Dear Dr Nienaber

Attached please find the permit for rehabilitation at Mapungubwe.

I have sent the permit out for review and now have the following comments:

Both reviewers are satisfied with the overall project and that we issue the permit. Please read their requests below and all permit conditions carefully.

The following matters need to be addressed:

1. The Zhizo Site on Little Muck (2.1.d) must be mapped (point iii).
2. Which archaeological dumps at K2 will be used?
3. The sections and profiles must be drawn by an archaeologist (not a land surveyor). Who will do these?
4. Note that the caption to Fig.5 in the main proposal should read "Gardner", not "gardener".
5. We require an assessment of the rehabilitation methods used in Phases I-III? The monitoring function of this work is very important for future planning both at Mapungubwe and at other archaeological sites.
6. Where will SANParks store the material recovered? Will there be storage space in the park, and if so, who is responsible for curation?

7. The Management Plan must be adhered to at all times.

Please provide written comment on the above concerns where required as soon as possible.

Sincerely

Mrs Mary Leslie  
SAHRA: Manager of the Archaeology, Palaeontology and Meteorite Unit
