APPENDIX 7 T

Site Layout - Proposed Ventilation Shafts - Large Scale

APPENDIX 19 A

Guarantee in terms of Financial Provisioning

15 June 2021

Mr R Grobbelaar Managing Director JMA Consulting (Pty) Ltd

By email: riaan@jmaconsult.co.za

Dear Mr Grobbelaar

Sasol Mining Financial Provision 2021

The approach and methodology in determining the Sasol Mining Financial Provision are documented in the 2021 Closure Cost Estimate Report for Sasol Mining and Shondoni Colliery. The approach entails an itemised volumetric based system, based on realistic demolition and rehabilitation activities as well as obtaining contractor rates that are updated every 3 years.

The mentioned system has been employed since 2013 and has been audited annually by Price Waterhouse and Coopers (PWC) as part of the company audit. In June of each year the values are escalated to the Sasol Mining financial year end and submitted to the DMR as proof of financial provision along with the required financial documents.

For the Shondoni EMP amendment the current calculated closure financial liability and associated contingencies for Sasol Mining is sufficient to financially provide for the closure of the four (4) prospective ventilation shafts (2 up cast and 2 down cast). The Shondoni Closure Cost Estimate will however be formally updated once the ventilation shafts are constructed and the as-built volumes become available.

Regards

Jacques du Plessis
