Dear Mr. Ngwabe

Kindly find attached a copy of the nomination form as discussed.

You are kindly requested to consult community members and hold meetings in this regard. It is also into keep a record of all meetings held in this regard for submission to the Provincial Heritage Resources Authority, Gauteng. Please provide the history and photographic record of all the structures nominated.

Your response will be highly appreciated.

Kindest Regards

Maphata Ramphela

			ngwabetsu4@gmail.com

PLEASE IDENTIFY YOUR INTEREST IN THE PROPOSED PROJECT

Attached here to is the copy of letter from SAHRA-CRP approving my proposal dated 29.09.2014 and a mandate was given to me to work with people.

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE

My idea was not successful since a puppetry government was created by then to derail the aims and objectives of our new democracy by the hypocrites. I was denied the right (my constitutional right) to hold meetings for same. Many foreign nationals were brought into our neighbourhood so that the indigenous people will own nothing. Special permits should be issued for foreign nationals residing in our environment so that they themselves could benefit out of this project that is looming. The people shall share in the wealth and that's what our Freedom Charter

PLEASE IDENTIFY YOUR INTEREST IN THE PROPOSED PROJECT

I have made a Proposal with the South African Heritage Resource Agency - GP, and the matter was approved.

PLEASE WRITE YOUR COMMENTS AND QUESTIONS HERE

I fully agree with the proposals by all the stakeholders concerned with regard to the mining issue that is to take place sooner if not later within our jurisdiction.

What if in future we (South African) devise a plan whereby our own nation will do for us what the foreign nationals will be doing on our behalf and for themselves during their implementation of the proposed project in our country. In future, it will be better if for us if we send, say, about 5 White Students, 5 Coloured students, 5 Indian students (Asiatic) and 10 African Students, abroad to learn as to how to till the soil around/about in terms of Agriculture and Farming skills and insight for a period of five years. We will then have to send as many of our children abroad as often as possible in order for us to build our nation together rather than relying on foreign assistance.

Please return completed forms to:

Marline Medallie and/or Clive Phashe

Dear Paula-Ann,

Thank you for the email.

Webber Wentzel as representative of MDV Developments have been registered as an interested and affected party on the West Wits Project, and the project database has been updated with the contact details for future involvement in the project.

Could we please schedule a meeting between the relevant parties to discuss the West Wits Mining Project during the course of next week? Also please let me know whether you would prefer to meet with the West Wits applicant directly, or whether SLR Consulting needs to be present.

Thank you and kind regards

Marline Medallie

Dear Sirs

West Wits Mining Project

1. We act for ANSEC 171 Proprietary Limited, trading as MDV Developments ("our client").
2. We have been instructed to inform you that our client intends to comment on and/or oppose the West Wits Mining MLI Proprietary Limited ("West Wits") mining permits and mining right applications premised on the prospecting right under reference GP 30/5/1/1/2/10035 PR ("Prospecting Right").
3. Our client has the rights to build affordable housing over portions of the land over which these applications have been brought, and beyond this has concerns in respect of the environmental consequences of such applications, among others.
4. We have been instructed to advise our client and to act on its behalf throughout the respective application processes.
5. Our client has provided us with copies of the background information documents for each of the mining permits application and the mining right application respectively. We would like to take this opportunity to request from West Wits the following additional information:
 - 5.1 a copy of the Prospecting Right;
 - 5.2 proof of the conversion of the Prospecting Right from the old order prospecting right under reference MPT No. 29/2016; and

DESTRUCTION OF ENVIRONMENT
HEALTH HAZARDS
NOISE OF BLASTING AND ROCK CRUSHING
ACIDIC AND URANIUM POLLUTED WATER
DUST
ESCALATION OF CRIME

You cannot establish a "legal" mine to curb "illegal" mining!!! This is just another money-making racket.
Flush out illegal miners and JAIL them or DEPORT them instead of wrecking our environment and causing more health hazards!!!!

Dear Sir/Madam,

Thank you for the email.

The Georgia South Resident's Forum has been registered as an interested and affected party on the West Wits Project, and the project database has been updated with the contact details for future involvement in the project.

Please find attached and below information for the West Wits Project.

PURPOSE OF THIS E-MAIL AND ATTACHED DOCUMENTS

DMR REFERENCE: GP 30/5/1/1/2/10035 PR

The purpose of this email is to provide all interested and affected parties (I&APs) with information about two (2) proposed Mining Permit applications and one (1) proposed Mining Right application for West Wits. Please find attached the background information documents for the two application processes.

In addition, the document also aims to:

- Introduce and explain the Basic Assessment Report (BAR) & Scoping Report (SR) / Environmental Impact Report (EIR) processes, including the public participation process (PPP) that will be followed;
- Invite all I&APs to comment on the proposed project by raising issues of concern and/or suggestions for enhanced benefits/alternatives on any aspect related to the proposed development; and
- Invite I&APs to provide comments.

To register as an I&AP on the project please contact the following person(s):

- Mrs. Marline Medallie and/or Mr. Clive Phashe
- SLR Consulting (South Africa) (Pty) Ltd
- (011) 467 0945 (Tel) and/or (011) 467 0978 (Fax)
- 720.13087.00001@slrconsulting.com

Any comments received on the mining permit application process would be forwarded to MalanScholes to be addressed. Comments received on the mining right application process will be addressed by SLR Consulting (South Africa).

INTRODUCTION AND BACKGROUND

West Wits Mining MLI (Proprietary) Limited (West Wits) holds a prospecting right (GP 30/5/1/1/2/10035 PR) over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and

Tshekiso 710 IQ in the City of Johannesburg Metropolitan Municipality, Gauteng Province. Consent in terms of Section 11(2) of the Mineral and Petroleum Resources Development Act (MPRDA) (No. 28 of 2002) to cede a renewed prospecting right MPT No. 29/2016 from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits was granted by the Department of Mineral Resources (DMR) in 2018.

THE TWO PROCESSES TO BE FOLLOWED

West Wits intends to now apply to the DMR for two (2) Mining Permits applications (i.e. Kimberley West and Creswell) and a Mining Right application for gold, uranium, silver, sandstone and aggregate:

Process 1:

- The two (2) Mining Permit applications shall cater for opencast mining for two (2) areas that are less than 5 hectares

Process 2:

- The one (1) Mining Right application shall cater for opencast and underground mining activities within the mining right application area, the extent of the total area is 6149.7466 hectares

These processes will run parallel to each other, and if Process 1 is approved, it will provide West Wits with earlier access to some of the ore reserves.

Kind Regards

INTRODUCTION AND BACKGROUND

West Wits Mining MLI (Proprietary) Limited (West Wits) holds a prospecting right (GP 30/5/1/1/2/10035 PR) over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ.

Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ in the City of Johannesburg Metropolitan Municipality, Gauteng Province. Consent in terms of Section 11(2) of the Mineral and Petroleum Resources Development Act (MPRDA) (No. 28 of 2002) to cede a renewed prospecting right MPT No. 29/2016 from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits was granted by the Department of Mineral Resources (DMR) in 2018.

THE TWO PROCESSES TO BE FOLLOWED

West Wits intends to now apply to the DMR for two (2) Mining Permits applications (i.e. Kimberley West and Creswell) and a Mining Right application for gold, uranium, silver, sandstone and aggregate:

Process 1:

- The two (2) Mining Permit applications shall cater for opencast mining for two (2) areas that are less than 5 hectares

Process 2:

- The one (1) Mining Right application shall cater for opencast and underground mining activities within the mining right application area, the extent of the total area is 6149.7466 hectares

These processes will run parallel to each other, and if Process 1 is approved, it will provide West Wits with earlier access to some of the ore reserves.

Kind Regards

Dear Esther,

Thank you for the email.

The objections and concerns regarding the West Wits Project have been noted, and will be included and addressed in the issues table of the environmental assessment process together with issues and/or concerns still to be raised during the ongoing environmental regulatory process for the project.

Please find attached and below information for the West Wits Project.

PURPOSE OF THIS E-MAIL AND ATTACHED DOCUMENTS

DMR REFERENCE: GP 30/5/1/1/2/10035 PR

The purpose of this email is to provide all interested and affected parties (I&APs) with information about two (2) proposed Mining Permit applications and one (1) proposed Mining Right application for West Wits. Please find attached the background information documents for the two application processes.

In addition, the document also aims to:

- Introduce and explain the Basic Assessment Report (BAR) & Scoping Report (SR) / Environmental Impact Report (EIR) processes, including the public participation process (PPP) that will be followed;
- Invite all I&APs to comment on the proposed project by raising issues of concern and/or suggestions for enhanced benefits/alternatives on any aspect related to the proposed development; and
- Invite I&APs to provide comments.

To register as an I&AP on the project please contact the following person(s):

- Mrs. Marline Medallie and/or Mr. Clive Phashe
- SLR Consulting (South Africa) (Pty) Ltd
- (011) 467 0945 (Tel) and/or (011) 467 0978 (Fax)
- 720.13087.00001@slrconsulting.com

Any comments received on the mining permit application process would be forwarded to MalanScholes to be addressed. Comments received on the mining right application process will be addressed by SLR Consulting (South Africa).

To: 720.13087.00001 - West Wits Mining Right

Subject: NO to opencast mining project!

To whom it may concern.

After reading the article in our local newspaper Roodepoort record, I feel obliged to say NO to the opencast mining project. This project doesn't hold any reliability or good for the citizens of affected areas.

I seems to differ from Mr Milne that it will decrease the illegal mining by Zama-Zamas. Just passing the same project on the R28 towards Randfontein many times specially Saturdays and Sundays I counted up to 8 illegals with buckets digging openly in the sand heaps. Digging 360,000 tons is leaving us with a big hole, damaging the water table.

As a citizen in Witpoortjie for the past 60 years I say NO to this project for the following reasons:

1. Our houses will be damaged by the explosions.
2. The valuation of our houses will drop extensively.
3. Severe noise and dust pollution will be the norm. Inhaling the dust cause sinus, asthma, pnuenomia which will cause more health problems like heart problems.
4. A dumpsite like on the R28 towards Randfontein.
5. Crime will thrive even more by illegals, Zama-Zamas who will be a security risk to our people.
6. Water wastage in our city, pollution to the water streams.
7. No proof that the unemployed will be taken into consideration of employment.
8. Health and environmental risks to the areas. Lung problems due to the dust and minerals.
9. There is no security of your promises.
10. None of our citizens affected by this project will gain any good from it.
11. Our areas traffic is already overloaded, our roads are not build for this project, which will lead to more congestion from the big trucks transporting excess materials.
12. Schools will also be affected.

Subject: No to West Wits mining project along Mainreef road.

To whom it may concern. I am a very strong supporter of economic development and growth for our country as I am aware of the various opportunities it creates for the nation, I however wish to express my total objection to the proposed mining development project along mainreef road by the above mentioned company, because our houses will devalue instantly due to underground blasts cracking our houses, noise pollution, acid mine emissions, clouds of dust over our properties. Kindly insure us from future health effects such as TB, chest infections so that we are

adequately compensated if you should choose to ignore our objections. Don't say I didn't warn you 20 years from now as you face hundreds of law suits.

Sincerely concerned resident.

Subject: RE: West Wits Mining Project-Objection

Dear Marline

Thanks for the response. We will await further details.

Meanwhile your client has already begun mining in Sol Plaaitsjies and other areas in and around Roodepoort roads and dust is highly visible as they are preparing to start operations on the mining project.

So far very few people have been informed of their activities as required by legislation. Very few newspapers in affected areas have even been contacted by yourself to inform people to participate.

We still await an environmental impact study that complies with the minimum requirements of the National Environmental Act, 1998 and the National Environmental management Waste Act, 2008 in respect of listed activities that have been triggered by applications (still to be seen by us the affected people) in terms of the Minerals and Petroleum Resources Development Act 2002 (MPRDA) (As Amended)

We wish to see your application in terms of above mentioned legislation as well as the approval.

Yours Faithfully

Nadia McIntyre

Subject: West Wits Mining Project-Objection

Good day Marline

I wish to lodge an objection to the West Wits Mining project.

The mining includes the mining of gold, silver, Uranium, sandstone and aggregate.

Despite several meetings with residents who objected against the mining operations, your client Australian based West Wits Mining have already begun illegal mining operations in Sol Plaatjies and other areas.

I am representing a large cross-section of Communities, including Florida Park, Witpoortjie, Sol Plaatjies, Roodepoort CBD, which will all be negatively affected by the mining operations, which at this stage are illegal since they have not complied with several laws regulating mining.

We still await your proper Environmental Impact Assessment Report on ALL mining operations, including open cast, and underground as well the minerals and precious metals to be mined.

We will fight this even it means a class action, so warn your client that they are in for a fight against anyone destroying our natural resources and placing people's lives in danger of diseases such as cancer for generations to come due to the Uranium fall-out.

This is just the beginning!
You will be hearing more from us.

Yours faithfully
Miss Nadia McIntyre

Dear Ms McIntyre,

Thank you for the call.

You have been registered as an interested and affected party on the West Wits Project, and the project database has been updated with the contact details for future involvement in the project.

Please find attached and below information for the West Wits Project.

PURPOSE OF THIS E-MAIL AND ATTACHED DOCUMENTS

DMR REFERENCE: GP 30/5/1/1/2/10035 PR

The purpose of this email is to provide all interested and affected parties (I&APs) with information about two (2) proposed Mining Permit applications and one (1) proposed Mining Right application for West Wits. Please find attached the background information documents for the two application processes.

In addition, the document also aims to:

- Introduce and explain the Basic Assessment Report (BAR) & Scoping Report (SR) / Environmental Impact Report (EIR) processes, including the public participation process (PPP) that will be followed;
- Invite all I&APs to comment on the proposed project by raising issues of concern and/or suggestions for enhanced benefits/alternatives on any aspect related to the proposed development; and
- Invite I&APs to provide comments.

To register as an I&AP on the project please contact the following person(s):

- Mrs. Marline Medallie and/or Mr. Clive Phashe
- SLR Consulting (South Africa) (Pty) Ltd
- (011) 467 0945 (Tel) and/or (011) 467 0978 (Fax)
- 720.13087.00001@slrconsulting.com

Any comments received on the mining permit application process would be forwarded to MalanScholes to be addressed. Comments received on the mining right application process will be addressed by SLR Consulting (South Africa).

INTRODUCTION AND BACKGROUND

West Wits Mining MLI (Proprietary) Limited (West Wits) holds a prospecting right (GP 30/5/1/1/2/10035 PR) over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ in the City of Johannesburg Metropolitan Municipality, Gauteng Province. Consent in terms of Section 11(2) of the

Mineral and Petroleum Resources Development Act (MPRDA) (No. 28 of 2002) to cede a renewed prospecting right MPT No. 29/2016 from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits was granted by the Department of Mineral Resources (DMR) in 2018.

THE TWO PROCESSES TO BE FOLLOWED

West Wits intends to now apply to the DMR for two (2) Mining Permits applications (i.e. Kimberley West and Creswell) and a Mining Right application for gold, uranium, silver, sandstone and aggregate:

Process 1:

- The two (2) Mining Permit applications shall cater for opencast mining for two (2) areas that are less than 5 hectares

Process 2:

- The one (1) Mining Right application shall cater for opencast and underground mining activities within the mining right application area, the extent of the total area is 6149.7466 hectares

These processes will run parallel to each other, and if Process 1 is approved, it will provide West Wits with earlier access to some of the ore reserves.

Kind Regards
Marline Medallie

FOR IMMEDIATE RELEASE : United Front of Roodepoort Residents Forums
Against West Wits Mining Project Say their Say in
no Uncertain Terms

Date : 7 May 2018

The United Front of Roodepoort Residents Forums Against West Wits Mining Project hereby state that we represent the communities (domestic, industrial and economic sectors) of Roodepoort, which includes the greater Florida - *Fleurhof, Florida Park, Florida Lake, Georginia, Hamberg, Cresswell Park, Roodepoort CBD, Witpoortjie, Bramfischerville and Dobsonville*, which will be directly impacted by West Wits Mining Project. We are currently still reaching out to Riverlea and other adjacent communities alongside Main Reef Road.

As we have said before, this community has never been challenged by this subject as such, nor the significant magnitude and consequence it holds to this already fragile community who are left in this state by the abandoned mining projects of yesteryear. This is happening on the threshold of our biggest personal investments which is our homes, families and businesses. The most studies available are done by those institutions who promote gold mining, and not by those communities that are opposed to it. Our research is ongoing.

We would like to respond on your two questions as follows.

- We are seriously concerned about the consultative process by West Wits Mining Limited with the communities and business of the area up to this point.
- We are also concerned about the way the Prospecting Rights changed hands from DRD Gold in 2006 to Mintails SA Soweto Cluster and now to West Wits Mining. We understand that this prospecting right was renewed until 2019
- Our health and safety is an obvious concern because of the expected chemical negatives and radiation to mention just
- a few.
- There will be serious traffic congestions during the time of mining as Main Reef, Albertina Sisulu and Ontdekkers Roads are the three lifelines for daily transportation
- Our electricity infrastructure is already under immense pressure as Joburg City is running a reported electrical infrastructure maintenance backlog of approximately R19 billion, which includes replacement of major parts and even total replacement of

substations. How is it even thinkable to put more pressure on such a vulnerable network.

- Joburg City also reports regularly on the increasing pressure on the current fresh water supply from Joburg Water to households and industry. We refer to the ever increasing housing developments on the Westrand from Soweto to Midrand. Unfortunately City is suffocating under the explosion of water needs. A mine that relies heavy on constant water supply will naturally impact on our neighbourhood and settled infrastructure.
- We cannot even start to imagine a mine next to Gauteng Dairy, Bread distribution plant as well as a big Food Flavouring and Food Colouring plant.
- Mining will change the Security and Safety Profile of our Area. The area is shared by Florida and Roodepoort Police Offices. We have up to a two hour waiting time for SAPS Reaction if we report on an incident at this stage. The Police resources are under pressure as it is, it is therefore a no-brainer to assume the pressure on this aspect.
- Impact on property rights and property values of the residents. Mining, as we know for a fact, will impact on the property value of home owner as well as business
- Underground gas and fuel lines runs along Main Reef Road, well within the boundaries of the proposed mining rights.
- This is a major disaster risk for people and businesses along the underground fuel lines.
- The impact on the environment is undeniably a big concern as the rehabilitation projects in SA gold mining is reported on in studies as non-existent.
- We also cannot imagine the noise levels and the impact on life here when the mine is in operation 24 hours a day.
- We have at least three dams (natural water reservoirs in the floodplain leading into Florida Dam, including Hamberg and Princess Dam), as well as the Hammerkop Bird Sanctuary. These natural assets became part of our heritage and cultural life, hosting the fauna and flora that warrants our protection. This area forms part of the National Freshwater Ecosystem Priority Area.
- We have not been informed on the State's commitment to land rehabilitation plans and projects on current deserted mining projects as well as mining company's its decommissioning and closure projects.
- As a united front of communities we call into reference our rights as enshrined in Chapter 2 paragraphs 24 and 25 of Bill of Rights of the South African Constitution of 8 May 1996 and amended on 11 October 1996 by the Constitutional Assembly.

As a representative Forum we are still in a process of collecting the necessary data and legal references to protect ourselves, our community and environment of harmful mining activity and its effects. We will not stop until we achieve our goal, which is to cease mining in our residential area.

Good day,

As the special address gas not seen fit to reply perhaps you will. I am a very concerned citizen. Five years ago I was given a printout by Joburg Deeds Office, confirmed by City if Joburg, indicating that a stand in Tornado Crescent in Ward 127, behind Mersey Street belongs to West Wits Australia. This the Ops Manager of West Wits SA denies. Please explain, and please explain why you wish to mine what has already BEEN mined?

Sincerely,

Gill Stewart

Subject: West Wits Mining Proposal.

Good day,

As West Wits do not presently maintain the properties they actually OWN in a manner which is not hazardous to the wellbeing of both neighbours and environment, how can we possibly trust them with an exercise of this nature?

The last time this was done the local residents in the entire area could not sleep for the noise generated by the 24 hour operation. Red dust and sand everywhere was a danger to health and made washing impossible.

The incessant vibration of the heavy machinery caused cracks in many houses. There was not one cent compensation for any of this. They just shovelled the holes closed and called the land rehabilitated. We are still living with the mess. West Wits presently owns part of these lands. They have lain untouched, unfenced and neglected for decades.

Why should we give them permission to repeat the offence?

I want contact details for West Wits please. Their negligence has endangered our lives.

I would appreciate acknowledgement of this mail

Thank you

Good day,

Public participation requires that you actually respond to the concerns of the community.

I asked for acknowledgement.

Why is there nobody in the office to talk to concerned residents? Why do you not respond to messages?

This is NOT public participation. This is public exclusion.

Sincerely,

Gill Stewart

Please find attached and below information for the West Wits Project.

PURPOSE OF THIS E-MAIL AND ATTACHED DOCUMENTS

DMR REFERENCE: GP 30/5/1/1/2/10035 PR

The purpose of this email is to provide all interested and affected parties (I&APs) with information about two (2) proposed Mining Permit applications and one (1) proposed Mining Right application for West Wits. Please find attached the background information documents for the two application processes.

In addition, the document also aims to:

- Introduce and explain the Basic Assessment Report (BAR) & Scoping Report (SR) / Environmental Impact Report (EIR) processes, including the public participation process (PPP) that will be followed;
- Invite all I&APs to comment on the proposed project by raising issues of concern and/or suggestions for enhanced benefits/alternatives on any aspect related to the proposed development; and
- Invite I&APs to provide comments.

To register as an I&AP on the project please contact the following person(s):

- Mrs. Marline Medallie and/or Mr. Clive Phashe
- SLR Consulting (South Africa) (Pty) Ltd
- (011) 467 0945 (Tel) and/or (011) 467 0978 (Fax)
- 720.13087.00001@slrconsulting.com

Any comments received on the mining permit application process would be forwarded to MalanScholes to be addressed. Comments received on the mining right application process will be addressed by SLR Consulting (South Africa).

INTRODUCTION AND BACKGROUND

West Wits Mining MLI (Proprietary) Limited (West Wits) holds a prospecting right (GP 30/5/1/1/2/10035 PR) over various portions of the farms Glen Lea 228 IQ, Perdekraal 226 IQ, Rand Glen 229 IQ, Dobsonville 386 IQ, Doornkop 239 IQ, Fleurhof Township, Roodepoort 236 IQ, Roodepoort 237 IQ, Uitval 677 IQ, Vlakfontein 233 IQ, Vlakfontein 238 IQ, Witpoortjie 245 IQ, Vogelstruisfontein 231 IQ, Vogelstruisfontein 233 IQ, Soweto 387 IQ, Klipspruit 298 IQ, Klipriviersoog 299 IQ, Durban Roodepoort Deep 641 IQ, Bram Fischerville 663 IQ, Bram Fischerville 649 IQ and Tshekisho 710 IQ in the City of Johannesburg Metropolitan Municipality, Gauteng Province. Consent in terms of Section 11(2) of the Mineral and Petroleum Resources Development Act (MPRDA) (No. 28 of 2002) to cede a renewed prospecting right MPT No. 29/2016 from Mintails SA Soweto Cluster (Proprietary) Limited to West Wits was granted by the Department of Mineral Resources (DMR) in 2018.

THE TWO PROCESSES TO BE FOLLOWED

West Wits intends to now apply to the DMR for two (2) Mining Permits applications (i.e. Kimberley West and Creswell) and a Mining Right application for gold, uranium, silver, sandstone and aggregate:

Process 1:

- The two (2) Mining Permit applications shall cater for opencast mining for two (2) areas that are less than 5 hectares

Process 2:

- The one (1) Mining Right application shall cater for opencast and underground mining activities within the mining right application area, the extent of the total area is 6149.7466 hectares

These processes will run parallel to each other, and if Process 1 is approved, it will provide West Wits with earlier access to some of the ore reserves.

Kind Regards
Marline Medallie

Subject: Objection for the proposed mining permit area for the Cresswell Park opencast pit located on a portion of the farm Roodepoort 237 IQ.

Dear Marline Medallie and Clive Phashe,

On behalf of the property owners and residents of Creswell Park I hereby write to you to register our objection as follows:

We object unreservedly to the proposed Open Cast Mining on the strip of land next to Main Reef Road which will adversely affect our area and the surrounding areas. We object to any direct or indirect mining that will involve extraction of any precious metals within or around the surroundings of Creswell Park.

Having learnt from past experience within Gauteng indicates that Johannesburg's acid mine water drainage crisis – the vision of toxic liquid bubbling up from beneath Gold Reef City has a touch of Hollywood about it. But much less has been said about a century-old problem that's also reaching crisis proportions: the toxic dust that spirals off mine dumps and affects the health of communities nearby.

As much as it It's not easy to do epidemiological studies to pin down the impact of a toxic substance that can drift on the wind (some activists have indicated that traces of South Africa's West Rand mine dust have been found as far afield as Tasmania). In addition, although the dust problem has grown exponentially in the past two decades, it's too early to tell whether we have a cancer epidemic on our hands – and that's just one of the deadly possibilities.

Dust has been an issue across the Witwatersrand since before World War I. By 1910, Johannesburg had grown from a mining camp into a bustling town and, as suburbs inched closer to the nascent mine dumps, residents began to feel the impact of the waste deposited on the surface. As hyperfine milling processes are adopted, the measured quantity of inhalable material has jumped from 5% to 26%, as a 2010 study that measured dust exposure in Soweto noted. "Occupational health standards for quartz exposure [linked to silicosis deaths in mine workers] were exceeded in this residential environment during this [dust storm]." The study added that statistical analysis of long-term weather data had indicated that wind conditions would exceed thresholds for dust generation and trigger environmental dust episodes for about 1 150 hours a year.

Each phase of the stages of coal production, mining, disposal of contaminated water and tailings, transportation, washing, combustion and disposing of post combustion wastes produces pollutants that affect human health. The lungs are a ready pathway for pollutants to enter the body. They do have defense mechanisms, but these may not be tough enough to repel toxic or carcinogenic agents. Furthermore, as McPherson observes in his study of hazardous dust, "after years of exposure to unnaturally high concentrations of dust, the defense system can simply become overloaded, allowing the lungs to become much less efficient as gas exchangers and also more susceptible to bronchial infections and pulmonary illnesses".

We the property owners and residents regard such a process as a health risk and destructive to the livelihood of Creswell Park people and causing pollution to the environment. We therefore insist that there should be **NO MINING** activities in our area and necessary measures are taken that will ensure that **NO MINING** takes place in the area.

Dear Marline,

We are now writing to you for the third time with no response from yourselves. We here request that you send us a confirmation that Creswell Park Community registered as an interested party as well as an affected party.

Kindly advise us as well if you have submitted your application with DMR

Dear Marline / Clive
Project manager and assistant

Re: West Wits Mining Company - Open cast mining project

We refer to the proposed open cast mining project as advertised in the Roodepoort Record on or about 23 March 2018.

We are the concerned property owners and residents of Creswell Park and we have been mandated by Creswell Park community to register our objection and to request to be registered as an Interested and Affected party (I&AP) to the proposed open cast mining project by West Wits Mining Company as referred to in the abovementioned notice.

Further to our earlier email dated the 03 April 2018 which to date your office has not acknowledged we here draw your attention to the following concerns in relation to the open cast mining:

1. No public meeting was called to hear the views of Creswell Park residents which will be mostly affected by the application.
2. Property values being negatively affected in and around the areas affected, with a proposal for the company to buy out property owners at an approximate value of between R1.1 million and R3.1 million per house - based on individual valuations, (complex and body corporate values to be advised individually)
3. Health concerns in relation to the arsenic and negative chemical and other pollution caused by the mining activities, in relation to air quality changes including radiation etc,
4. Water quality and the negative impact thereon including radiation contamination of water caused by the mining activities and after effects of mining, including underground water,
5. Negative impact on surrounding businesses on and around Albertina Sisulu road,
6. Negative impacts of landfill sites and dumps proposed and changes in land use in and around the affected communities,
7. Loss of area specific biodiversity and natural characteristics as well as loss of historical value in the areas affected,
8. Increase crime rate due to influx of job seekers and traffic congestion increases within and around areas affected,
9. A further concern is the arrangement of the public scoping meetings being advertised only in Afrikaans in our area and the confusion created by the irresponsible timing and arrangements of venues which have changed on very short notice and in an inconsiderate manner. Due to short notice of the proposed plans we hereby state that the above list of concerns is not exhaustive and further interests and concerns may be raised in the event of further research and understanding of the impacts that will be caused.

Please confirm registration of our request and include the residents association as referred as an Interested and Affected party.

Yours sincerely

Regards,

> After hours contact number

> 0117601281

>

> Interest in Proposed Project

> Owner of Property. Title deed holder.

>

> Comment and Questions

> Keeping the increase in income you advised your shareholders they will benefit from with this mining project.

>

> Comment: Your promise of job creation is very vague, you are sourcing employees from local communities.

> Question: You cannot at this time confirm a figure of how may people you will be employing, don't you think this is reckless to create a false expectation of employment?

> Comment: You will not provide housing as the employees will be sourced from local communities.

> Question: which communities? Those in the informal settlements i.e Princess Crossing or people living in houses in the area. Or further away resident who will be bussed in and /or make use of their own transport, how will you accommodate parking and movement of such employees.

> Question: How are you uplifting either one off the above-mentioned people and what will they get paid.? Especially the people living in the informal settlements. What benefits will be attached to their remuneration, i.e medical aid, UIF, pension fund, transport, how long will their contract be?

> Question: How will residents in the area be compensated for the loss in their property value as well as possible damage, increase in insurance as immediate examples.

> Comments: I would expect you to buy my house and afford me the luxury to move/ relocate to a cleaner, healthier and safer area. With your statement on page 4 it is clear the actual residents will NOT benefit at all. At least provide the residents with the same positive benefit you promised your shareholders..

Comment: You are stating on pages 4 and 5 existing status of existing environment and then also possible and potential impacts on the potential environment and socio economic environment.

Comment: What I have heard during the meeting I attended from David from Benchmark there is serious concerns as well as the lady from PAWS as well as from community members and concerned residents with firsthand experience.

Question: The Specialist you have on retainer or contract to they bat for the consultants side or how objective and true will their results and outcome of any test done be? What i also heard during the meeting is there is class actions currently ongoing or intentions to bring class actions against your clients. Please explain.

Comment: In one of the documents made available to your shareholders you advise them you are fast tracking the applications for the license/permit

Question: What is the timeframe we are looking at and when will the initial process before actual mining begin be completed.

Question: How much say do the interested parties have in the outcome and where and when was the application for the permit/license published.

Question: Do the authority responsible for the granting of said license/permit have insights in all the concerns and outcome of test and studies. Before granting the approvals?

Question: is the specialists independent (I am rephrasing my previous observation of the specialist/s)

Question: There is a cemetery a street away from my house which is not far away from your open cast mine, is this mine meeting the required distance for this type of project.

Question: There is a gas and a petrol line as well in the area are you meeting the distant and safety regulations and requirements?

Statement: You will be placing a huge burden on the traffic,quality of the already burdened roads. Surely you trucks and and scrapers and whatever tools you use will magnify the abuse of the environment, keeping in mind your knowledge of illegal dumping. What about all the toxic waste, the pressure on our water resource, this water system is already an old and badly maintained system as well as the electricity grid, you will be putting more pressure on both systems what about poisoning the dams in the area, since you will have a negative affect on the environment and you will magnify this negative affect which you already admit there is issues in all the areas.

Question: Will you pay any medical cost, what i heard during the meeting there is living proof of damage to human, animal and nature caused by mining.

Question: Do you really believe you will have a positive economic impact on the area and the residents? How many people will you employ 100, 200 will they be genuine locals or from neighboring countries or towns.

Statement: You should compensate homeowners like myself and by the way I am retired so there is no huge income for myself, to be able to relocate, you should provide proper housing to residents with the proper infrastructure showing you mean uplifting a community. Your motivation for the proposed project is also a one sided affair giving the impression you are looking only at one side to many variables and if's.

In short. As said before and on record I can in no good conscience subject my family, animals to a mining operation bringing with it more negatives and heart-ships than the wealth promised to your shareholders, you should afford all owners the opportunity to sell their properties to you whereby you will then empower and uplift residents who would grab this opportunity given to them, with the promise of a better life and the owner preferring to move can relocate, this will make homeowners a willing participant in your operation, do not sandpaper us and grease the palms of your shareholders who do not know what the real and actual position is and will be, should we be forced to stay in a environment not suitable for healthy living and therefore make the title deed i own worth less than the paper it is on.

Kindly

Regards

Liz
