B. DETAILS OF GRAVE OR BURIAL GROUND

8. Name(s) of place:

The general area where the five cemeteries are located is referred to by local residents simply as Tweefontein.

9. Is the grave/ burial ground that of - Victim(s) of Conflict? (Please circle as appropriate)
and/or - older than 60 years?
and/or has the grave been - found accidentally during the course of development?

10. Brief description: (refer Addendum C for the Grave Register)

All five the cemeteries under discussion here are located on the farm Tweefontein 13IS. Their individual descriptions are as follows:

- TOP 3 is located directly south of one of the mine's haul roads, and comprises a rectangular area that is enclosed with palisade fencing. A total of 74 graves are located here, some with formal inscribed headstones but most comprising oval stone dressings without headstones.
- TOP 18 is located in amongst black wattle trees and comprises two rows. A total of nine graves are located here, of which two have formal granite headstones and seven comprise stone dressings without any formal headstones. One grave appears to have been opened and only has a depression where the grave would be.
- TOP 19 is located in an agricultural field. It comprises a loose arrangement of 29 graves, some with cement headstones and the others with stone dressings. The condition of the cemetery is poor, with a number of the graves which have subsided into the soil. Evidence for burrowing animal damage was also found.
- TOP 21 comprises a rectangular area which had been enclosed with a low stone wall and palisade fencing. The cemetery is located a short distance north of the mine haul road. A total of six graves are located here, all of which have inscribed formal headstones.
- TOP 24 is located near the eastern boundary of the farm and comprises two graves. Both graves have dressings of pitched cement slabs. One of the graves still bears a cement headstone, whereas the smaller grave's cement headstone appears to have fallen down.

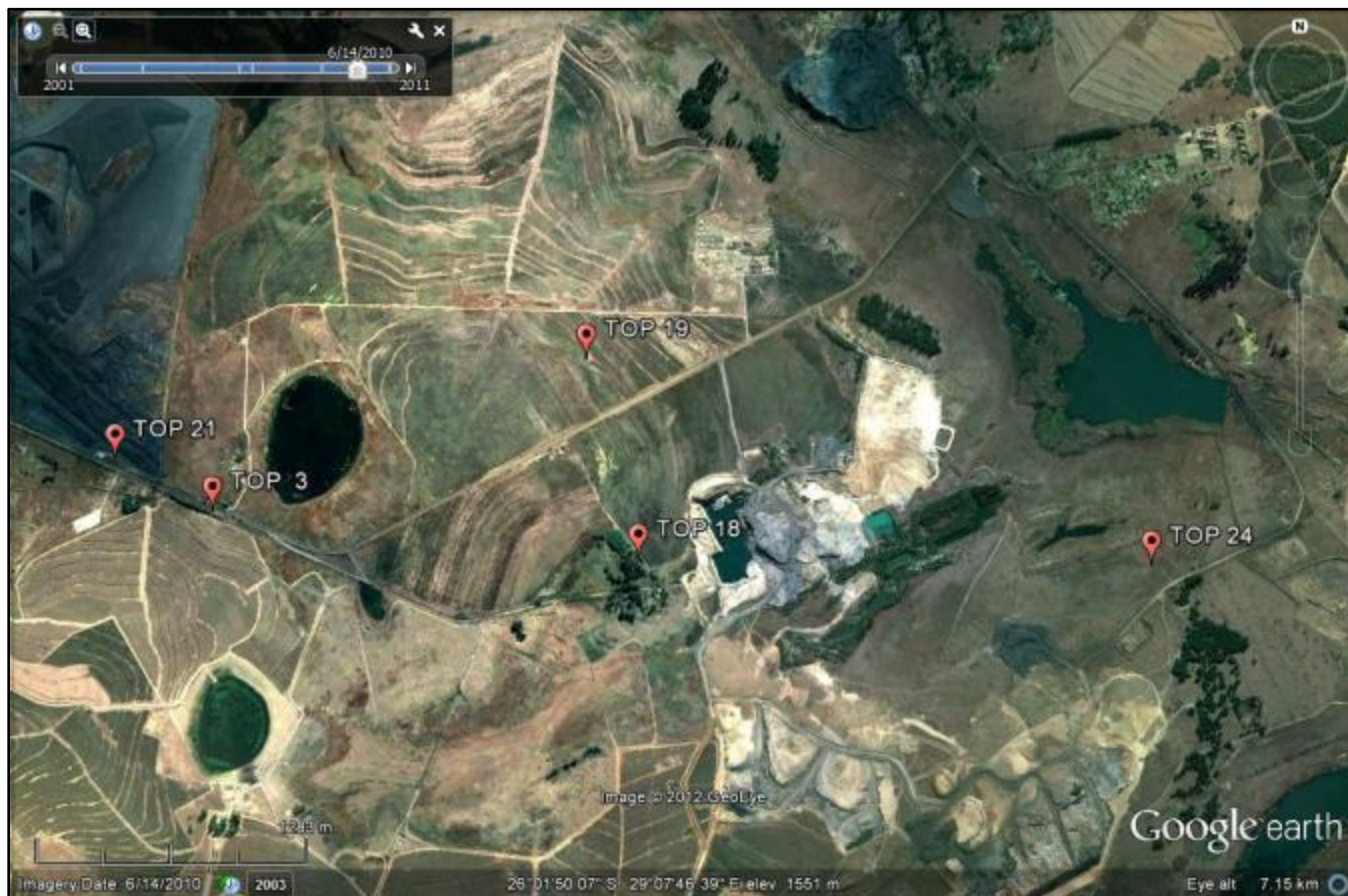

Figure 2 Google Earth image showing the position of the five cemeteries.

11. Evidence for date of grave(s):

- TOP 3

Of the identified graves, 25 are younger than 60 years whereas the families of 12 graves were not certain how old their graves are. The remaining three graves were all indicated to be older than 60 years. Of the remaining 34 graves, only one more date is known and that is from an inscribed headstone which indicates the particular person died in 1943. In summary, of the 74 graves from the cemetery 25 are certainly younger than 60 years and the remaining 49 are either certainly older than 60 years or by default presumed to be so.

- TOP 18

Two of the graves from this cemetery have formal headstones containing dates of death of 22 September 1928 and 9 May 1929. The remainder of the graves does not have dates on them. In summary, of the nine graves from this cemetery all of them are either certainly older than 60 years or by default presumed to be so.

- TOP 19

Of the identified graves one is younger than 60 years whereas the families of four graves were not certain how old their graves are. Three of the identified graves are certainly older than 60 years. Of the remaining 21 graves, only two more dates are known. The grave of Sanderson Nyilenda has an inscribed headstone containing the date of death of 30 January 1945 whereas the grave of Smuts Paulos has the date of death of February 1952. The remainder of the graves does not have dates on them. . In summary, of the 29 graves from the cemetery one is certainly younger than 60 years and the remaining 28 are either certainly older than 60 years or by default presumed to be so.

- TOP 21

All the grave dressings from the cemetery contain dates which indicates that five of the six graves from this cemetery are older than 60 years, whereas the grave younger than 60 years was buried on 26 April 1958.

- TOP 24

Both graves from this cemetery were identified but the family representative did not know the dates of death. As such both graves from this cemetery are presumed to be older than 60 years.

On Thursday, 14 June 2012 a permission letter was obtained from the Emalahleni Local Municipality (refer **Addendum D** for a copy of this letter). On Tuesday, 19 June 2012 the Station Commander of the Ogies Police Station indicated in writing that the SAPS does not have any objection to the proposed relocation (refer **Addendum E** for a copy of this document).

18. Please give details of consultation with communities and individuals who by tradition has an interest in the grave(s), and of the agreement reached with such communities and individuals (as required by Act 36 and the relevant Regulations Chps IX and XI)(provide documentation and details):

We have conducted an intensive process of social consultation in order to identify the buried individuals and to obtain permission for exhumation and re-interment from the affected families, communities and other *bona fide* interested and affected parties. This intensive process commenced on Monday, 21 November 2011 with the erection of bilingual (English and isiZulu) site notices at all the cemeteries. Refer **Addendum F** for copies of the site notices. Bilingual (isiZulu and English) newspaper notices were published in the Daily Sun (refer **Addendum G**) and Witbank News (**Addendum H**) on Friday, 17 February 2012. When no families had been identified for TOP 18 and TOP 21, an additional newspaper notice was published in the Beeld newspaper on Tuesday, 24 April 2012 (refer **Addendum I**). As a result of this notice the family for TOP 21 was eventually identified.

The intensive physical social consultation process commenced on Monday, 16 January 2012 and the methodology followed in terms of this consultative process comprised the following:

- Identification of persons who may have resided in the study area by speaking to elderly people who have lived within the surroundings of the study area all their lives.

- During conversations with these individuals leads may have been forthcoming of families or individuals who used to reside within the study area.
- Our social consultation team visited each of the leads, to ascertain whether these individuals would have graves buried within the study area. In some cases preliminary meetings could immediately take place, while in others a preliminary meeting date was scheduled.
- Once families with graves within the study area had been identified, a preliminary meeting took place to introduce PGS as well as the proposed relocation project to the families. This first meeting also aimed to establish where the graves of the particular family are located.
- Once the family representatives with whom the preliminary meeting had been held had discussed the proposed relocation with the remainder of their families, a date was scheduled on which the physical identification of the graves could be undertaken and if the family so wishes the proposed permission forms could be signed.
- On the identification date the respective family representatives were physically taken to the cemeteries where their graves were buried. The representatives then identified their graves and the respective (unique) grave numbers were recorded by the social consultation team.
- This was followed by a meeting at the mine where the proposed relocation was explained to the family again, and those families willing to sign the permission were then given the opportunity to do so.

The social consultation process will continue until the project has been completed. Refer **Addendum J** for a summary of the social consultation meetings undertaken.

As a result of this intensive process of social consultation, a total of 56 of the 120 graves (or 46.67%) at the five cemeteries were identified by affected families and written permissions provided for their relocation. While families were identified for almost every cemetery, this was not the case with TOP 18 where no families could be located. Refer **Addendum K** for the signed permission forms in terms of TOP 3, **Addendum L** for the signed permission forms in terms of TOP 19, **Addendum M** for the signed permission forms in terms of TOP 21 and **Addendum N** for the signed permission forms in terms of TOP 24.

From May 2006, certain permit applications submitted to the South African Heritage Resources Authority, SAHRA, in terms of the National Heritage Resources Act (Act No 25 of 1999) must be accompanied by payment of the appropriate fee (PTO).

Permit Applications made on **SAHRA APM Permit Form No 305** will carry the following fees:

1. Permits issued by SAHRA Archaeology, Palaeontology & Meteorite Unit (APM) Unit for burials	Fee	*Application Code
i. Application fee for burials disturbed or relocated in terms of s.36 in consequence of development;	R250 unless SAHRA directs otherwise	*AP305BUR
ii. Application fee for accidentally discovered burials disturbed or relocated in terms of s.36;	Exemption	*AP305BAE
2. Permits issued for Victims of Conflict in terms of s.36;	Exemption	*AP305EXE

Kindly ensure that you supply the Application Code (see table above*) followed by the surname of the permit applicant, in the reference section of the bank deposit slip.

For example, AP305BUR MGUNI would be entered in the reference section of the bank form for an application for restoration or relocation of a grave from an applicant with the surname Mguni.

Charges may be waived, at the discretion of SAHRA Chief Executive Officer, for certain permit applications. It should be NOTED that SAHRA may, in terms of section 3 of the SAHRA permitting regulations, require that a financial deposit be lodged with SAHRA to safeguard a heritage resource until satisfactory completion of the action for which the permit is required.

PAYMENT may be made by depositing the relevant amount into the SAHRA bank account and faxing or producing the proof of payment (i.e., stamped deposit slip, internet banking confirmation, etc.), OR through Internet Banking and emailing or faxing proof of payment, OR by cheque, on application.

PLEASE TAKE NOTE THAT APPLICATIONS NOT ACCOMPANIED BY A PAYMENT OR PROOF OF PAYMENT MAY NOT BE PROCESSED UNLESS EXEMPTED ABOVE OR BY SAHRA.

Dear Sir/Madam

INTENDED RELOCATION OF THE REMAINS OF 119 GRAVES FROM THE FARM TWEEFONTEIN 13 IS, MPUMALANGA

BACKGROUND INFORMATION

Our company has been appointed by Xstrata Coal to affect the relocation of 119 graves located in six different cemeteries on the farm Tweefontein 13-IS, Mpumalanga. The details of these cemeteries and graves are as follows:

- TOP3

The cemetery is located at S26° 03' 04.1" E29° 08' 09.7". It is situated directly south of a mine haul road and is enclosed with a palisade fence. A total of 73 graves are located here.

The next of kin of 35 graves (47.95%) have so far been found and written permissions obtained from the families for the graves to be relocated.

Of the identified graves, 22 are younger than 60 years whereas the families of 11 graves were not certain how old their graves are. The remaining two graves are just older than 60 years, with dates of death indicated to be "c. 1950" and "1951". This suggests that most of the graves from this cemetery would be younger than 60 years. Of the remaining 38 graves, only one more date is known and that is from an inscribed headstone which indicates the particular person died in 1943. In summary, of the 73 graves from the cemetery 19 are certainly younger than 60 years and the remaining 54 are either certainly older than 60 years or by default presumed to be so.

- TOP18

The cemetery is located at S26° 03' 13.8" E29° 09' 22.9". It is situated within a patch of trees and comprises 9 graves. Three of the graves from here have granite dressings, with two of them containing large granite inscribed headstones. The remaining six graves are mostly comprised of either a stone or soil heap without any formal headstones or inscriptions.

Despite an intensive social consultation process (which included site notices, newspaper notices and archival research) none of the affected families from here could be identified.

Only one grave from the cemetery contains a date with which its age could be established. The headstone indicates that the person buried in this grave passed away on 9 May 1929. The second grave from the cemetery with an inscribed headstone contains that name of the

deceased as well as the date of birth. Using this information, it was possible to locate the death certificate for this individual in the National Archives in Pretoria which indicated that the person passed away on 22 September 1928. Using the dates from both graves it would appear that the graves from this cemetery are older than 60 years.

- TOP19

The cemetery is located at S26° 02' 40.8" E29° 09' 14.9". It is situated in the middle of an old agricultural field. A total of 25 graves are located here.

After an intensive social consultation process, the next of kin of 5 graves (25%) have so far been found and written permissions obtained from them for the graves to be relocated.

Of the identified graves, one is 60 years old whereas the families of the other four graves were not certain how old their graves are. Of the remaining 20 graves, only three have inscribed headstones which provide dates of death. These dates are "1945", "1950" and "1952", and as a result two are older than 60 years. The remaining 17 unidentified graves must be presumed older than 60 years until contrary evidence is found.

- TOP21

The cemetery is located at S26° 02' 56.3" E29° 07' 54.4". It is situated almost directly north of the mine haul road and is enclosed by both a palisade fence and stone wall. A total of six graves are located here.

Despite an intensive social consultation process (which included site notices, newspaper notices and archival research) none of the affected families from here could be identified.

All the grave dressings from the cemetery contain dates with which their ages can be established. The information obtained from the six headstones indicate that five of the six graves from this cemetery are older than 60 years, whereas the grave younger than 60 years was buried on 26 April 1958.

- TOP22

The cemetery is located at S26° 02' 18.0" E29° 11' 08.1". It is situated in an agricultural field not very far from a thick patch of trees. A total of four graves are located here.

Despite an intensive social consultation process (which included site notices, newspaper notices and archival research) none of the affected families from here could be identified.

Only one grave from the cemetery contains a formal headstone with which its age can be established. The inscription on this headstone reads: "*VOOR VRYHEID EN VADERLAND JOHANNES JACOBUS BEZUIDENHOUT VAN BETHAL GEB. 25 APRIL. 1864 GSN. 12 JULI 1901 TE DOORNKRAAL*". This inscription indicates that the person was killed in the South African War (1899-1902) and died roughly 111 years ago.

- TOP24

The cemetery is located at S26° 03' 14.9" E29° 10' 51.6". It is situated near the top of a slight rise. A total of two graves are located here.

The next of kin of both graves (100%) have been found and written permissions obtained from the families for the graves to be relocated.

The family associated with the graves was not able to remember how old the graves are. As such, it is assumed that both graves are older than 60 years until such time that evidence can be found to the contrary.

LOCATION OF GRAVES

The cemeteries, which are affected by mining activities, are situated on the farm Tweefontein 13 IS (refer Annexure A) and are located in the Tweefontein Optimization Project (TOP) area at the following coordinates:

- TOP3 - S26° 03' 04.1" E29° 08' 09.7"
- TOP18 - S26° 03' 13.8" E29° 09' 22.9"
- TOP19 - S26° 02' 40.8" E29° 09' 14.9"
- TOP21 - S26° 02' 56.3" E29° 07' 54.4"
- TOP22 - S26° 02' 18.0" E29° 11' 08.1"
- TOP24 - S26° 03' 14.9" E29° 10' 51.6"

PERMITS AND PERMISSIONS

We are also in the process of applying for permits and permissions from the following institutions:

- The South African Heritage Resources Agency as required by Section 36 of Act 25 of 1999.
- The Mpumalanga Provincial Department of Health.
- The Emalahleni Local Municipality

PROJECT INFORMATION

All six the cemeteries are adversely impacted upon by the expansion of coal mining by Xstrata Coal. We have conducted an intensive process of social consultation in order to identify the buried individuals and to obtain permission for exhumation and re-interment from the affected families, communities and other *bona fide* interested and affected parties. This intensive process commenced on Monday, 21 November 2011 with the erection of bilingual (English and isiZulu) site notices at all the cemeteries. Bilingual (isiZulu and English) newspaper notices were published in the Daily Sun and Witbank News on Friday, 17 February 2012.

The intensive physical social consultation process commenced on Monday, 16 January 2012 and the methodology followed in terms of this consultative process comprised the following:

- Identification of persons who may have resided in the study area by speaking to elderly people who have lived within the surroundings of the study area all their lives.
- During conversations with these individuals leads may have been forthcoming of families or individuals who used to reside within the study area.
- Our social consultation team visited each of the leads, to ascertain whether these individuals would have graves buried within the study area. In some cases preliminary meetings could immediately take place, while in others a preliminary meeting date was scheduled.

- Once families with graves within the study area had been identified, a preliminary meeting took place to introduce PGS as well as the proposed relocation project to the families. This first meeting also aimed to establish where the graves of the particular family are located.
- Once the family representatives with whom the preliminary meeting had been held had discussed the proposed relocation with the remainder of their families, a date was scheduled on which the physical identification of the graves could be undertaken and if the family so wishes the proposed permission forms could be signed.
- On the identification date the respective family representatives were physically taken to the cemeteries where their graves were buried. The representatives then identified their graves and the respective (unique) grave numbers were recorded by the social consultation team.
- This was followed by a meeting at the mine where the proposed relocation was explained to the family again, and those families willing to sign the permission were then given the opportunity to do so.

As a result of the intensive social consultation process the following results were achieved:

- TOP3

Of the 73 graves located here, 35 graves (or 47.95%) had been positively identified by affected families and written permissions provided for their relocation.

- TOP18

Of the nine graves located here, no graves (or 0%) had been positively identified nor had any written permissions been provided for their relocation. It is believed that this is as a result of the old age of the cemetery, with two graves from here dating to the late 1920s.

- TOP19

Of the 25 graves located here, 5 graves (or 0%) had been positively identified by the affected families and written permissions provided for their relocation.

- TOP21

Of the six graves located here, no graves (or 0%) had been positively identified by the affected families and written permissions provided for their relocation. It is believed that this is as a result of the old age of the cemetery, with two graves from here dating to between 1917 and 1958.

- TOP22

Of the four graves located here, no graves (or 0%) had been positively identified by the affected families and written permissions provided for their relocation. This is likely as a result of the very old age of the cemetery, with one of the graves from here dating to 1901.

- TOP24

Of the two graves located here, two graves (or 100%) had been positively identified by the affected families and written permissions provided for their relocation.

To clarify matters we have allocated the affected graves to the following categories:

Graves older than 100 years (Section 35 of Act 25 of 1999):	None
Graves older than 60 years (Section 36 of Act 25 of 1999):	12
Graves of victims of conflict (Section 36 of Act 25 of 1999):	1
Graves of individuals of royal decent (Section 36 of Act 25 of 1999):	None
Graves younger than 60 years that are located outside a registered cemetery (Ordinance 7 of 1925, Section 36 of Act 25 of 1999, Ordinance 12 of 1980):	25
Graves identified by the next of kin but of which the date of death is presently unknown	17
Presently unknown graves/possible graves(Section 36 of Act 25 of 1999):	64
Total	119

REBURIAL OF REMAINS

According to the wishes of the families, the identified graves must be buried at the following municipal cemeteries:

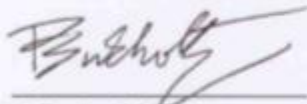

Name of Cemetery	Responsible Municipality	Number of Graves
Kromdraai Cemetery	Emalahleni Local Municipality	30
Dawn Memorial Park	Emalahleni Local Municipality	9
Kameelrivier Cemetery	J.S. Moroka Local Municipality	3

The unknown graves will be buried in the Dawn Memorial Park cemetery at Phola as well as the Kriel Municipal Cemetery.

REQUEST

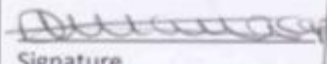

Can you please inform us if your office has any objection to the proposed relocation? If our permit applications are successful we will inform you at least one week in advance of the exhumation date. Should you have no objection to our request, please sign in the space provided for this purpose below, alternatively you are welcome to submit a letter to us in this regard.

Yours sincerely,

SUMMARY OF SOCIAL CONSULTATION

SUMMARY OF SOCIAL CONSULTATION MEETINGS HELD WITH FAMILY REPRESENTATIVES

1. First Meeting on 19 January 2012

Location: Ackerville, Witbank, Emalahleni District Municipality

Attendees: Mr Shorty Mgcina

Mr Ruben Mlangeni

Mr Joseph Mlangeni

Mr Nkosinathi Tomose

Introduction: Mr Ruben Mlangeni and Mgcina

Questions: Mr Tomose & Mr Mgcina

1. Responding to questions about graves located at Kwamafasitela/Kwamakhakhi (including the area where Cemeteries 3, 5, 19 & 21 are located) Mr Mlangeni remembered the following families:

- Modau Family
- Sibanyoni Family
- Radebe/Hadebe Family
- According to Mr Mlangeni , Mr Hadebe was Induna at the KwaMakhakhi's house. He left Tweefontein for Delmas when the white person staying on that farm (known as Makhakhi) left.
- Among the white graves that he could remember is the Minnaar family graves at Zaaiwater.

2. Second Meeting on 19 January 2012

Location: Ackerville Witbank, Emalahleni District Municipality

Attendees: Mr Shorty Mgcina

Mrs Jessica Mokoena (+/- 70 years old)

Mr Joseph Mlangeni

Mr Nkosinathi Tomose

Introduction: Mgcina

Questions: Mr Tomose & Mr Mgcina

1. Responding to questions about graves located at Pienaar's Farm because she stayed in the vicinity:

- Mrs Mokoena suggested that the Masango family had a grave at Pienaar's Farm.

- She said that Mr Cabbage Masango would know of the graves and suggested that the Masango family is now based in KwaNdebele whereas Mr Cabbage Masango lives in Germiston.
- She said that a Sindana person in Clewer would be able to provide Mr Masango's whereabouts.
- According to Mrs Mokoena, the Masango graves would include graves located just above the old mine quarry (i.e. either Cemetery 23 or Cemetery 24).
- Other families that she suggested that we should contact include the Sibekos and Nhlapos.

3. First Meeting on 27 January 2012

Location: Ackerville Witbank, Emalahleni District Municipality

Attendees: Mr Shorty Mgcina

Mr Philip Sibeko (+/- 70 years old)

Mr Nkosinathi Tomose

Introduction: Mgcina

Questions: Mr Tomose & Mr Mgcina

1. Responding to questions about Sibeko graves located in Tweefontein:

- Mr Sibeko suggested that they have 3 graves in the farm owned by Mr Pienaar.
- According to Mr Sibeko the farm was bigger than the land with Pienaar's son graves.
- His family graves include, his sister's grave and his brother children graves (x 2).

2. Responding to questions about Sibeko graves located in Tweefontein:

- Mr Sibeko suggested that the Masango family had graves in Tweefontein and that we can search for them in Clewer. We need to ask people for John Sindana and he will show us where the Masango's are based
- He also suggested that the Nhlapho family had graves in the area. He suggested that we search for the Abel Nhlapho family – Abel used to work for the Post Office in Tweefontein.
- Other families that Mr Sibeko remembered include:
 - Mampane family
 - Mbonambi family – they were located near the Masango's
 - Khoza family – Mr Khoza was indunas kwaMafasitela

Mr John Sindana (and wife) (+/- 70 years old)

Mr Moses Mtsweni

Mr Nkosinathi Tomose

Introduction: Mgcina

Questions: Mr Tomose & Mr Mgcina

1. Responding to questions about Masango family and where can we find them in Clewer:
 - Mr Sindana suggested that although he is a member of the Masango family, we need to go to Mr Puna Masango's house located in Clewer because he is the direct descendant of the Masango buried in Tweefontein.
 - According to Mr Sindana, Puna Masango is the brother of Cabbage Masango who is passed. However, Mr Sindana doubted if Puna Masango will remember the graves because he left Tweefontein at a young age to stay in Germiston.
2. Asked about other families who stayed at Tweefontein
 - Mr Sindana suggested that he could only remember the Masango and Shabangu families.
 - The last time he heard of the Shabangu family they were in KwaMhlanga but does not know of their exact location

Mr Nkosinathi Tomose

Introduction: Mgcina

Questions: Mr Mgcina & Tomose

1. Responding to questions about Vilakazi graves located in the new mine at Tweefontein:
 - Mrs Vilakazi suggested that she could not recall any Vilakazi graves because she only married into the Vilakazi family after they had already left Tweefontein.
 - She also did not recall her husband talking about the Vilakazi family graves located at Tweefontein.
 - Mrs Vilakazi remembered her husband talking of his grandfather who was based in kwa-Pienaar, Tweefontein and that he was married to naMkoena.
 - According to Mrs Vilakazi this could possibly be as a result of the fact that her husband's family left Tweefontein while he was still very young.
 - The other Vilakazi according to Mrs Vilakazi are based in Delmas and KwaMhlanga –ezabelweni (Trust Land).
 - She called the older brother of Mr Vilakazi who is currently based in KwaMhlanga to assist the process and arranged for him to come to Hlalanikahle to assist with the process of helping the Vilakazi's with their graves and PGS with the marking/identification of the Vilakazi graves.

2. Asked about other graves in the area or families:
 - Mrs Vilakazi stressed that she got married into the Vilakazi family after they had left Tweefontein and could therefore not remember any families that resided in Tweefontein other than the Vilakazi family

 - Mr Mokoena suggested that they have three graves in 'Klerplat' (Cemetery 25 in his case) in Tweefontein
 - He suggested that he is willing to relocate the graves.
 - He also suggested that he will contact his family and will be able to take PGS to the site on Wednesday, 15 February 2012 to sign for the graves.
2. Asked about other graves in the area or families:
 - Mr Mokoena suggested that we need to also contact Ratsi's wife or mother about the family graves of Mr Ratsi.
 - He also promised to think of other families that might have graves in the area – he will then update us (PGS).

23. Activities on 5 March 2012

Location: TOP Area, Emalahleni Local Municipality

Attendees: Ms Grace Mthimunye

Ms Grace Moswathupa

Mr Shorty Mgcina

Mr Vusi Khumalo

Ms Lizet Vermaak

Activity:

The two family representatives had contacted the PGS Project Team the previous day to indicate that they have come from far away to identify their graves. They were collected from Witbank and taken to the mine. With the assistance provided by Ms. Lizet Vermaak the representatives were taken to various cemetery sites but could not identify their graves at any of these. The family representatives were asked whether anyone else would be able to remember where their graves are buried. They indicated that a member of their family residing in Phola may be able to assist. Mr. Khumalo then drove to Phola and brought the member of the family back to the mine. A number of hours were spent walking through the veld in an attempt to identify the graves, though this proved unsuccessful. The family representatives were eventually also taken to all the known cemeteries on the mining property without avail. This suggests that the graves are located in a cemetery not yet recorded by the mine. However, to make matters even more problematic, the representatives indicated that their family graves were buried in unmarked graves within a cattle enclosure that is comprised of a rectangular fence.
