Date: Tuesday September 15, 2020

Page No: 1

Final Decision

In terms of Section 38(2) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Mr Khathutshelo Nesindande
Eskom Holdings SOC Ltd
90 Hans Van Rensburg Street.
Polokwane,
0700

Eskom Holdings SOC Ltd, Limpopo Operating Unit (LOU) intends to construct the Electrification for the above-mentioned project. The power line will include new 1.62KM MV which will T-off from the existing power line in pole number MWB1/16/1A (refer to the Span plan sheets and the Pegging Coordinates for more information) traversing on the of Farm De Put No 412-KQ in Thabazimbi Local Municipality of Waterberg District Municipality of the Limpopo Province

Eskom SOC Ltd, Limpopo Operating Unit (LOU) is requesting, on behalf of their applicant, that SAHRA grant them an exemption from conducting heritage studies for this proposed power line development. According to the documents submitted to the case, the proposed new power line will be 6 km in length starting at MWB 22 kV feeder, on Portion 2 of the farm De Put 412 KQ, in the Thabazimbi Local Municipality of Limpopo Province. The power line will be supplying electricity to various households in Extension 20 of Northam Township.

The photos provided to the case do not show any surface heritage features therefore, the potential impact on heritage resources is considered low. The construction of a 22 kV power line that is less than a kilometre in length will not change the character of the landscape. The likelihood of heritage artefacts being uncovered from the foundation excavations is low. However, the area is relatively undisturbed, and any construction close to the dry stream bed must be monitored by the construction manager. The area is also located in a grey palaeo-sensitivity area and the power line will have negligible impact on the palaeo-heritage.

Final Decision

SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit accepts Eskom Holdings (SOC) Ltd LOU's request for an exemption from further heritage assessments, for this proposed power line route. Therefore, in terms of section 38(2)b of the National Heritage Resources Act, no 25 of 1999 (NHRA), the proposed development is granted an exemption from undertaking a Heritage Impact Assessment.

SAHRA has no objections to this proposed development going ahead and this Final Decision applies to the provisions of the NHRA only.

The following conditions still apply and need to be added to Appendix C 1.22:

If there are any new heritage resources discovered during construction and operation phases of the proposed development, then a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contracted as soon as possible to inspect the findings at the expense of the developer.

If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation may be required at the expense of the developer. Mitigation will only be carried out after the archaeologist or palaeontologist obtains a permit in terms of section 35 of the NHRA (Act 25 of 1999). You may contact SAHRA APM Unit for further details: (Nokukhanya Khumalo/Phillip Hine 021 202 8654).

If any unmarked human burials are uncovered and the archaeologist called in to inspect the finds and/or the police find them to be heritage graves, then mitigation may be necessary and the SAHRA Burial Grounds and Graves (BGG) Unit must be contacted for processes to follow (Mimi Seetelo 012 320 8490).

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Nokukhanya Khumalo
