

Final Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: TSB Sugar RSA Ltd

Mhlati Farm

Malalane

Mpumalanga

South Africa

TSB Sugar Komati Mill Power Generation - installation of a new 15 MW back pressure turbo alternator at Komati Mill.

Thank you for your indication that development is to take place in this area.

In terms of the National Heritage Resources Act (NHRA), no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years and structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority.

In terms of Sections 38(1) and (2) of the NHRA, any development that changes the character of a site that is greater than 5000m² may require a **Heritage Impact Assessment** that satisfies Section 38(3) of the NHRA. The role of the HIA is to identify and document all heritage resources as defined by the NHRA that may be impacted by the proposed development. Appropriate mitigation, which involves recording, sampling and dating sites that are to be destroyed, may be required depending on the nature and significance of the resources identified.

The submitted application is for the installation of a new 15MW back pressure turbo alternator at Komati Mill within the existing Komati Mill Works. The property in question is zoned for industrial development and the proposed activity entails an upgrade to the existing plant and will thus fall within an existing built-up site. It is therefore unlikely that the proposed development will impact on any significant heritage resources.

Consequently, SAHRA Archaeology, Palaeontology & Meteorites (APM) Unit has no objection to the proposed development on the condition that if any evidence of archaeological sites or remains (e.g., remnants of stone-made structures, indigenous ceramics, bones, stone artefacts, ostrich eggshell fragments, marine shell and charcoal/ash concentrations), unmarked human burials, fossils or other categories of heritage resources are found during the proposed activities, SAHRA APM Unit (Jenna Lavin/Colette Scheermeyer 021 462 4502) must be alerted immediately, and a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contacted as soon as possible to inspect the findings. If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation might be necessary.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Jenna Lavin
Heritage Officer
South African Heritage Resources Agency

Colette Scheermeyer
SAHRA Head Archaeologist
South African Heritage Resources Agency

ADMIN:
(DEA, Ref: DEA/EIA/0001030/2012)

Terms & Conditions:

1. This approval does not exonerate the applicant from obtaining local authority approval or any other necessary approval for proposed work.
2. If any heritage resources, including graves or human remains, are encountered they must be reported to SAHRA immediately.
3. SAHRA reserves the right to request additional information as required.
