Final Comment

In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Khai Garib Local Municipality
Private Bag X6,
Kakamas,
8870

The Department of Environmental Affairs (DEA) commissioned a study in 2007, completed in 2009, that aimed at identifying and determining the number of waste disposal facilities in South Africa that are not licenced. Of a total of 581 sites that were identified, 431 needed to be licensed. It was evident from the study that Local Municipalities (LMs) did not have adequate training or funding for lodging applications to licence their unlicensed waste disposal facilities or the management thereof. The Minister undertook to begin the process of licencing these sites, with a target that all would be licenced by 2013/2014. Subsequently, the DEA has identified an additional 57 municipal waste disposal facilities which must be licensed during the 2014/15 financial year. The licensing of the Vredesvallei landfill falls within the scope of this process. The Khai Garib Local Municipality is applying for a waste management license for the closure of the existing Vredesvallei Landfill. The landfill site is located approximately 1.4 km east of the settlement of Vredesvallei. Vredesvallei settlement is located approximately 14 km south west of Vredesvallei, Northern Cape. The existing landfill site has not been used since 2014 and almost all waste has been removed and disposed of at the existing Kakamas Landfill. Currently, all waste generated within the settlement of Vredesvallei is transported to Kakamas on a weekly basis.

The Department of Environmental Affairs (DEA) appointed Sustainable Environmental (Pty) Ltd (SE Solutions) and AECOM SA (Pty) Ltd to prepare the necessary applications for the Waste Management License and closure of the existing un-licensed Vredesvallei Landfill near Vredesvallei, Northern Cape. A Basic Assessment (BA) process was completed in compliance with the National Environmental Management: Waste Act, 2008 (Act No. 59 of 2008) as amended (NEMWA).

According to the Basic Assessment Report (BAR), activities for the closure of the Vredesvallei Landfill will include re-contouring of the landfill area and covering of the site with topsoil. The Environmental Management Programme (EMPr) provides more details for the closure. The EMPr stated that the re-contouring will include the stripping of the top 150 mm of topsoil which will be stockpiled. In addition, the areas requiring re-contouring will be cross-ripped and scarified to allow for vegetation growth. The stockpiled topsoil will be used to cover the landfill site and add to the re-contouring activity.

The BA process did not identify any impact to heritage resources.

Final Comment

Based on the information provided, it is unlikely that significant heritage resources will be impacted by the proposed closure of the Vredesvallei Landfill. The following additional conditions must be adhered to and must form part of the final EMPr:

- A Chance Finds Procedures must be developed for the project to ensure that standard protocols and steps are followed should any heritage and/or fossil resources be uncovered during the re-contouring phase of the project. These procedures should outline the steps and reporting structure to be followed in the instance that heritage resources are found. Should heritage resources be uncovered during the construction phase of the project, all work in the area must cease immediately and be reported to SAHRA.
- Should additional topsoil be required to complete the re-contouring, the above Chance Finds Procedures must be implemented for the relevant borrow pit area. Should the borrow pit exceed 5 000 m², the developer must notify SAHRA of the development as per section 38 (1) of the National Heritage Resources Act, 1999 (Act No. 25 of 1999) (NHRA). Should SAHRA deem it necessary, an Archaeological Impact Assessment (AIA) or Heritage Impact Assessment (HIA) will need to be completed and submitted to SAHRA for comment.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully
