**Amafa application for the Alterations of the existing buildings
on Consolidated Erf913, Durban, at 141/143 Florida Road, Durban**

AMMENDED DRAWINGS BY DESIGNWORKSHOP

Herewith please find the revised drawings by messes Designworkshop for the above titled project.

The original drawings were presented to "Save our Berea", "the Florida Road UIP" and to the "Heritage Committee of SAIA:KZN" and their comments were relayed to the Architects.

The revised drawings have been re-presented to these organizations and both "Save our Berea" and "The Florida Road UIP" are happy with the design. The Architects are now asking for detailed drawings that is starting to get unprofessional. These are not naive, first-time applicants but award-winning ARCHITECTS who will get the details correct. This is delaying the project. Please could you consider this application on the merits of the design.

I feel that the design as shown in the second design meets the high standard of design expected in Florida Road clearly expressed as a new, modern intervention.

Yours Sincerely

FRANK REITZ
