**Harry Gwala District Municipality proposes to construct an Ibisi Sewer Reticulation System. Ibisi town is located in the uMzimkhulu local municipality within the jurisdiction of Harry Gwala District Municipality.**

The application has been considered and the Institute requires the developer to appoint a heritage practitioner to conduct a field-based heritage Impact assessment to prevent possible negative impact on heritage resources. The survey should include a palaeontological component as the site is within a fossil sensitive zone.

Please download our list of Heritage Practitioners from our website [www.heritagekzn.co.za](http://www.heritagekzn.co.za) and comply with the application Guidelines on Form J on the website.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
