Final Comment

In terms of Section of the National Heritage Resources Act (Act 25 of 1999)

Attention: BBEntropie (Pty) Ltd

Harmony Nyala PV Soalr Facility

The proposed project "Nyala" entails the construction of a small-scale photovoltaic (PV) facility and associated infrastructure on the Farms Rietpan RE/17 and Rheederpark 443 near Odendaalsruls, Free State Province. This PV facility is part of a larger project "Harmony" of three PV facilities in total.

A Palaeontological Impact Assessment (PIA) was submitted to the application:

Bamford, July 2015. Palaeontological Impact Assessment for three proposed Photovoltaic Solar facilities facilities for Harmony Gold Mining Company, Odendaalsrus, Free State Province.

The author summarises that the area of the proposed PV facility occurs within layers of the Permian Volksrust Formation, the potentially fossiliferous coals of which are of poor quality and lie too deep to be affected by the proposed development.

Final comment

Following the recommendations in the PIA and previously submitted AIA, the SAHRA Archaeology, Palaeontology and Meteorites Unit has no objections against the proposed development of the Nyala PV facility subject to the following conditions:

- 1. SAHRA requires a field-based AIA to be conducted should it be decided to develop the newly proposed alternative area as it was not fully survyed in the AIA report (see AIA for details).
- 2. Should any objects of archaeological or palaeontological remains be found during construction activities, work must immediately stop in that area and the ECO must be informed.
- 3. The ECO must inform the South African Heritage Recourse Agency (SAHRA) and contact an archaeologist and/or palaeontologist, depending on the nature of the find, to assess the importance and rescue them if necessary (with the relevant SAHRA permit). No work may be resumed in this area without the permission from the ECO and SAHRA.
- 4. If the newly discovered heritage resource is considered significant a Phase 2 assessment may be required.
