Interim Comment

In terms of Section 38(3), 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Willie Oosthuizen
Wadala Mining and Consulting Pty Ltd

Opencast Mining for Tin, Zinc and Tungsten ore.

Thank you for notifying SAHRA of the Environmental Authorisation (EA) application for the proposed mining activities on Lot 1288, Lot 1279 and Remainder Lot 1726 (portion of Lot 1177), Kakamas South Settlement situated within the Administrative District of Kenhardt, Northern Cape (NC 30/5/1/2/2/10172 MR).

As the proposed development is undergoing an EA Application process in terms of the National Environmental Management Act, 107 of 1998 (NEMA), NEMA Environmental Impact Assessment (EIA) Regulations as amended, it is incumbent on the developer to ensure that a **Heritage Impact Assessment (HIA)** is done as per section 38(3) and 38(8) of the National Heritage Resources Act, Act 25 of 1999 (NHRA) as required by section 24(4)b(iii) of NEMA. This must include an archaeological component, palaeontological component and any other applicable heritage components. The HIA must be conducted **as part of the EA Application** in terms of NEMA and the NEMA EIA Regulations.

SAHRA requests that an assessment of the impacts to heritage resources that complies with section 38(3) of the NHRA as required by section 38(8) of the NHRA and section 24(4)b(iii) of NEMA be conducted as part of the EA process.

The assessment must include an assessment of the impact to archaeological resources. The assessment of archaeological resources must be conducted by a qualified archaeologist and the report comply with the SAHRA 2007 Minimum Standards: Archaeological and Palaeontological Components of Impact Assessment Reports (see www.asapa.co.za or www.aphp.org.za for a list of qualified archaeologists).

The proposed development is located within an area of negligible sensitivity as per the SAHRIS PalaeoSensitivity map. As such, no further assessment of the impact to palaeontological resources is required.

Any other heritage resources as defined in section 3 of the NHRA that may be impacted, such as built structures over 60 years old, sites of cultural significance associated with oral histories, burial grounds and graves, graves of victims of conflict, and cultural landscapes or viewsapes must also be assessed.

**Mining Right for Tin, Zinc and Tungsten ore by Renosterkop Mining Company
(Pty) Ltd with Opencast Mining. NC 10172 MR**
