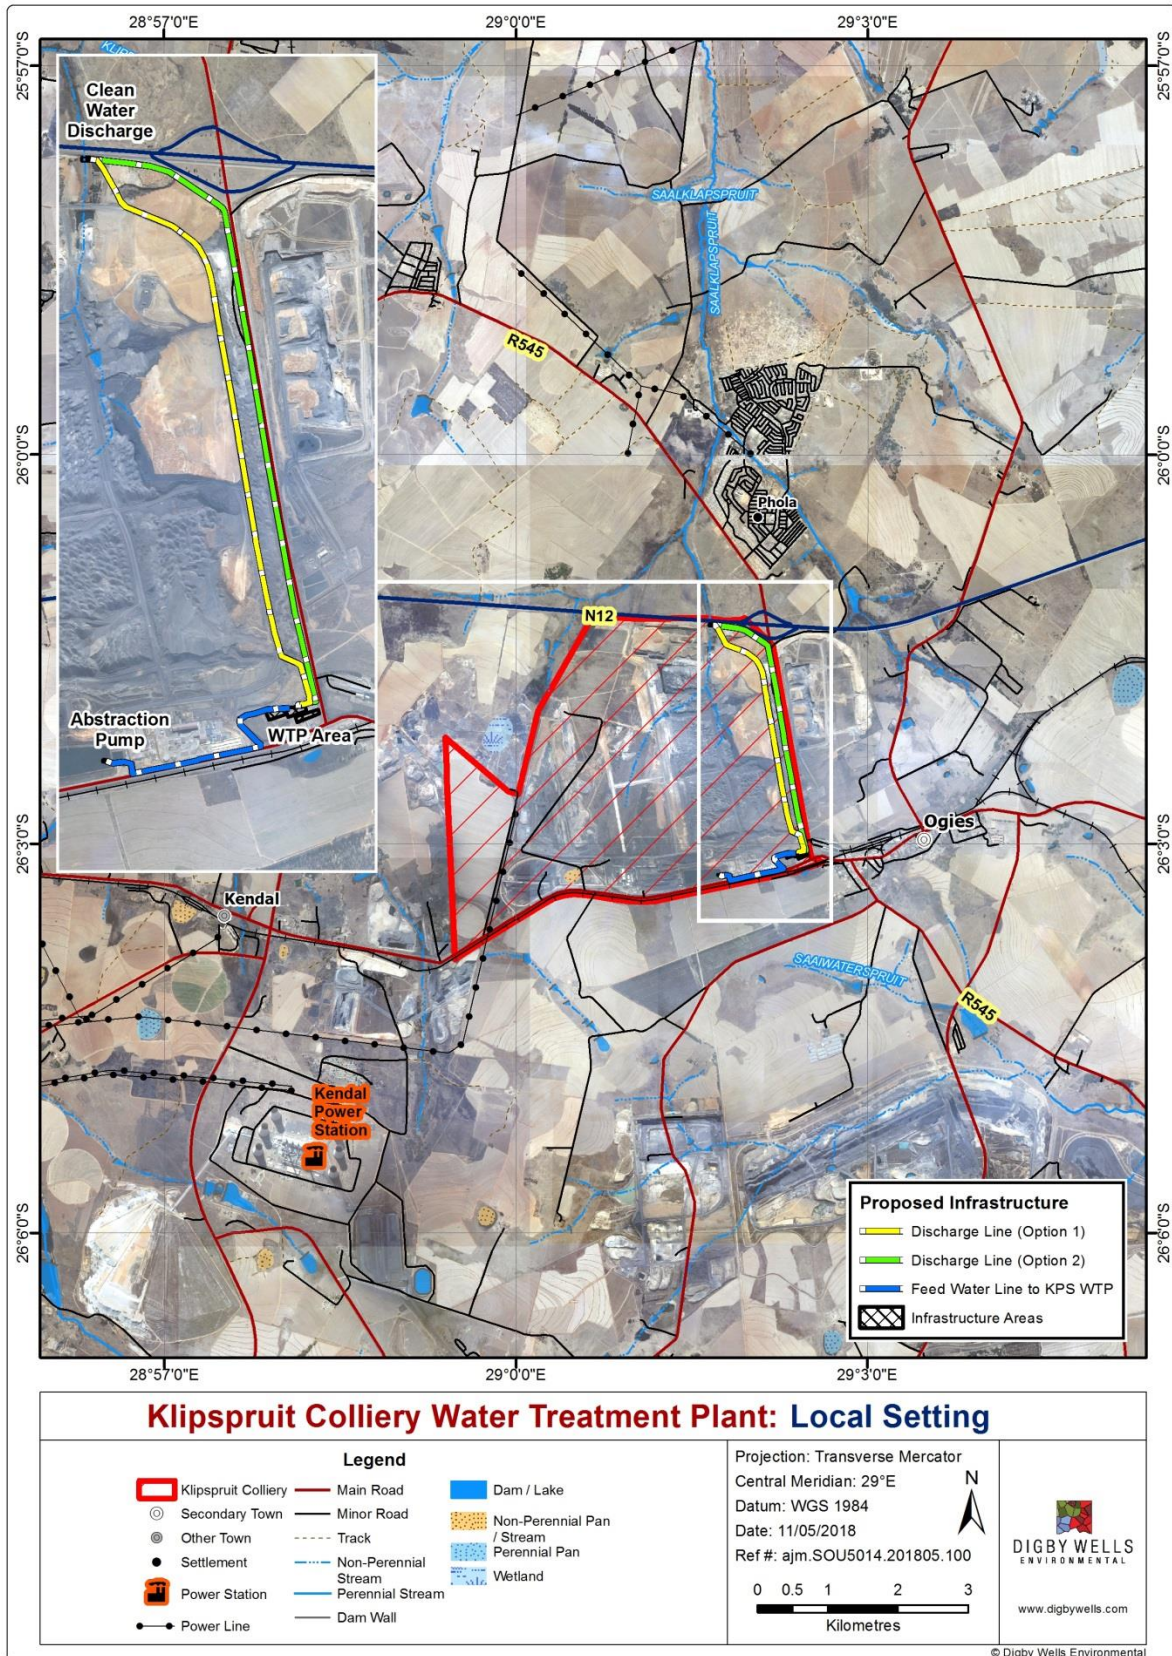

Figure 1: Local Setting and Infrastructure

ENVIRONMENTAL AUTHORISATIONS

In support of obtaining EA for the proposed Project, the triggered listed activities will require that a Scoping and EIA process be undertaken. The EIA process is under the jurisdiction of the Department of Mineral Resources (DMR), and the WUL process is under the jurisdiction of the DWS.

Specialist studies include a baseline environmental investigation which will identify all sensitivities of the site from the Specialist's perspective. This investigation will be used to inform the impact identification, impact assessment as well as inform the recommended mitigation and management measures.

In-field investigations have been conducted by the various Specialist Studies to verify the site sensitivities and concerns. The Specialist studies to be undertaken include:

- Soil, Land Use, Land Capability, and Impact Assessment;
- Fauna and Flora Impact Assessment;
- Aquatic Ecology Impact Assessment;
- Wetland Impact Assessment;
- Groundwater Impact Assessment;
- Surface Water Impact Assessment;
- Socio-Economic Impact Assessment;
- Heritage Impact Assessment;
- Visual Impact Assessment;
- Noise Impact Assessment; and
- Rehabilitation and Closure Plan including Financial Provisioning Estimate

PUBLIC PARTICIPATION PROCESS

The Public Participation Process (PPP) will be undertaken in compliance with Chapter 6 of the EIA Regulations, 2014 (as amended in 2017).

Comments raised by stakeholders will assist in informed decision-making for authorities and provides information to be considered by the project team and Specialists conducting studies.

Stakeholders affected by- or who are interested in the proposed project are invited to register as an I&AP to become involved in the PPP. Notifications to keep I&APs informed throughout the process will be done by means of letters, newspaper advertisements, site notices and telephonic communication.

Once the Competent Authority, DMR, provides a decision about the proposed Project, a letter will be distributed to stakeholders on the database. The letter will contain the Competent Authority's decision and relevant details of the appeals procedure. The process and associated timeframes is summarised in the diagram below:

AVAILABILITY OF THE DRAFT SCOPING REPORT

The Draft Scoping Report is submitted to I&APs and relevant Government Authorities for review and comment as required by the NEMA EIA Regulations, 2014 (as amended).

A Scoping Reports has been compiled which contains details of the Project description, the activities to be undertaken, and the proposed Plan of Study for the EIA Phase. The Draft Scoping Report will be available for a 30-day public comment period from **13 July to 14 August 2018** at the respective places as indicated in the table below.

REGISTRATION AND COMMENT FORM

June 2018

Registered Interested and Affected Parties (I&APs) will be informed of ongoing developments via their preferred means of communication (SMS, email, post or fax). The registration and comment period will be from **13 July to 14 August 2018**. Comments raised by stakeholders will assist in informed decision-making by authorities and provides information to be considered by the project team and specialists conducting the Environmental Impact Assessment process. Please register as an I&AP and provide comments by sending this form, or other written correspondence, to Mrs Nondumiso Bulunga at the contact details provided below on or before 16 July 2018:

Nondumiso Bulunga of Digby Wells Environmental:

Fax: (011) 069 6801, **Telephone:** (011) 789 9495, **Postal Address:** Private Bag X10046, Randburg, 2125

Environmental Impact Assessment Regulations of 2014 (as amended in 2017) promulgated in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), Section 44(1) requires that we *gather comments* from I&APs. Please complete the questions below. Should you require assistance in completing these questions please contact Nondumiso Bulunga, contact information provided above.

How do you think the project might impact (affect) you? In a positive and/or negative manner.
How can the negative impacts be managed, avoided and / or fixed AND the positive impacts enhanced?
If you are an adjacent landowner or occupier, what is your land currently being used for?

Are there any environmental, social or heritage features on the proposed project area we need to be aware of? – If so, where are these located?

Do you think the project could impact (affect) infrastructure you might have or use regularly? (e.g. houses, buildings, roads, public spaces) - If so how can these impacts (affects) be managed, avoided or fixed?

General Comments

If there are any other stakeholders we should include onto the stakeholder database for the proposed project, please provide their contact details.

DIGBY WELLS
ENVIRONMENTAL

SOUTH32 SA COAL HOLDINGS (PTY) LIMITED (SAEC) KLIPSPRUIT COLLIERY

ENVIRONMENTAL AUTHORISATION APPLICATION FOR THE PROPOSED CONSTRUCTION OF A MODULAR WATER TREATMENT PLANT, MPUMALANGA

Digby Wells Environmental (hereafter Digby Wells) has been appointed as the Independent Environmental Assessment Practitioner by South32 SA Coal Holdings (Pty) Limited (SAEC). The Environmental-Legal applications which comprise the following:

- An Environmental Authorisation Application process in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) (NEMA), and the Environmental Impact Assessment (EIA) Regulations thereunder, dated 2014 (as amended in 2017) requiring a Scoping and EIA Process; and
- A Water Use Licence Application (WULA) in terms of the National Water Act, 1998 (Act No. 36 of 1998) (NWA).

SAEC intends to install a modular Water Treatment Plant (WTP) proposed to be located in the south-eastern corner within the Klipspruit Colliery (KPS) operational area. The WTP will treat up to 10 Mega litres per day (MI/day) of excess mine affected water which will be pumped from the Balancing Dam (containing mine-affected water generated from the KPS operations). The WTP is proposed to be constructed in three phases of approximately 3.3 MI/day per phase, to make a total full capacity of 10 MI/day. Therefore this application pertains to the full 10MI/day capacity.

Treated water from the WTP will be released directly into the Saalklapspruit via a pipeline, to the north of the KPS mine boundary where the Saalklapspruit flows beneath the N12 highway. Treated mine affected water will comply with the Resource Water Quality Objectives (RWQOs) which are set by the Department of Water and Sanitation.

The Klipspruit Colliery is located on various farm portions; the WTP subject to this application is specifically located on the following farms:

- Remaining Extent (RE) of Portion 4 of the Farm Oogiesfontein 4;
- Portion 63 of the Farm Oogiesfontein 4;
- Portion 2 of the Farm Prinshof 2;
- Portion 14 of the Farm Prinshof 2;
- RE of Portion 14 of the Farm Klipfontein 3;
- RE of Portion 12 of the Farm Klipfontein 3; and
- Farm Klipfontein 3 IS.

Document for Public Review

The Draft Scoping Reports will be made available for public review for a period of 30 days from **13 July 2018** to **14 August 2018** on the Digby Wells website, Emalahleni Public Library, Phola Library and Ogies Public Library.

Registration as an Interested and Affected Party
