## Final Decision

### In terms of Section 38(2) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Mrs Galaletsang Mongalo  
Eskom MOU  
28 Ferreira street  
Nelspruit  
1200

**Eskom Distribution, Limpopo- Mpumalanga cluster(LIMLANGA) is proposing to construct an 11kV powerline to interconnect with another feeder, at Daantjie village near Kanyamazane. The proposed 11kV powerline will feed from the Khuleka feeder, within the farm Nyamansaan 647 JU, Ehlanzeni District municipality, Mbombela municipality, Mpumalanga province. The project will involve the use of 14m wooden poles dug into a 2X2m wide and 2.4 deep holes.**

Eskom SOC Ltd is proposing to construct a new power line in the Daantjie Village.

The photos provided to the case do not show any surface heritage features therefore, the potential impact on heritage resources is considered low. The construction of a 22 kV power line that will be 0.444 kilometre in length constructed within road reserves in an existing village will not change the character of the landscape. The likelihood of heritage artefacts being uncovered from the foundation excavations is low.

The power line route is located in an area of negligible palaeo-sensitivity and according to the SAHRIS palaeomap, no impact assessments are required.

### Final Decision

SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit grants this application an exemption from further heritage assessments in terms of section 38(2)b of the National Heritage Resources Act, no 25 of 1999 (NHRA).

SAHRA has no objections to this proposed development going ahead and this Final Decision applies to the provisions of the NHRA only.

The following conditions still apply and need to be added to Appendix C 1.22:

Page No: 2

If there are any new heritage resources discovered during construction and operation phases of the proposed development, then a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contracted as soon as possible to inspect the findings at the expense of the developer.

If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation may be required at the expense of the developer. Mitigation will only be carried out after the archaeologist or palaeontologist obtains a permit in terms of section 35 of the NHRA (Act 25 of 1999). You may contact SAHRA APM Unit for further details: (Nokukhanya Khumalo/Phillip Hine 021 202 8654).

If any unmarked human burials are uncovered and the archaeologist called in to inspect the finds and/or the police find them to be heritage graves, then mitigation may be necessary and the SAHRA Burial Grounds and Graves (BGG) Unit must be contacted for processes to follow (Mimi Seetelo 072 802 1251).

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
