

*R M Putter*

Kind regards

I trust that you are in agreement with the process above.

otherwise.

Once an agreement is reached between yourselves and the Board, the matter will be tabled at a meeting of irrigators for a final decision for continuance with the project or for signature by yourselves.

If you decide to allow permission for the construction of the dam, you will supply the conditions you wish to attach to the consent. The necessary document will be drawn up. You will evaluate the advantages and disadvantages on behalf of your farming enterprise. You will evaluate the impoundment of water in this dam.

Christo Greyling has been requested to supply information used in determining the run-off in the Low's Creek, therefore the basis on which he has established that the stream can sustain the impoundment of water in this dam.

Christo Greyling will supply you with detailed maps - he has already been requested to do so.

I am taking this opportunity to confirm the process as discussed with you:

Thank you for the time afforded me to discuss the construction of the Low's Creek weir with you. I apologise once again for my "preoccupation" and thereby arriving late for the appointment.

Dear Dr Tonetti and Sylvia
