2. Existing Improvements made on site:

3. Detail the work commenced/carried out

No proposal, it was a necessity. It was storm damage that was handled by the insurance company and the roof was replaced by a competent roof specialist. Only the roof sheeting was replaced. The existing trusses were kept, only fixed where some were damaged. ✓

The insurance company was Compass Insurance Company Limited.
The roofing contractor was Thames Construction.

4. Motivation for work (Please motivate fully why work was commenced without approval)

The work was done in 2017 due to a storm on the 10th October 2017 that blew away most of the existing Asbestos cement roof. An insurance claim was submitted and the insurance company approved a roof specialist to correct the existing roof. Asbestos cement is outlawed and a decision was made to use chromadek roof sheeting for the following reason. The slope of the roof is nearly flat, only 3 degrees, and it was considered to be a better material to use than the old Asbestos. There is no change in the elevations due to the flatness of the roof. See the attached photographs.
