

## Letter

### In terms of Section 38(8) of the National Heritage Resources Act (Act 25 of 1999)

Attention: Rhino Minerals (Pty) Ltd., t/a Annesley Andalusite Mine

### An application for an Atmospheric Emission License for the drying of mineral solids, including ore, at Annesley Andalusite Mine

Thank you for your notification that development is to take place in this area.

In terms of the National Heritage Resources Act, no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority. This means that before such sites are disturbed by development it is incumbent on the developer to ensure that a Heritage Impact Assessment is done. This must include the archaeological component (Phase 1) and any other applicable heritage components. Appropriate (Phase 2) mitigation, which involves recording, sampling and dating sites that are to be destroyed, must be done as required.

Since the proposed development will not have any impact on heritage resources, SAHRA does not have any objection to the proposed development in terms of the National Heritage Resources Act (Act No 25 of 1999).

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Phillip Hine  
Heritage Officer
