

MULTISAFE  SECURITY

Elegant Security Solutions

Introducing...

Lexan[®] - ClearBars[®]

Made from the strongest thermoplastic in the world, Lexan-ClearBars provide a secure and elegant solution to burglar-proofing your home or business.

Virtually unnoticeable and often enhancing the window, Lexan-ClearBars provide a means of securing your home and loved ones, without compromising your mountain and sea views.

The material is virtually indestructible and has a tensile breaking strength of 3000kg's - impossible to break with stones, bricks or a hammer.

The 6mm x 30mm burglar bars are individually installed with spacings of 100mm - 120mm, as per insurance regulations, and are easily and securely mounted in to either aluminium or wooden frame windows by our professional and approved Multisafe Security agent.

Lexan (the inventors of polycarbonate) is synonymous with quality and durability and is one of only two thermoplastics in the entire world approved for use in the aviation industry (airplane windows)

Additionally the material is used for manufacturing police riot shields, visors for helmets, jetfighter cockpits, rocket windows and Formula 1 windscreens. Where reliability and strength is paramount, most manufacturers choose Lexan.

Multisafe Lexan-ClearBars are maintenance free, scratch resistant and guaranteed for 10 years against fading and ageing.

Multisafe is the inventor of ClearBars and guarantees that when you purchase Lexan-ClearBars, you are installing the strongest transparent burglar bar in the world.
