NEW MV POWER LINE FOR MAGABANENG VILLAGE BOREHOLE ON THE FARM WINNAARSHOEK IN THE GREATER TUBATSE AREA OF LIMPOPO

Eskom SOC Ltd, Limpopo Operating Unit (LOU) is requesting on behalf of the applicant, that SAHRA grant an exemption from conducting heritage studies for this proposed development. According to the documents submitted to the case, a new power line will start at the Maandagshoek 22kV rural feeder to supply electricity to operate a well at a borehole that provides water for the Magabaneng Village. The length of the proposed power line will be 444 m located on the farm Winnaarshoek 250 KT, in the Greater Tubatse Local Municipality of the Limpopo Province.

SAHRA issued a Notification of Intent to Develop (NID) letter dated 01/09/2017, requesting that photographs of the power line route must be uploaded to the case file on SAHRIS.

The photos provided to the case do not show any surface heritage features therefore, the potential impact on heritage resources is considered low. The construction of a 22 kV power line that is less than a kilometre in length, will not change the character of the landscape. The likelihood of heritage artefacts being uncovered from the foundation excavations, for the required size of the wooden poles is low. However, the area is relatively undisturbed and any construction close to the dry stream bed must be monitored by the construction manager.

Final Decision

SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit accepts Multi Project Services request for an exemption, from further heritage assessments for this proposed power line route. Therefore, in terms of section 38(2)b of the National Heritage Resources Act, no 25 of 1999 (NHRA), the proposed development is granted an exemption from undertaking a Heritage Impact Assessment.

SAHRA has no objections to this proposed development going ahead and this Final Decision applies to the

provisions of the NHRA only.

The following conditions still apply and need to be added to Appendix C 1.22:

If there are any new heritage resources discovered during construction and operation phases of the proposed development, then a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contracted as soon as possible to inspect the findings at the expense of the developer.

If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation may be required at the expense of the developer. Mitigation will only be carried out after the archaeologist or palaeontologist obtains a permit in terms of section 35 of the NHRA (Act 25 of 1999). You may contact SAHRA APM Unit for further details: (Nokukhanya Khumalo/Phillip Hine 021 202 8652).

If any unmarked human burials are uncovered and the archaeologist called in to inspect the finds and/or the police find them to be heritage graves then mitigation may be necessary and the SAHRA Burial Grounds and Graves (BGG) Unit must be contacted for processes to follow (Thingahangwi Tshivase/Mimi Seetelo 012 320 8490).

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Nokukhanya Khumalo
Heritage Officer
