## Final Comment

**In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999) and the  
KwaZulu-Natal Heritage Act (Act 4 of 2008)**

Attention: Envirolution Consulting (Pty) Ltd  
P.O.Box 1898  
Sunninghill  
2157

**Newcastle Local Municipality proposes to construct a 1,6km PVC bulk sewer pipe of 200mm diameter in Madadeni H39. The proposed pipeline will be a rising main from the pump station. From the proposed pump station the sewer will be pumped and it will discharge in a manhole of an existing 1050mm diameter bulk sewer line. The estimated flows through the pipeline are as follows: Q peak = 25l/s Head 19m**

We acknowledge receipt of the invitation for comment with regards to to the Basic Information Document and Heritage Impact Assessment Report on the proposed development. A field survey conducted on the proposed development area did not find any heritage resources to warrant mitigation measures.

Since the impact assessment by J. A. van Schalkwyk did not yield any heritage resources, the development can proceed as planned. The developer should however adhere to the below mentioned standard conditions and recommendations of the Heritage Practitioner as outlined in the HIA Report:

### Conditions:

1. No activities are allowed within 50m of a site, which contains rock art.
2. No structures older than sixty years or parts thereof are allowed to be demolished ,altered or extended without a permit from Amafa.
3. Amafa should be contacted if any heritage objects are identified during earth-moving activities and all development should cease until further notice.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
