60 years are generally protected. They may not be disturbed without a permit from the relevant heritage resources authority. In contexts of development applications, the developer must ensure that no heritage resources will be impacted by the proposed development, by lodging an application to SAHRA and submitting detailed development specifications as a notification of intent to develop. If the application is made in terms of s. 38 (8) of the NHRA then it is incumbent on the developer to ensure that a Heritage Impact Assessment (HIA) is undertaken, as s. 38(2)a does not apply. Such a study should follow the SAHRA 2007 Minimum Standards: Archaeological and Palaeontological Components of Impact Assessment Reports and section 38(3) of the NHRA.

The HIA must be undertaken by a suitably qualified archaeologist and it must comply with section 38(3) of the National Heritage Resources Act, Act 25 of 1999 (NHRA). Once the report is submitted to the case for commenting, SAHRA will provide further comments on this proposed development.

In addition to the HIA report, SAHRA also requires an assessment of palaeontological resources by a suitably qualified palaeontologist, and a .kml file must be uploaded to the GISLayer Palaeo-Sensitivity map. The HIA, palaeontology assessment and the .kml file must be provided to SAHRA prior to the submission of the final BAR to the competent authority. All these documents will be assessed and a comment issued.
