The body of your message reads:

Hi Elijah,

I hope this message reaches you well in South Africa. I wanted to check in about our permit (Case ID 17772). I was able to sample most of the archaeological objects associated with this permit between July and September, 2022. I then transported these back to my University in the USA for analysis. Unfortunately we have had several complications which have prevented us from producing data on these objects so far. My wife fell quite ill between November 2022 and February 2023, which prevented me from working on these samples. We have since had several instrumentation issues which have prevented us from analyzing these samples. We hope that we are finally making progress in this respect, but I unfortunately must write and request an extension. I understand the final report is due on 6/30/2023. Would it be possible to extend this deadline until the end of the year? I sincerely apologize for this.

Best wishes,

Jay
