# APPENDIX C8 COMMENTS & RESPONSES REPORT

# PROPOSED DEVELOPMENT OF THE VREDE SOLAR PV FACILITY, PIXLEY KA SEME DISTRICT MUNICIPALITY, NORTHERN CAPE PROVINCE (DFFE Ref. No.: 14/12/16/3/3/2/2274)

#### **COMMENTS AND RESPONSES REPORT**

#### **TABLE OF CONTENTS**

		PAG
1.	1. COMMENTS RECEIVED ON THE SCOPING REPORT	1
	1.1. Organs of State	1
	1.2. Key Stakeholders and Interested & Affected Parties	35
	2. COMMENTS RECEIVED DURING THE COMMENCEMENT OF THE SCOPING PHASE OF THE EIA PROCESS	
	2.1. Organs of State	38
	2.2. Kev Stakeholders and Interested & Affected Parties	

The Scoping phase of the Environmental Impact Assessment (EIA) Process for the Vrede Solar Photovoltaic (PV) project located near Phillipstown and Petrusville, Northern Cape Province was announced on Thursday, 30 June 2022. The Background Information Document, which included the information on the cluster of 21 solar PV facilities, was distributed together with a notification letter which served to invite Interested and Affected Parties (I&APs) to register their interest in the project and to submit any comments / queries that they might have on any of the proposed developments. All written comments received during the Scoping Phase of the EIA process to date have been included in the table below and in **Appendix C6** of the Scoping Report.

The Scoping Report was made available for a 30-day review and comment period from **Friday**, **13 January 2023** until **Monday**, **13 February 2023**, and the 30-day review and comment period for the Environmental Impact Assessment Report is being made available from **Friday**, **29 May 2023** until **Thursday**, **29 June 2023**. The Comments and Responses Report (C&RR) has been updated with comments received during the Scoping Report's review and comment period and included in **Appendix C6** of the final Scoping Report.

The Environmental Impact Assessment (EIA) Report is being made available for a 30-day review and comment period from **Friday**, **29 May 2023** until **Thursday**, **29 June 2023**. All written comments received during the 30-day review and comment period of the EIA Report will be included in **Appendix C6** and captured in this Comments and Responses Report (C&RR) which will be submitted to the DFFE with the final EIA Report for decision-making.

The C&RR is included as a separate document to the final Scoping Report as Appendix C8.

#### NOTE:

All comments captured in the C&RR are verbatim and have not been summarised.

#### NOTE:

In terms of Regulation 44(1) of the EIA Regulations 2014, as amended, please note that the comments raised, and responses provided at the various virtual and in-person Meetings held during the 30-day review period of the EIA Report will be attached as **Appendix C7** of the final EIA Report.

## 1. COMMENTS RECEIVED ON THE SCOPING REPORT

# 1.1. Organs of State

No.	Comment	Raised by	Response
1.	1. Herewith to respond to your request sent to the Department of	Lt CI Francois P Strydom	The SANDF has been identified as a key stakeholder to be
	Defence (DOD) for clearance.	Command and Management	part of the EIA and public participation process and to
		Information Systems Division	ensure that the proposed development will not have an
	2. Please note that this office can not respond to your request as	Directorate CMIS Static	impact on their infrastructure in the study area and therefore
	there is a Formal and Standard process for Applications in the	Systems	the notifications sent to the SANDF, at this stage, is not an
	DOD	Radion Spectrum &	"Application" process, but an information sharing process.
		Communication Site	
	3. The correct Application Process:	Management	The Formal and Standard process provided will be followed
	a. Send your request to the following e-mail addresses only.	SANDF	for the public participation process of this application.
	i. clogfac@gmail.com		
	ii. dfacmiem@gmail.com	E-mail: 07 February 2023	
	b. Formulate a comprehensive request, with the Project Plan and		
	formal letter with details of the Project. (Not a n e-mail Message		
	with the criteria) It must be on a formal company letterhead,		
	please.		
	c. Include KMZ / KML file for use in Google Earth.		
	4. Once received by the environments in Par 3, the DOD will		
	request all DOD Stakeholders to respond in writing (Telecoms,		
	Aviation, Environmental, Facilities etc).		
	5. Once the stakeholders has responded, a single response will be		
	sent to the Applicant with Objection / No -objection.		
	6. Stakeholders may not correspond directly to the Applicant.		
2.	This letter serves to inform you that the following information must	Olivia Letlalo	
	be included to the final SR:	Case Officer	
		DFFE	

No.	Col	mment	Raised by	Response
	Apı	plication form		
	•	Please note that the Minister is the CA for applications for the development of facilities or infrastructure which relates to the Integrated Resource Plan (IRP) 2010 2030 and any updates thereto, for technologies in which the Applicant will bid the project in the Department of Minerals Resources and Energy (DMRE) IPP bidding rounds. It is noted that page 8 of 34 of the application form mentioned that "it is the developer's intention to bid the Tafelkop Solar PV Facility under the Department of Mineral Resources and Energy's (DMRE's) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme, or similar renewable energy programme organized by public or private commercial & industrial customers through tenders or bilateral consultations, with the aim of evacuating the generated power into the national grid". Therefore, you are advised to be clear on whether this project will bid as part of the DMRE IPP bidding rounds or not.	Letter: 09 February 2023	The Final Scoping Report has been updated to clarify that it is the developer's intention to bid the Tafelkop Solar PV Facility in terms of a regulated power purchase procurement process (e.g., the Department of Mineral Resources and Energy's (DMRE's) Renewable Energy Independent Power Producer Procurement (REIPPP) Programme) to evacuate the generated power into the national grid.
	•	In addition, please ensure that the need and desirability of the proposed development are aligned to the abovementioned plan.		This has been included in Chapter 6 of the Scoping Report (refer specifically to Section 6.4).
	Spe	ecific comments		The project details provided in the report and the
	•	It has been noted that the assessment is focusing on the whole Hydra B development, however the projects have been submitted separately. You are advised to ensure that each report adequately address relevant issues of concern considering the environmental sensitivity on each site (in this case Vrede Solar PV Facility), the activities that will take place and provide relevant mitigation measures in the ElAr.		issues/impacts identified are specific to the Tafelkop PV project. A project-specific sensitivity map has been compiled and included in the final Scoping Report (refer to Chapter 10).
	•	It has been noted that the draft SR numbering is inconsistent, for instance after page vi is page 7. Please ensure that page numbering in the final SR is correct.		Numbering throughout the FSR has been rectified and made consistent.

No.	Comment	Raised by	Response
	Screening report		Title of the screening report has been rectified to Vrede Solar
	The project title given in the screening report dated 18 March 2023 refers to Vrede 1 and 2 solar facilities and this is not consistent to the project title given in the application form and scoping report as well as specialist studies. Please make		PV facility accordingly.
	sure that the corrected project title is used in the amended application form and final SR.		
	It has been noted that the screening report for the abovementioned application has been included in the draft SR, however, there is no compiler signature on the aforesaid report. Therefore, you are advised to sign the abovementioned report to be submitted with the final SR.		The DFFE Screening Report included within the Final Scoping Report has been signed with the Compiler's signature as requested.
	Project Description and Listed Activities		The property on which the project is proposed is clearly
	It has been noted in Section 5 of the application form, on page 8 of 34, that "The exact location of the development area within the project site for the Vrede Solar PV Facility is not defined at this stage of the process." Therefore, you are advised to ensure that the project description and the exact location is well defined and clear on what is being proposed in the final SR.		defined within the application form and the Scoping Report. The specific location of the development footprint within the property will be provided by the applicant in the EIA phase of the process.
	It has been noted that the exclusions on the triggered listed activities applied for are not included. Therefore, you are advised to include in the amended application form as well as final SR all the relevant exclusions related to the listed activities applied for. For instance, activity 11 of Listing Notice (LN) 1 have been applied for, however the exclusions have not been quoted in the application form.		The listed activities applied for have been updated within the application form and the Scoping Report to include the relevant exclusions as listed in the Listing Notices of the EIA Regulations.
	It has been noted that the words "may, likely and could" have been used in the description of activities 12, 19, 24 and 56 of Listing Notice (LN) 1, and activities 18 of LN 3. Please refrain from using such word/s, since it creates an uncertainty regarding the applicability of the listed activity applied for, for		The wording for the highlighted listed activities have been rectified accordingly within the final Scoping Report and a revised application form has been submitted with the final report.

No.	Comment	Raised by	Response
	the proposed development. In addition, please note that the Project Description and Listed Activities are not based on a precautionary approach.		
	<ul> <li>Activity 15 of LN 2 and 12 of LN 3 for the clearance of an area more than 20ha and 300 square metres, (respectively) of indigenous vegetation are applied for without specifying the total amount of vegetation to be cleared. You are advised to include this information in the amended application form and final SR.</li> </ul>		The expected amount of vegetation to be cleared will be dependent on the proposed facility design, which will be provided in the EIA Phase. Expected amounts have been inserted as requested but may be updated during the EIA Phase following the detailed assessments.
	Under activity 56 of LN 1 and 4 of LN 3, the CA acknowledged that the access roads to be widened or upgraded have been provided. However, the length of the aforesaid access roads has not been included in the application form and draft SR to determine the applicability of the abovementioned activity. You are advised to include the relevant details to determine if the said activity is triggered by the proposed development or not.		The length of said access road will be dependent on the proposed facility design, which will be provided in the EIA Phase.
	It has been noted that activities 4,10, 12, 14, and 18 of LN 3 have been applied for. Critical Biodiversity Areas (CBAs) has been indicated as the area to be affected by for the proposed development and the description of the portion of the proposed project to which the applicable listed activity relates indicated as Ecological Support Areas (ESA). However, the listed activities under Listing Notice 3 does not include ESA in order for the development to trigger a listed activity. Therefore, you are requested to explain and provide evidence why the above-mentioned listed activities are triggered for the proposed development. In addition, the description of the proposed project must make reference to the systematic biodiversity plans adopted by the CA or in bioregional plans and proof of such must be obtained from		As detailed in the Scoping Report, CBA and ESA areas are present within the study area. The extent of impact on these areas by the project (if any) will be dependent on the proposed facility design, which will be provided in the EIA Phase. Should these areas be impacted, the relevant CA will be consulted to confirm the status of the relevant systematic biodiversity plans and/or bioregional plans. This evidence and confirmation will be included in the EIA Report for the project.

No.	Comment	Raised by	Response
	the relevant CA and be part of the amended application		
	form and final SR.		
	Please ensure that all relevant listed activities are applied for,		All relevant listed activities have been applied for , and have
	are specific and can be linked to the development activity or		been refined with relevant exact descriptions as required.
	infrastructure as described in the project description. In		Where no exact amount/quantity is available at this stage in
	addition, the onus is on the applicant and the Environmental		the process, the applicant will provide said information
	Assessment Practitioner (EAP) to ensure that all the applicable		within the EIA phase.
	listed activities are included in the application and the final		
	SR. Failure to do so may result in unnecessary delays in the		
	processing of the application.		
	If the activities applied for in the application form differ from		An amended application form has been submitted together
	those mentioned in the draft SR, an amended application		with the Final Scoping Report.
	form must be submitted with the final SR. Please note that the		
	Department's application form template has been amended		
	and can be downloaded from the following link		
	https://www.environment.gov.za/documents/forms.		
	<u>Alternatives</u>		The final Scoping Report has been updated to reflect that a
	It has been indicated on page 24 of the draft SR that "the		BESS will form part of the project.
	project could include Battery Energy Storage System (BESS).		
	The BESS capacity will depend on technology to be used and		
	total installed capacity of solar, and it is expected to be up to		
	1MWh per MW of solar PV facility". Please be informed that		
	the above statement shows uncertainty regarding the BESS		
	been part of the proposed development, therefore, it is		
	expected that this be clarified in the amended application		
	form and the final SR.		
	It has been noted on page 27 of the draft SR that three BESS		As detailed in the report, a number of technology
	technologies will be considered for the proposed		alternatives are being investigated for the BESS. The detailed
	development. You are advised to indicate if the		information on the BESS technologies and the preferred
	abovementioned technologies would or not trigger any listed		option/s will be provided in the EIA phase by the applicant
	activity and ensure the impacts that might be generated by		once these have been assessed from a technical
	the technologies are adequately assessed in the final report.		perspective.

No.	Comment	Raised by	Response
	You are further required to provide details of the all the alternatives considered for this development and indicate the preferred alternatives as per Appendix 2 (2) (1) (g) (i) (v) (vi) of the NEMA EIA Regulations, 2014, as amended in the final report.		Detailed of all alternatives identified for the project are provided in Chapter 3 of the Scoping Report.
	<ul> <li>Alternatively, you should submit written proof of an investigation and motivation if no reasonable or feasible alternatives exist in terms of Appendix 2.</li> </ul>		Where no reasonable or feasible alternatives exist a motivation in this regard has been included in Chapter 3 of the Scoping Report.
	<ul> <li>Cumulative Impact</li> <li>It has been noted on page iii and 1 of the draft SR that the proposed project is one (1) of 9 projects (in-process application submitted) in batch 1, summing up all 3 batches into a total of 21 projects. Further to this there are other similar projects or renewable projects within a 30km radius of the proposed development site, therefore, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</li> <li>➤ Assess the cumulative impacts of the proposed (not yet authorised), authorised (not yet constructed) and existing solar energy facilities.</li> </ul>		The purpose of the Scoping phase of the process is to identify and evaluate issues associated with the project. Potential cumulative impacts have been identified within the Scoping Report (refer to Section 9.5). This includes an indication of the proposed projects within a 30km radius of the site. These impacts will be assessed within the EIA phase of the process based on the specialist's relevant findings. Distinction will be made between proposed (not yet authorised), authorised (not yet constructed) and existing solar energy facilities as required.
	<ul> <li>Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.</li> <li>The cumulative impacts significance rating must also</li> </ul>		The required process flow and proof will be provided within the cumulative assessment to be undertaken in the EIA phase.  The cumulative impacts significance rating to be defined in
	inform the need and desirability of the proposed development.		the EIA Phase will also inform the need and desirability of the proposed development.
	A cumulative impact environmental statement on whether the proposed development must proceed.		A cumulative impact environmental statement on whether the proposed development must proceed will be included

No.	Comment	Raised by	Response
			within the EIA report based on the findings of the specialist
			studies to be undertaken.
	Specialist Assessments		A Site sensitivity Verification report was included within the
	According to the screening report, the aquatic and terrestrial		DSR and again with the FSR (refer to Appendix K). In addition,
	biodiversity themes are very high, palaeontology theme has		details of studies undertaken in the scoping phase and those
	high sensitivities while animal and RFI have medium sensitivity		to be undertaken in the EIA Phase are detailed in Table 7.6
	as well as low sensitivities on avian, civil aviation, defense, and		of the Scoping Report.
	plant species themes. Therefore, you are advised to submit a		
	site verification report and motivation for the exclusions of any		
	specialist studies identified by the screening tool.		
	The specialists' reports submitted makes reference to Hydra B,		Specialist reports make reference to the specific project
	which is the umbrella body of the entire development, this		under consideration. Specific assessments and detailed
	helps in giving the full scope of what is proposed and		maps for the project site will be included in the EIA Reports.
	associated developments. However, for ease of reference		
	you are advised to make sure that the specialist reports		
	(specifically the findings and conclusion of each		
	development) and maps provided in the reports clearly name		
	and highlight the individual projects.		
	The terrestrial ecology scoping report states on page 18 that		Relevant information pertaining to the ESAs functioning and
	"Ecological Support Areas (ESAs) are not essential for meeting		suitability for the project will be further clarified by the
	biodiversity targets but play an important role in supporting		specialists within the EIA phase following detailed fieldwork
	the ecological functioning of Critical Biodiversity Areas and/or		and assessment of impacts related to the proposed
	in delivering ecosystem services". As such you are expected		development layout to be provided by the applicant.
	to elaborate on why the ESA is deemed suitable for this		
	project, since ESAs play an important role in supporting the		
	ecological functioning of the CBAs. In addition, please		
	explain why ESAs are not important for meeting biodiversity		
	targets whereas ESAs play an important role in supporting the		
	ecological functioning of Critical Biodiversity Areas.		
	• It is also noted on figure 5.4 on page 20 of the terrestrial		As detailed in the Plan of Study included in the Scoping
	ecology scoping report that the whole site falls within the		Report (Chapter 11), an Avifauna Impact Assessment will be
	Platberg-Karoo Conservancy Important Bird Areas (IBA) and		undertaken for the project. This will be informed by 2

No.	Comment	Raised by	Response
	on page 19 of the terrestrial ecology scoping report, it is stated		monitoring surveys of the project site in accordance with the
	that "this IBA is important because it contributes significantly		requirements of the BirdLife South Africa Best Practice
	to the conservation of large terrestrial birds as well as raptors.		Guidelines for Solar Developments.
	These birds include Blue Crane (Anthropoides paradiseus),		
	Ludwig's Bustard (Neotis Iudwigii), Kori Bustard (Ardeotis kori),		
	Blue Korhaan (Eupodotis caerulescens), Black Stork (Ciconia		
	nigra), Secretarybird (Sagittarius serpentarius), Martial Eagle		
	(Polemaetus bellicosus), Verreaux's Eagle (Aquila verreauxii)		
	and Tawny Eagle (A. rapax) (Birdlife South Africa, 2015)".		
	Based on the above, you are advised to undertake the		
	assessment of the above-mentioned species, cumulative		
	impacts and indicate the practical mitigation measures		
	based on the findings of the specialist. In addition, you are		
	advised to include in the final report the development layout		
	map overlaid by the sensitive features.		
	According to the heritage assessment, there is the potential		The Heritage Impact Assessment to be undertaken within the
	for the cumulative impact of proposed solar energy facilities		EIA Phase of the process will include an assessment of
	to negatively impact the cultural landscape due to a change		impacts on the Cultural Landscape. This has been added to
	in the landscape character from rural and mining to semi-		the Plan of Study for EIA In the Final Scoping Report.
	industrial. However, due to the density of mining activities in		
	the area, the impact on the experience of the cultural		
	landscape is not foreseen to be significant. You are expected		
	to ensure that this is assessed and included in the final SR.		
	• In addition to the above, you are hereby drawn to the		All specialist declaration of interest forms for specialist studies
	following:		conducted have been included in Appendix M of the FSR.
	> Specialist Declaration of interest forms must be attached		
	for all specialist studies to be conducted in the final SR. The		
	forms are available on Department's website (please use		
	the Department's template).		
	Specialist studies to be conducted must provide a detailed		Specialist EIA reports will include this information.
	description of their methodology, as well as indicate the		
	locations and descriptions of proposed rehabilitation, and

	studies and requirements recommended in the		
	Department's Screening Tool are not commissioned,		
	motivation for such must be provided in the report, as per		
	the requirements of the Protocols.		

No.	Comment	Raised by	Response
	Please also ensure that the final SR includes the Site Verification Report as required by the relevant environmental themes and assessments.		A Site sensitivity Verification report was included within the DSR and again with the FSR (refer to Appendix K). Specialist reports include information on site sensitivities based on the desk-top scoping study. Updated Site Sensitivity Verification reports based on field investigations will be included in the EIA Report.
	Should it be determined that there is a need for additional specialist studies to be undertaken based on the outcome of public participation, these must be commissioned and be included in the draft EIA reports for public comment.		No additional specialist studies have been identified as being required at this stage in the process. Should any additional studies be identified, these will be included in the EIA Report.
	<ul> <li>Layout &amp; Sensitivity Maps</li> <li>Figure 5.12 on page 28 of the terrestrial ecology scoping report shows the respective farm portions in consideration of the ecological features. However, this refers to Hydra B project and projects are not named making difficult to identify projects individually. You are advised make sure that individual Hydra B developments are named while making sure that the specific development (Vrede Solar PV) is highlighted preferably in a different colour to other proposed PVs that form part of Hydra B.</li> </ul>		Sensitivity information presented within the specialist scoping reports is based largely on desktop data and is therefore presented at a broader scale in order to adequately identify potential issues. Site-specific sensitivity data per project will be presented in the EIA Phase as requested.
	<ul> <li>You are advised to submit a layout map that indicates the following (but not limited to the below, however, the findings of the specialists must advise on what needs to be incorporated in the layout).</li> <li>the PV development area.</li> <li>Position of all infrastructure e.g., panels, BESS, substations, grid connection etc.</li> <li>Permanent laydown area footprint.</li> <li>All supporting onsite infrastructure e.g., roads (existing and proposed).</li> <li>Substation(s) and/or transformer(s) sites including their entire footprint.</li> </ul>		The layout map for Tafelkop is not yet available. The layout will be defined by the applicant considering the identified environmental and technical constraints. The layout map, including the details requested will be compiled and added into EIA Report.

. C	omment	Raised by	Response
	<ul> <li>Connection routes (including pylon positions) to the distribution/transmission network; and</li> <li>All existing infrastructure on the site.</li> <li>The location of sensitive environmental features on site e.g., CBAs, ESAs, heritage sites, wetlands, drainage lines etc. that will be affected.</li> <li>Buffer areas of the above sensitive areas; and</li> <li>All "no-go" areas.</li> </ul>		
•	Please ensure that the above map has a clear legend that communicate with details of the map.		The comment is acknowledged and the Layout map will have a clear legend that communicates with details of the map.
•	The above map must be overlain with a sensitivity map and a cumulative map which shows all Hydra B development as well as neighbouring renewable energy developments and existing grid infrastructure. All available biodiversity information must be used in the finalisation of the map and infrastructure must not encroach on highly sensitive areas as far as possible.		A combined map for Layout and Sensitivity and a Cumulative map will be compiled in the EIA phase once all relevant information and data has been received from specialists and the applicant.
•	Ensure that similar colours are not used to differentiate between infrastructure. i.e., items must be easily distinguishable in the legend.		The comment is noted and will be actioned accordingly.
•	Google maps will not be accepted for decision-making purposes.		Google maps will not be used.
<u>G</u>	eneric EMPr  The on-site substation has been mentioned as part of the infrastructure to form part of the proposed development in activity 11 of LN 1. Therefore, ensure that the generic EMPr that complies with the GN 435 of March 2022 is submitted in the final report.		The relevant generic EMPr for the substation will be drafted and submitted together with the EIA Report.
•	The EMPr that complies with Appendix 4 of the EIA Regulations, as amended, for the facility must be submitted with the final report.		An EMPr for the facility that complies with Appendix 4 of the EIA Regulations, as amended will be drafted and submitted together with the EIA Report.

No.	Comment	Raised by	Response
	Public Participation Process		
	<ul> <li>Public Participation Process</li> <li>Please ensure that comments from all relevant stakeholders are submitted to the Department with the final SR. This includes but not limited to the Department of Forestry, Fisheries, and the Environment (DFFE): Protected Areas Planning and Management Effectiveness Directorate, Biodiversity Planning and Conservation (BCAdmin@environment.gov.za); Northern Cape Department of Agriculture, Environmental Affairs, Rural Development and Land Reform), Telkom, South African Heritage Resources Agency (SAHRA), South African Civil Aviation Authority, Endangered Wildlife Trust, Birdlife South Africa, Department of Human Settlement, Water and Sanitation, South African National Defence Force, Local interest groups, for example: Councillors and Rate Payers associations; Surrounding landowners, Farmer Organisations, Environmental Groups and NGOs; and Grassroots</li> </ul>		All comments received from stakeholders are included in Appendix C6: Comments Received of the final SCOPING REPORT.
	communities and structures as well as the affected district and local municipalities.		
	Proof of correspondence with the various stakeholders must be included in the Final SR. Should you be unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.		Proof of notification to all OoS and attempt to follow-up on written comments are included in <b>Appendix C4: Organs of State Correspondence</b> and to key stakeholders and I&APs are included in <b>Appendix C5: Stakeholder Correspondence</b> of the final Scoping Report.
	The Public Participation Process must be conducted in terms of Regulations 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended and the approved Public Participation Plan.		The Public Participation Process has been conducted in terms of Regulations 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended (GNR 326), as well as in accordance with the approved Public Participation Plan (Appendix C1) as follows:  • Project database:

a register of I&APs has been compiled and will be updated throughout the EIA process (Appendix C21 I&AP Database).  EIA & Public Participation process announcements:  The BID, accompanied by a cover letter inviting I&AP to register on the project database, was distributed via email to identified I&APs and relevant OoS on 3 June 2022 (refer to Appendix C4: Organs of Stath Correspondence and to key stakeholders and I&AP Appendix C5: Stakeholder Correspondence of the final Scoping Report. The BID is included in Appendix C2: Site Notices & Newspaper Advertisement of the final Scoping Report.  An advertisement was placed in The Echn Newspaper, a community newspaper, on Friday, 0 July 2022 (refer to Appendix C2: Site Notices & Newspaper Advertisement of the final Scoping Report).  Site Notices announcing the EIA process were placed.
at visible points the along the boundary of the proposed development site in accordance with the requirements of the EIA Regulations on 28 May 202 (refer to Appendix C2: Site Notices & Newspape Advertisement of the final Scoping Report). 	be comprehensively captured (copy verbatim if required)		
	and responded to clearly and fully. Please note that a		
	response such as "Noted" is not regarded as an adequate		
	response to I&AP's comments.		
	General		The DSR has been subjected to the public participation
	You are further reminded to comply with Regulation 21(1) of the		process through a 30-day review period from 13 January
	NEMA EIA Regulations 2014, as amended, which states that:		2023 to 13 February 2023. The C&RR has been compiled and
	"If S&EIR must be applied to an application, the applicant must,		submitted together with the FSR. The FSR has been submitted
	within 44 days of receipt of the application by the competent		within the regulated timeframe.
	authority, submit to the competent authority a scoping report		
	which has been subjected to a public participation process of at		
	least 30 days and which reflects the incorporation of comments		
	received, including any comments of the competent authority"		
	You are further reminded that the final SR to be submitted to this		The FSR submitted to DFFE complies with all the requirements
	Department must comply with all the requirements in terms of the		in terms of the scope of assessment and content of Scoping
	scope of assessment and content of Scoping reports in		reports in accordance with Appendix 2 and Regulation 21(1)
	accordance with Appendix 2 and Regulation 21(1) of the EIA		of the EIA Regulations 2014, as amended. The location of
	Regulations 2014, as amended.		where each requirement has been complied with is detailed
			within the Scoping Report.
	Further note that in terms of Regulation 45 of the EIA Regulations		This application is currently within the regulated timeframes.
	2014, as amended, this application will lapse if the applicant fails		
	to meet any of the timeframes prescribed in terms of these		Applicant has been informed that no activity pertaining to
	Regulations, unless an extension has been granted in terms of		this proposed project may commence prior to receiving an
	Regulation 3(7).		Environmental Authorisation from the DFFE.
	You are hereby reminded of Section 24F of the National		
	Environmental Management Act, Act No. 107 of 1998, as		
	amended, that no activity may commence prior to an		
	Environmental Authorisation being granted by the Department.		
3.	You may proceed with the environmental impact assessment	Olivia Letlalo	
	process in accordance with the tasks contemplated in the PoSEIA	Case Officer	
	as required in terms of the EIA Regulations, 2014, as amended.	DFFE	

No.	Comment	Raised by	Response
	In addition, the following amendments and additional information are required for the Environmental Impact Assessment Report (EIAR):	Letter: 06 April 2023	
	<ul> <li>a) Listed Activities</li> <li>It is noted that certain listed activities applied for will be confirmed during the EIA Phase. Please ensure that only listed activities that are triggered by the proposed development are applied for, in the amended application form and draft EIAr for the proposed development.</li> <li>It has been noted that the exclusions on the triggered listed activities applied for are not included. Therefore, you are advised to include in the amended application form as well as final SR all the relevant exclusions related to the listed activities applied for. For instance, activity 11 of Listing Notice (LN) 1 have been applied for, however the</li> </ul>		The listed activities triggered by the proposed development have been applied for in the amended application form and the draft EIAr.  The listed activities have been updated within the amended application form as well as within the draft EIAR which now correlate and have been submitted to the DFFE.
	exclusions have not been quoted in the application form.  • Activity 15 of LN 2 and 12 of LN 3 for the clearance of an area more than 20ha and 300 square metres, (respectively) of indigenous vegetation are applied for without specifying the exact total amount of vegetation to be cleared. You are advised to include this information in the amended application form and final SR.		Activity 15 has been updated to include the exact amount of vegetation to be cleared as well as the type of vegetation within the amended application form and EIA report which has been submitted to the DFFE.
	Under activity 56 of LN 1, the CA acknowledged that the access roads to be widened or upgraded have been provided, however, the length of the aforesaid access roads has not been included in the application and draft SR to determine the applicability of the abovementioned activity. You are advised to include the relevant details to determine if the said activity is triggered by the proposed development or not.		Activity 56 of LN 1 has been removed from the amended application form and draft EIA report as it has been advised that the said activities are not triggered and said documents have been submitted to the DFFE.

No.	Comment	Raised by	Response
	Activity 19 is hereby applied for, quoting the infilling or		Activity 19 has been removed and updated from the listed
	depositing of any material of more than 5 cubic metres,		activities list within the amended application form as well as
	however, the Regulations refer to more than 10 cubic		within the draft EIAR that has been submitted to the DFFE.
	meters. You are expected to quote the correct activity		
	and indicate how this activity is triggered.		
	<ul> <li>It has been noted that activities 4,10, 12, 14, and 18 of LN</li> </ul>		The activities 4,10, 12, 14, and 18 of LN 3 have been removed
	3 have been applied for because Critical Biodiversity		from the amended application form and the draft EIA report
	Areas (CBAs) will be affected by the proposed		as it has been noted that they are not triggered activities
	development, however, the description of the portion of		and said documents have been submitted to the DFFE.
	the proposed project to which the applicable listed		
	activity relates indicated as Ecological Support Areas		
	(ESA) will be affected. However, the listed activities under		
	Listing Notice 3 does not include ESA specifically for the		
	Northern Cape Province in order for the development to		
	trigger a listed activity. Therefore, you are requested to		
	explain and provide evidence why the above-mentioned		
	listed activities are triggered for the proposed		
	development. In addition, the description of the proposed		
	project must make reference to the systematic biodiversity		
	plans adopted by the CA or in bioregional plans and proof		
	of such must be obtained from the relevant CA and be		
	part of the amended application form and final SR.		
	<ul> <li>Activity 11 of LN 1 has been applied for, however, page 13</li> </ul>		Activity 11 of LN 1 has been included as a triggered activity
	of 34 of the application form indicated that "the switching		because the development of Tafelkop Solar PV Facility will
	station forming part of the 132kV collector substation and		include a 33/132kV on-site substation (IPP portion) which will
	the new 132kV double circuit will be assessed as part of a		be connected to the proposed central collector substation
	separate Environmental Impact Assessment process in		via overhead cabling with a capacity of up to 132kV. This
	support of an application for Environmental Authorisation".		has been updated within the amended application form
	As such, you are requested to clarify why this activity is		and the draft EIA report which have been submitted to the
	triggered for the proposed development.		DFFE.
	The Department has noted that Battery Energy Storage		The detailed information for the BESS has been provided
	System (BESS) will form part of the proposed development		within the draft EIA report in chapters 2,6 and 7 but do not

No.	Comment	Raised by	Response
	and it is not applied for and it is unclear whether BESS will		trigger any listed activities. The draft EIA report has been
	trigger activity 14 of LN 1. Therefore, you are required to		submitted to the DFFE.
	explain whether the BESS will trigger or not trigger the listed		
	activity in terms of EIA regulations and confirm whether		
	BESS will be assembled on site or pre-assembled. This		
	information will assist the CA to determine the applicability		
	of activity 14 of LN 1.		
	The EIAR must provide an assessment of the impacts and		The EIAr provides an assessment of the impacts and
	mitigation measures for each of the listed activities applied		mitigation measures for each of the listed activities applied
	for.		for and has been submitted to the DFFE.
	Please ensure that all relevant listed activities are applied		All relevant listed activities that are triggered have been
	for, are specific and can be linked to the development		updated both within the amended application form and the
	activity or infrastructure as described in the project		draft EIA report which have been submitted to the DFFE.
	description. In addition, the onus is thus on the applicant		
	and the environmental assessment practitioner (EAP) to		
	ensure that all the applicable listed activities are included		
	in the application. Failure to do so may result in		
	unnecessary delays in the processing of the application.		
	If the activities applied for in the application form differ		An amended application form has been submitted to the
	from those mentioned in the final EIAr, an		DFFE along with draft EIA report.
	amendedapplication form must be submitted. Please

	addition, a summary should be included of the		
	specialist's recommendations in terms of the		
	alternatives that are preferred based on the findings of		
	their study.		
	✓ All specialist studies must be final, and provide		Findings of the specialist studies, including conclusions in
	detailed/practical mitigation measures for the		terms of alternatives considered (where relevant) have
	preferred alternative and recommendations, and must		been included in Chapter 6 and 7 of this EIA Report.
	not recommend further studies to be completed post		
	EA.		
	f) <u>Cumulative Impact Assessment</u>		An assessment of cumulative impacts is included in Chapter
	It has been noted on page iii and 1 of the final SR that the		6 of this EIA Report as well as within the specialist reports
	proposed project is one (1) of 9 projects (in process		included in Appendix D-K.
	application submitted) in batch 1, summing up all 3		
	batches into a total of 21 projects. Further to this there are		
	other similar projects or renewable projects within a 30km		
	radius of the proposed development site, therefore, the		
	cumulative impact assessment for all identified and		
	assessed impacts must be refined to indicate the		
	following:		
	Assess the cumulative impacts of the proposed (not yet		
	authorised), authorised (not yet constructed) and		
	existing solar energy facilities.		
	Detailed process flow and proof must be provided, to		The cumulative impact significance rating is considered in
	indicate how the specialist's recommendations,		the overall conclusion on the need and desirability of the
	mitigation measures and conclusions from the various		project and the impact statement for the project included
	similar developments in the area were taken into		in Chapter 7 of this EIA Report.

No.	Comment	Raised by	Response
	consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project.		
	The cumulative impacts significance rating must also inform the need and desirability of the proposed development.		The cumulative impact significance rating is considered in the overall conclusion on the need and desirability of the project and the impact statement for the project included in Chapter 7 of this EIA Report.
	A cumulative impact environmental statement on whether the proposed development must proceed.		The cumulative impact significance rating is considered in the overall conclusion on the need and desirability of the project and the impact statement for the project included in Chapter 7 of this EIA Report.
	g) Environmental Management Programme (EMPr)  • Page 13 of 34 of the application form indicated that "the switching station forming part of the 132kV collector substation and the new 132kV double circuit will be assessed as part of a separate Environmental Impact Assessment process in support of an application for Environmental Authorisation". However, it is unclear whether the abovementioned infrastructures will form part of the proposed development. Therefore, should these infrastructure form part of the proposed development,		The PV facility will include an onsite substation (IPP portion). The generic EMPr for substation development has been compiled and is included in the EIA Report as Appendix N.  An EMPr for the facility compiled in terms of Appendix 4 of the EIA Regulations and which includes mitigation and monitoring measures for the Solar PV is included in Appendix M of this EIA Report.
	ensure that the generic EMPr (for both 132kV collector substation and 132kV double circuit) that complies with the GN 435 of March 2022 is submitted in the final report.  • Ensure that the EMPr in terms of Appendix 4 of the EIA Regulations includes mitigation and monitoring measures for the Solar PV is submitted with the final EIAR.		The PV facility will include an onsite substation (IPP portion). The generic EMPr for substation development has been compiled and is included in the EIA Report as Appendix N.  An EMPr for the facility compiled in terms of Appendix 4 of the EIA Regulations and which includes mitigation and monitoring measures for the Solar PV is included in Appendix M of this EIA Report.

## 2. COMMENTS RECEIVED DURING THE COMMENCEMENT OF THE SCOPING PHASE OF THE EIA PROCESS

## 2.1. Organs of State

No.	Co	mment	Raised by	Response
7.	1.	The biggest concern is that the project falls in an Important Bird Areas and proper avifauna surveys must be conducted in order to mitigate the impacts on birds, as there is already a lot of power lines in the area.	N Uys and E Swart Scientific Manager GR B: Environmental Research & Development	An Avifaunal Impact Assessment will be undertaken by a suitably qualified Avifaunal Specialist. The Assessment will identify impacts associated with the proposed development and relevant mitigation measures will be formulated. Furthermore, Birdlife SA will be contacted to provide recommendations as per the latest protocols.
	2.	Please incorporate into the assessment the ESKOM maintenance roads under power line(s) for maintenance and fire breaks (there is specific sizes for specific line sizes).	Letter: 07 July 2022	The Eskom requirements will be assessed and if required will be included in the Generic EMPrs in the EIA Phase of the process.
	3.	Please note the area is also an arid landscape and temporary roads leave scars in the landscape for years.		Noted. Where possible existing roads will be used for temporary road access.
	4.	Please include under cumulative impacts assessed other developments such as agriculture and mining. Also include in the assessment the other renewable energy projects in the area and their associated power lines, especially the Kudu Solar PV and EGI that is located adjacent to this development.		An in-depth assessment of other developments within the areas will be conducted during the EIA Phase of the S&EIA Phase.
	5.	This is a massive project and the cumulative impact of the project size should also be assessed.		The potential cumulative impacts of the proposed project have been included in Section 9.5 of the Draft Scoping Report.  An in-depth assessment will be further conducted during the EIA Phase of the S&EIA Process.
	6.	It is recommended that all Environmental Authorisations for Renewable Energy (RE) projects as well as power lines must be re-evaluated if there are any changes in the way RE projects are approved for the De Aar area.		During the S&EIA Phase, the DFFE link for renewable projects database: <a href="https://eqis.environment.gov.za">https://eqis.environment.gov.za</a> will be utilised to assess Renewable Energy Projects in the area to assess the cumulative impacts of the proposed development.
	7.	Fauna and flora permits will be needed for removal of flora and fauna for both the power line(s) and the renewable energy facilities.		Any required permits will be obtained from relevant authorities prior to any commencement of construction activities.

No.	Comment	Raised by	Response
8.	With reference to your above-mentioned application, I hereby	Mantwa Gabaitumele	The approval is noted. No further response is required.
	inform you that our Client (OPENSERVE) approves the proposed	Mvelaphande Trading	
	work indicated on your drawings in terms Section 29 of the	(OpenServe Service Provider)	
	Electronic Communications Act 36 of 2005 as amended.		
		Letter: 14 July 2022	
	Any changes/deviations from the original planning during or	Ref.: CPLT0414-22	
	prior to construction must immediately be communicated to		
	this office.		
	Our Client (OPENSERVE)'s infrastructure is affected by this		Noted. The details as contained in the correspondence have
	proposal and the routes are marked in PINK on attached sketch		been provided to the Applicant for further action, as may be
	as accurately as possible. We did our utmost to ensure that we		required.
	indicate our route as accurate as possible and should you		
	discover any of our cables that are not on the sketch please		
	stop and contact us immediately to arrange a site meeting.		
	Please make use of pilot holes in order not to damage our		
	infrastructure. Therefore, any damages occurred during		
	construction of work will be repaired at the customer's		
	account. Consequently, the following conditions apply:		
	Aerial Plant - At points of crossing, the overhead power lines		
	should cross above the communications lines in accordance		
	with and clearances stipulated in the Occupational Health and		
	safety Act no 85 of 1993, Machinery regulations 20 – Crossings,		
	and Electrical Machinery Regulations 15 – Clearance of Power		
	Lines. If the specifications could not be met, all deviation costs		
	will be for the applicant's account. We also refer to section 25		
	of Electronic Communication Act 36 of 2005.		
	Sketch included in Appendix C6: Comments Received of the		
	Scoping Report		

No.	Comment	Raised by	Response
	At points of crossing, the overhead power line should cross over		
	the overhead communication lines with a minimum vertical		
	separation of <b>0.8</b> meters.		
	Suitable protection as laid down in section 5 of the Code of		
	Practice should be provided at all important crossings.		
	The crossing of supply lines or overhead service mains directly		
	above or adjacent to communication poles must be avoided		
	if possible. If not clearance of 3 meters must be provided.		
	In order to minimize noise induction into the telecommunication		
	systems, the angle of crossing between the overhead power		
	line and all communication lines, should be as near to a right		
	angle as possible – the following deviation from the right angle		
	being permitted at:		
	Power voltage of 48 kV and higher - 30 degrees		
	Power voltage of lower than 48 kV - 45 degrees		
	SWER must be as near as 90 degrees as possible		
	Approved on condition that, should it later be found necessary		
	to deviate the existing communication line due to existing noise		
	interference or any other reason whatsoever, the cost of such		
	remedial action shall be repayable.		
	Paragraph 2.4.1 of the Code of Practice stipulates the minimum		
	acceptable horizontal separation between power and the		
	communication lines and where this cannot be met, the design		
	of the power line is also stipulated. This could apply between		
	the attached plans and these requirements should strictly be		
	adhered to.		
	In cases where an underground power cable will run parallel		
	with an existing underground communication cable, a		
	separation as great as possible should be maintained with a		
	minimum separation of 600mm. should the separation be less		
	than 600mm and the power cable are not enclosed in a		
	suitable pipe, a concrete slab must be provided immediately		

No.	Comment	Raised by	Response
	above the power cable for the length of parallelism. If the		
	separation is less than 300mm, additional protection is required		
	by placing concrete slabs between our Client (OPENSERVE)		
	cables/pipes and the power cables.		
	Underground Crossings - At the points where our Client		
	(OPENSERVE)'s existing underground communication cable will		
	be crossed by an underground cable; the latter should be laid		
	a depth of at least 300mm below the communication cable –		
	normally laid at a depth of 600mm. If the power cable is not		
	enclosed in a suitable pipe, protection in the form of a		
	concrete slab should be provided immediately above the		
	power cable for a minimum of 2 (Two) metres on either side of		
	crossing.		
	Calculations have shown that an earth fault on the high		
	voltage Power lines will induce excessive low frequency		
	induction into the Communication lines. As a result of this, the		
	cost to deviate / alter the communication lines to prevent this		
	induction will be for the power provider.		
	Relocations of our Client (OPENSERVE) plant will be done at		
	customer's request and will be a repayable project.		
	Please notify the office within 21 working days from date of this		
	letter of acceptance and if any alternative proposal is available of if a recoverable work should commence, the		
	liaison officer is <b>Mantwa Gabaitumele at</b> tel. no. <b>0825216813</b> .		
	As important cables are affected, <b>Mr Vivian Groenewald must</b>		
	be contacted at 054 338 6501 /081 362 6738, (2) two weeks'		
	prior of commencement on construction work. It would be		
	appreciated if this office can be notified within 30 days on		
	completion of construction work. Confirmation is required on		
	completion of construction as per agreed requirements.		
	On completion of this project please certify that all		
	requirements as stipulated in this letter have been met. Please		

No.	Comment	Raised by	Response
	note that should any of our Client (OPENSERVE) infrastructure		
	has to be relocated or altered as a result of your activities the		
	cost for such alterations or relocations will be for your account		
	in terms of section 25 of the Electronic Communications Act.		
	This approval is valid for 6 months only, after which re-		
	application must be made if the work has not been completed.		
	Should our Client (OPENSERVE) infrastructure be damaged		
	while work is undertaken, kindly call the Toll-free number		
	<b>0800203951</b> immediately.		
	All of our Client (OPENSERVE) rights remain reserved.		
	Mr Vivian Groenewald must be contacted at 054 338 6501 /081		
	362 6738, Two weeks before any commencement of proposed		
	work.
