

SPECIALIST DECLARATION

Name of specialist: Anelia Coetzee _____

Area of expertise: Socio Economic _____

This declaration serves to confirm that I undertook a specialist assessment for the environmental authorization for the Soventix – Saldanha 1 & Saldanha 2 100MW Solar PV project, Western Cape Province.

I confirm that I am aware of the Part 1 amendment that was approved to increase the generation capacity from 75MW to 100MW with no increase in footprint nor change in scope of the project; and that the increased generation capacity is due to higher efficiency solar panels which will now be used.

I also confirm that I am aware of a Part 2 amendment application that is to be submitted to allow for battery storage on the site, as well as Gas Turbine electricity generation (and associated fuel storage) that will act as a backup to the solar PV.

I hereby declare that do not have an objection to the Part 2 amendment should *an air quality specialist confirms that the emissions caused by the gas turbine units including fuel consumption will be within limits.*

Yours faithfully,
