APPLICATION FOR A PROSPECTING RIGHT ON A PORTION OF PORTION 1 OF THE FARM BIESJESFONTEIN 218 SITUATED IN THE MAGISTERIAL DISTRICT OF BARKLEY WEST RD, NORTHERN CAPE PROVINCE. REFERENCE NC 30/5/1/1/2/12324 PR.

Lindie Wiehahn Consultants have been appointed by Renaissance Resources (Pty) Ltd to conduct an Environmental Authorisation (EA) Application and Prospecting Right (PR) Application for proposed prospecting activities on a portion of portion 1 of the farm Biesjesfontein 218 situated in the Magisterial District of Barkley West, Northern Cape Province (NC 30/5/1/1/2/12324 PR).

A draft Basic Assessment Report (dBAR) has been submitted in terms of the National Environmental Management Act, no 107 of 1998 (NEMA), NEMA Environmental Impact Assessment (EIA) Regulations for activities that trigger the Mineral and Petroleum Resources Development Act, 28 of 2002 (MPRDA)(As amended). The proposed prospecting activities will include 4 boreholes with an impact area of 40m² each covering an application area of 15, 8843 ha.

The dBAR notes that a Heritage Impact Assessment (HIA) has been requested to be completed and will be submitted when received.

In an Interim Comment issued on 18/04/2019, SAHRA noted the pending HIA and additionally noted that a Paleontological Impact Assessment must be undertaken. Since the issuing of the Interim Comment, a Heritage

Scoping Study has been submitted.

Kruger, N. 2019. Heritage Scoping Study (HS) of demarcated areas on a portion of portion 1 of the farm Biesjesfontein 218 for the proposed Biesjesfontein 218 Prospecting Project in the Frances Baard District Municipality, Northern Cape Province.

The desktop only report indicates that heritage resources such as Stone Age artefacts may be present along drainage lines and ridges and Late Iron Age settlements may occur on slopes around single hills and rock outcrops. The former “At Last” farmstead might prove sensitive for historical structures and graves.

Recommendations provided in the report include the following:

- The project area falls within a paleontologically sensitive zone and a Palaeontological Desktop Assessment (PDA) was commissioned for the proposed project. Cognisance should be taken of further recommendations included in the PDA Report;
- The term “Living Heritage” can broadly refer to a place of cultural heritage and sacred nature; with cultural attributions that are not generally physically manifested. Ritual and symbolic spaces and practices, and the material residues thereof convey an intangible cultural significance beyond the physical site or artefact, where the meaning of the ritual area speaks directly of a sense of place and lived experience. Such sites might occur on the Biesjesfontein property or its surroundings and due cognisance should be taken of these sites of “Living Heritage” in the cultural landscape;
- It is recommended that all graves and cemeteries that might occur in the project area be conserved and excluded from impact emanating from the development. Where impact on such resources would prove to be inevitable, the correct human remains repatriation procedures should be observed at all times. These procedures should include public notification of intent to relocate the remains, consultation with descendant communities, close liaison with -and approval from local futurities, adherence to any local laws and / bylaws, and correct grave relocation methodologies;
- It is possible that groups, farmers and locals living in the area have occupied the region for many generations and have expressed long-term cultural associations with the region. Therefore, it is important to ascertain from these respondents whether there are any further undetected sites of cultural significance in the area to which they relate and / or attach cultural meaning;
- Ultimately, it is recommended that the archaeological and cultural heritage of this part of the Northern Cape Province be respected. The management of heritage resources, as stipulated by National and International Heritage resources agencies (e.g. SAHRA) should be aligned with any future activity by

means of cultural mitigation and/or management plans developed in conjunction with heritage authorities and specialists; and

- It should be noted that this HS and site sensitivity included above are solely based on off-site desktop findings and the heritage sensitivity of the Biesjesfontein property remains tentative pending further detailed site inspection as part of the Heritage Impact Assessment (HIA) process, subject to section 38 of the NHRA.

Interim Comment

SAHRA notes that the outstanding Palaeontological Assessment has not yet been submitted. No further comments will be issued until receipt of the outstanding report.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
