Electrification of Ga-Moloka Village with an MV power line of a length 1 512m, North West Province

Thank you for your indication that development is to take place in this area.

In terms of the National Heritage Resources Act, no 25 of 1999, heritage resources, including archaeological or palaeontological sites over 100 years old, graves older than 60 years, structures older than 60 years are protected. They may not be disturbed without a permit from the relevant heritage resources authority. This means that before such sites are disturbed by development it is incumbent on the developer to ensure that a **Heritage Impact Assessment** is done. This must include the archaeological component (Phase 1) and any other applicable heritage components. Appropriate (Phase 2) mitigation, which involves recording, sampling and dating sites that are to be destroyed, must be done as required.

It is noted that this development is for the electrification of the Ga-Maloka Village in the North West Province and will entail a 600m 11Kv Line. Considering that this development is small will likely not affect any heritage resources. A heritage impact assessment is therefore not needed for this project. However, if any heritage resources are identified on-site during construction activities SAHRA (Mr Phillip Hine/Mrs Colette Scheermeyer tel. 021 462 4502) or an archaeologist must be alerted immediately.

Should you have any further queries, please contact the designated official using the case number quoted above in the case header.

Yours faithfully

Phillip Hine
Heritage Officer

Ga-Maloka Village Electrification
