

**TRANSNET'S NEW LEPHALALE RAILWAY YARD, AREA OF
STEENBOKPAN, LEPHALALE LOCAL MUNICIPALITY, WATERBERG
DISTRICT, LIMPOPO PROVINCE**

SCOPING PHASE: PUBLIC MEETING WITH COMMUNITY OF LESEDI, STEENBOKPAN

MINUTES OF MEETING

| | |
|---------------------|--|
| MEETING DATE | 13 February 2019 |
| VENUE | Lesedi Thukudu Thusong Centre / Lesedi Community Hall |
| TIME | 10:30 – 12:00 HRS |
| CHAIRPERSON | Marissa Botha (Naledzi Environmental Consultants Pty Ltd) |
| MEETING | Public Meeting – facilitate in English with Setswana translation as requested by community |

Content of the Minutes of Meeting:

1. Meeting Attendees
2. Discussions
3. Photographic proof of meeting

Annexure A – Attendance Register

1. MEETING ATTENDEES:

| Name & Surname | Position | Abbreviation |
|---|--|--------------|
| Naledzi Environmental Consultants (NEC) | | |
| Marissa Botha | EAP and Meeting Facilitator | MB |
| Equispectives Social Consultants | | |
| Ilse Aucamp | Social Specialist | IA |
| Transnet SOC Ltd (Transnet) | | |
| Obakeng Sebetlele | Project Manager | OS |
| Janil Bowen | Design Engineer | JB |
| Meeting Attendees | | |
| Nico Pienaar | Ward 3 Councillor for Steenbokpan, Marapong | NP |
| Ditlhoriso Ezekiel | Lesedi Ward Committee Member | DE |
| Sophia Matlou | Lesedi Ward Committee | SM |
| Mutshavi Catchlife | Lephalale Local Municipality, Spatial Planning and Land Use Management | MC |
| Ditiro Majapholoa | Chairperson of Steenbokpan Community Forum | |
| Attendees | | |
| REFER TO ANNEXURE A FOR THE SIGNED ATTENDANCE REGISTER | | |

2. DISCUSSIONS

| NO | ITEM | Presenter |
|------------|---|-----------------|
| 2.1 | Welcome and Introduction | MB (NEC) |
| 2.1.1 | Welcome by Nico Pienaar, Ward 3 Councillor responsible for Steenbokpan. | |
| 2.1.2 | Welcome and introductions by NEC and Transnet. | |
| 2.1.3 | Opening prayer by Sophia Matlou, Lesedi Ward Committee Member. | |
| 2.1.4 | It was highlighted that a Social Impact Assessment was being conducted as | |

| NO | ITEM | Presenter |
|------------|---|------------------|
| | part of the EIA Study for the project. Social Specialist Ilse Aucamp from Equispectives was introduced. | |
| 2.1.5 | Attendance register The attendance register was circulated and signed. | |
| 2.2 | Purpose of Meeting | |
| 2.2.1 | Transnet proposes to develop the Lephhalale Railway Yard next to the existing single track from Thabazimbi to Lephhalale. The project site is located 17km south east of Lesedi behind Medupi power station on the farm Geelhoutkloof. | |
| 2.2.2 | The Lephhalale Railway Yard is an existing 100 wagon yard next to the Lephhalale-Thabazimbi railway track requiring extension for it to accommodate 200 train wagons in future for the increase in load and capacity. | |
| 2.2.3 | Transnet requires Environmental Authorisation (EA) from the Department of Environmental Affairs (DEA) in terms of the National Environmental Management Act, 107 of 1998 (NEMA) and the Environmental Impact Assessment (EIA) Regulations of 2014(GNR. 326, GNR 324, GNR 325 and GNR 327 of 7 April 2018) before it commission the project. The application for EA is subject to an EIA Study and public participation process (PPP). | |
| 2.2.4 | The EIA Regulations specify that Transnet must appoint an independent environmental assessment practitioner (EAP) to conduct the EIA Study. Naledzi Environmental Consultants Pty Ltd has been appointed as the independent EAP to carry out the EIA Study. | |
| 2.2.5 | There are thus three parties involved in the project namely: <ul style="list-style-type: none"> • The applicant/developer namely Transnet; • The independent EAP namely Naledzi; and • The authorizing authority namely DEA | MB (NEC) |
| 2.2.6 | The EIA Process was described as a process of identifying, predicting and evaluating likely environmental and social risks of a development and then recommending mitigation measures to minimise such risks. EIA informs decision makers of the likely risks of a development before a decision is made. | |
| 2.2.7 | The EIA Process produces a series of environmental reports namely a Scoping Report, Environmental Impact Report and Environmental Management Programme. All documentation generated as part of the EIA Study will be submitted to DEA for decision making. | |
| 2.2.8 | MB explained that public engagement is the corner stone of the Scoping and EIA Process and is conducted through all the stages of the process up to decision making, hence the engagement at Lesedi. | |
| 2.2.9 | It is through the 1 st round of public engagement for the project that the Ward Committee Member for Lesedi requested Naledzi and Transnet to present the project to the Lesedi community. | |
| 2.2.9 | The purpose of this meeting is to: <ul style="list-style-type: none"> • inform the public of Transnet's application for environmental authorisation to development the railway yard, • to provide an understanding of the project and to give an overview of the EIA Process and PPP. • to record any comments, issues and concerns regarding the project for inclusion in environmental reporting. | |
| 2.3 | Project Description | |
| 2.3.1 | JB explained that Transnet proposes to extend the existing 100 train wagon yard to accommodate 200 wagon trains. The project would mainly comprise four new service tracks alongside the existing Thabazimbi-Lephhalale railway line. | JB (TRANSNET) |
| 2.3.2 | The main function of the yard will be to split train wagons from 200 into 100 wagon trains, conduct on track rolling stock inspections off the mainline. Minor service and maintenance of locomotives will be conducted at the Lephhalale Railway Yard such as sanding, refueling and cleaning. | |

| NO | ITEM | Presenter |
|-------------|--|------------------|
| | None of the activities are water-intensive. | |
| 2.3.3 | Transnet will also build 3 buildings alongside the railway yard namely: <ul style="list-style-type: none"> • Service and Maintenance Building or South Provisional Facility • Office and administration buildings to be known as the North Provisional Facility and Infracrew building. | |
| 2.3.4 | The yard will be built in two phases. During Phase 1, Transnet will develop a bypass line to provide an alternative route for trains whilst building the new service tracks. Phase 2 will involve building the additional arrival line tracks, the bulk of the earthworks and building the railway yard facilities. The expected duration of the construction period is 2 to 3 years. Transnet anticipates starting with construction in 2023. | |
| 2.4 | Scoping Phase Findings | |
| 2.4.1 | The land affected by the proposed project is privately owned and used for tourism and as game breeding and hunting farms. | |
| 2.4.2 | The most affected parties in this project are the private landowner and surrounding landowners. | |
| 2.4.3 | Specialised field investigations undertaken for the project to investigate the identified potential environmental and social risks of the development include: <ul style="list-style-type: none"> ▪ Visual Impact Assessment ▪ Traffic Impact Assessment ▪ Biodiversity Impact Assessment by Holistic Environmental Services ▪ Noise and Vibration Survey by dBAcoustics; ▪ Hydrogeological Impact Assessment by Naledzi Waterworks. Please note this study has already been completed; ▪ Socio-Economic Impact Assessment by Equispectives Research and Consulting Services. This study has already started; ▪ Waste Management Plan by GCS Environmental Engineering Please note a Heritage and Archaeological Impact Assessment has already been completed by Millennium Heritage Group. No cultural and/or heritage sites or graves were found within the project area. | MB (NEC) |
| 2.4.4 | Several of the specialists have already completed their investigations and presented the findings of their assessments. These findings will also be reflected in the EIR & EMPr for the EIA Study. The environmental impacts relevant to the railway yard will not affect the Lesedi community since the development is far from the community. | |
| 2.4.5 | The most significant impact expected from the project include: <ul style="list-style-type: none"> ▪ Noise and vibration impact from yard activities, hooting, shunting, idling locomotives; ▪ Impact on ecology since the development of the yard will require removal of 22 hectares of indigenous vegetation; and ▪ Traffic generated from fuel trucks delivering diesel to the yard. These impacts will however be felt on site and at a local scale, not by the community at Steenbokpan. | MB (NEC) |
| 2.4.6 | MB explained that the Lesedi Ward Committee Member requested NEC to announce the project to the Lesedi Committee since there are issues of unemployment due to unskilled labour. NEC wanted to present the project to explain the scale thereof, explain the required skills and to ensure that the project does not create undue expectations for job opportunities amongst the community members. | |
| 2.5. | Public Participation Process (PPP) | Presenter |
| 2.5.1 | MB from NEC introduced and discussed the PPP approach for the project. PPP was highlighted as a communication tool to inform I&APs of the project. | MB (NEC) |
| 2.5.2 | Two rounds of public engagement have been scheduled for the project. The 1 st round seeks to announce the project and present the Background | |

| NO | ITEM | Presenter |
|--------------|---|--|
| | <p>Information Document (BID) followed by the preparation of a Scoping Report made available for public review for 30 calendar days. The findings of the Scoping Report are presented at a public meeting to facilitate comments on the report.</p> <p>All comments received during the 1st round of engagement are recorded in an Issues and Response Report (IRR) and responses provided thereto are included in the IRR. The 2nd round will see the Environmental Impact Report and Environmental Management Programme being placed in the public domain for comment. The outcome of the assessment will also be presented at a public meeting, to be scheduled closer to the time.</p> | |
| 2.5.3 | <p>The BID was distributed in July 2018. The Lesedi Ward Committee submitted comments on the process. The Scoping Report was made available for public review and comment at the Lesedi Thusong Centre.</p> <p>The comments received on the Scoping Report and public engagements have been captured in an Issues and Response Report (IRR) which has been submitted together with the final Scoping Report to DEA for approval.</p> <p>DEA seeks public input to support their decision making.</p> | |
| 2.5.4 | Comments from stakeholders are essential to assist the DEA in making an informed decision on the project. | |
| 2.5.5 | MB explained that NEC will record all the issues raised at the public meeting relevant to the EIA Process and incorporate such into the IRR which is ultimately submitted to DEA for decision making. | |
| 2.5.6 | Attendees are given the opportunity to ask questions to gain clarity and to comment on the project. | |
| 2.6 | DISCUSSION SESSION | Response |
| 2.6.1 | Isaac Lewatle | OS (TRANSNET) |
| | Transnet have been here before. Transnet advertised job opportunities in the past month. | Transnet has advertised job opportunities but for skilled labour. |
| 2.6.2 | Ditiro Majapholoa (Chairperson of Steenbokpan Community Forum) | NEC / TRANSNET |
| 2.6.2.1 | <p>We are glad that Transnet is here at Lesedi. But why has Transnet sent a Project Manager and an Engineer?</p> <p>We thought Transnet was going to send their CEO to address the community.</p> <p>It is tough for the community because the people want work which they do not have and they are hungry. Now Transnet is saying that there is only the prospect for work in 2023?</p> | <p>MB (NEC) Naledzi is here today to announce the EIA Study being undertaken for the proposed Lephalale Railway Yard. The team present represents the Transnet Project Manager overseeing the EIA Study and Engineer responsible for the design of the railway yard. These representatives from Transnet are able to respond to issues related to the project.</p> <p>OS (TRANSNET) The project is still in its planning phase. Transnet first needs to carry out an EIA Study for the project. It will take up to a year to complete the study. Only after DEA issues an EA may Transnet proceed to finalise project planning and commission the project. It will therefore still take 3 to 4 years before the project is commissioned.</p> |
| 2.6.2.2 | I am glad a representative from the Lephalale Local Municipality is present. We are angry with Transnet | OS (TRANSNET) The purpose of the meeting is to |

| NO | ITEM | Presenter |
|---------|--|--|
| | because it has changed the venue for job interviews and medical assessments and these must now take place at the municipality. We as the Lesedi community do not feel safe to go to the municipality. | announce the Lephallale Railway Yard project. This is the first time Transnet has proposed a project in this area. We are not aware of any job opportunities recently advertised in the area by Transnet or scheduled interviews. |
| 2.6.2.3 | <p>Before and when Medupi was built the Lesedi community was told that they will not be impacted by the power station, yet the people in the community get TB, lung diseases and cancer.</p> <p>Don't come and tell us as a community the development will not impact us. We have been lied to before. There is a history of impacts on the Lesedi community that has not been recognized.</p> <p>The Lephallale Local Municipality does not recognize the Lesedi community.</p> | <p>MB (NEC) A coal fired power station and a railway yard, such as the Lephallale Railway Yard do not have the same environmental impacts. The Lephallale Railway Yard will have site and localized environmental impacts which are distant from Lesedi. The impacts being referred to include clearing of indigenous vegetation, visual impact, traffic and noise. These impacts will not be felt by the community since you are located approximately 17km away from the site. The impacts from the project will be felt by the directly affected landowner and adjacent landowners.</p> <p>Medupi power station is a coal fired power station which is a source of Sulphur dioxide, Nitrogen oxide and Particulate Matter (fly ash/smoke) air pollution. These fumes are emitted into the atmosphere through tall stacks. Wind transports the pollutants making the pollution disperse over a large areas. The air pollution caused by the power stations can contribute to health problems that include lung diseases. The three mentioned primary pollutants are controlled by the Minimum Emission Standards published in terms of the National Environmental Management Air Quality Act. In summary the impact from the power station is felt over a greater distance from the source. The environmental impacts resulting from the two developments are thus entirely different. One needs to compare 'apples to apples' not 'apples to oranges'.</p> <p>Naledzi is advising the community from a scientific point of view that the specialist investigations recently completed for the project found that most impacts would be site specific or localized. No environmental impacts are anticipated to extend beyond a 3km radius from the site.</p> |
| 2.6.3 | Ditiro Majapholola (Chairperson of Steenbokpan Community Forum) | NEC / TRANSNET |
| | We are happy that Transnet has come to address the | MB (NEC) |

| NO | ITEM | Presenter |
|---------|---|--|
| | Lesedi community. We as a community stopped the railway line project. Transnet did entry medicals on the people that they employed, but no exit medicals were done. | <p>The rail project being developed currently is a 36km rail link by Resgen South Africa. The rail link will connect the existing Thabazimbi-Lephalale single track with Resgen's new operations at Kruishout farm, a new coal mining operation. The rail link is not developed by Transnet but by the mining house.</p> <p>OS (Transnet) The Lephalale Railway Yard project is the first project being proposed by Transnet in the area in years, excluding the existing rail yard.</p> |
| 2.6.4 | Sophia Matlou, Lesedi Ward Committee | |
| | We as a community must not focus on the past experiences with Transnet but focus on the new project they have come to announce to us. | |
| 2.6.5 | Ditiro Majapholoa (Chairperson of Steenbokpan Community Forum) | NEC / TRANSNET |
| | <p>We do not have a secondary school in Steenbokpan. The children have to travel too far by bus to commute to school so they don't persevere. 80% of the youth at Lesedi don't have matric.</p> <p>We want skills development in Lesedi community.</p> | <p>MB (NEC) This issue has been raised before by a Lesedi Ward Committee Member. Transnet's response to the issue was that it has a Social Corporate Investment Unit (CSD); Transnet Foundation has an education portfolio for the upliftment and Empowerment through Education. Other portfolios include health, sport, grants, employee volunteer programme information and socio-infrastructure development. Transnet Foundation has objectives set in terms of delivering sustainable developmental projects through the efficient use of resources, and makes an effort to reach communities as far as it can.</p> <p>OS (TRANSNET) In relation to the Lephalale Railway Yard project, Transnet can at this point only provide local employment once the project is commissioned.</p> |
| 2.6.6 | Gift Maja | |
| | I think it is evident from the issues raised at the meeting that Naledzi and the Transnet team are caught in a discussion/issue of the community which is not theirs to resolve. We were under the impression this meeting arranged for Transnet deals with the recent promise for job opportunities from Transnet. It is evident that it is not related to this meeting. | |
| 2.6.7 | Petrus Ngobeni | |
| 2.6.7.1 | Are you the relevant people from Transnet to address our issue of submitting CV's for recently advertised job opportunities by Transnet? People came to the community on 31 January 2019 to talk about a project. | <p>OS (TRANSNET) We are not the relevant people to address the issue.</p> |
| 2.6.7.2 | What is the difference between the Transnet team present at the meeting and the Transnet team who addressed the community the last time? | The Transnet project team available at the meeting does not form part of the Transnet team who previously addressed the community. This is a |

| NO | ITEM | Presenter |
|---------------|---|---|
| | | separate project. |
| 2.6.8 | MB (NEC) | |
| | <p>It is evident that the Lesedi community has been consulted several times over the past few years or months regarding numerous EIA Studies for projects to be commissioned in the area. This has caused great confusion amongst the community. It is evident that the community has been congested with too many public participation processes from too many projects.</p> <p>It is important to note that for this meeting Transnet is proposing to develop the Lephhalale Railway Yard. This is the first project Transnet has proposed in the area, thus a new proposal and is therefore not related to any of the previous engagement teams.</p> | |
| 2.6.9 | Isaac Lewatle | JB (TRANSNET) |
| | <p>Can the Transnet team please communicate with its Human Resource division and determine what is happening and who addressed the community last time?</p> | <p>We will clarify the issue internally and provide feedback directly to Councillor Nico Pienaar. Councillor Pienaar would in turn need to communicate the feedback to the Lesedi community.</p> <p>Post meeting note: Transnet is currently executing projects in various stages (planning, design and construction) in the Waterberg region. Some of the projects are in construction and Transnet (Principal Project Manager) has engaged with the Lephhalale Municipality and also had meetings with the Mayor and LED (MMC) .</p> |
| 2.6.10 | JB (TRANSNET) | |
| | <p>Transnet can confirm that construction for the Lephhalale Railway Yard is anticipated to start in 2023. The project will require bulk earthworks and laying of railway tracks including construction of three buildings. The development of the infrastructure will require unskilled labour, specialists in welding, plumbing etc. Transnet will communicate its skills requirements closer to the commissioning of the project. At this point in time the project is still in its planning phase.</p> <p>Communities will benefit from potential local employment based on the supplier development targets. Job opportunities will be available for unskilled labour and will be sourced locally as far as possible by following the Transnet Supplier Development Targets.</p> | |
| 2.7 | Closure | Presenter |
| 2.7.1 | MC from Lephhalale Local Municipality Spatial Planning and Land Use Management addressed the Lesedi Community. | MC (LLM) |
| 2.7.2 | MB thanked attendees for their comments, indicated the way forward and closed the meeting. | MB (NEC) |

Refer to photographic proof overleaf.
