**RE: BUFFER ZONE AROUND GRAVE SITE - YORK TIMBERS' SABIE SITE EXPANSION PROJECT**

The Heritage Impact Assessment Report for Sabie Site Expansion Project conducted by Stephan Gaiger (G & A Heritage) **(please find report attached)**.

It is recommended in the report that the structural remains and the graveyard be avoided by the construction and that a safety zone of **50m** should be adhered to.

The graveyard will be conserved in the development, however due to the proposed realignment of road D2220 it will not be possible to implement a 50m safety zone along the grave site **(please refer to the attached layout plan)**. It is therefore requested that the 50m safety zone be relaxed in order to accommodate the realignment of the said road.

Recommendations to ensure the protection of the graveyard both during the construction and operational phases will be included in the Environmental Management Plan (EMP).

*Please do not hesitate to contact us should you need any additional information.*

Kind regards

Lizelle Gregory
