Final Decision

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Miss Prudence Khosa
Eskom Distribution- LOU
92 Hans van Rensburg
Polokwane

Eskom Holdings SOC Ltd, Limpopo Operating Unit (LOU) intends to construct the power line for the above-mentioned project. The power line will include new 348 M MV, which will T-off from the existing power line in pole number BSE7/5 (refer to the Span plan sheets and the Pegging Coordinates for more information) traversing on the farm of De Kaffersdrift 510-LS in Molemole Local Municipality of Capricorn District Municipality of the Limpopo Province

Eskom SOC Ltd Limpopo Operating Unit (LOU) has submitted a section 38(1) of the National Heritage Resources Act, no 25 of 1999 (NHRA) application on behalf of their applicant to obtain a SAHRA decision in terms of section 38 of the NHRA. Eskom is proposing to construct a power line 348m in length starting at the Botlokwa-Sekgopo 22kV feeder, to supply electricity to a customer near the Botlokwa Substation, in Limpopo Province.

The photos provided to the case do not show any surface heritage features therefore, the potential impact on heritage resources is considered low. The construction of a 22kV power line that is within an existing village and along the gravel road will not change the character of the landscape. The likelihood of heritage artefacts being uncovered from the foundation excavations is low. However, the area is also located in a low palaeo-sensitivity area and the power line will have negligible impact on the palaeo-heritage.

Final Decision

The SAHRA Archaeology, Palaeontology and Meteorites (APM) Unit accepts application and all the supporting documents for this proposed power line route. Therefore, in terms of section 38(2)b of the National Heritage Resources Act, no 25 of 1999 (NHRA) the proposed development is granted an exemption from undertaking a Heritage Impact Assessment.

The SAHRA has no objections to this proposed development going ahead and this Final Decision applies to

the provisions of the NHRA only.

The following conditions still apply and need to be added to Appendix C 1.22:

If there are any new heritage resources discovered during construction and operation phases of the proposed development, then a professional archaeologist or palaeontologist, depending on the nature of the finds, must be contracted as soon as possible to inspect the findings at the expense of the developer.

If the newly discovered heritage resources prove to be of archaeological or palaeontological significance, a Phase 2 rescue operation may be required at the expense of the developer. Mitigation will only be carried out after the archaeologist or palaeontologist obtains a permit in terms of section 35 of the NHRA (Act 25 of 1999). You may contact SAHRA APM Unit for further details: (Nokukhanya Khumalo/Phillip Hine 021 202 8654).

If any unmarked human burials are uncovered and the archaeologist called in to inspect the finds and/or the police find them to be heritage graves, then mitigation may be necessary and the SAHRA Burial Grounds and Graves (BGG) Unit must be contacted for processes to follow (Thingahangwi Tshivhase/Ngqalabutho Madida 012 320 8490).

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Nokukhanya Khumalo
